b. One of the original inhabitants or lifelong residents of a place. **2.** An animal or a plant that originated in a particular place or region. [Middle English, from Old French *natif*, from Latin *nātīvus*, from *nātus*, past participle of *nāscī*, to be born. See **genə-** in Appendix.] —**na'tive-ly** *adv.* —**na'tive-ness** *n.*

SYNONYMS: *native, indigenous, endemic, autochthonous, aboriginal.* These adjectives mean of, belonging to, or connected with a specific place or country by virtue of birth or origin. *Native* implies birth or origin in the specified place: *a native Frenchman; the native North American sugar maple.* *Indigenous* specifies that something or someone is native rather than coming or being brought in from elsewhere: *The tomato is indigenous to South America. The Ainu are indigenous to the northernmost islands of Japan.* Something *endemic* is prevalent in or peculiar to a particular locality or people: *Food shortages and starvation are endemic in certain parts of the world.* *Autochthonous* applies to what arises in the locality where it is found and has not been exposed to or has resisted change from outside sources: *Bartók collected autochthonous folk melodies and used them in his compositions.*

Aboriginal describes what has existed from the beginning; it is often applied to the earliest known inhabitants of a place: *aboriginal chiefs; the aboriginal population; aboriginal nature*. See also Synonyms at **crude**

Na·tive American (nā'tīv ə-mĕr'ī-kən) *n.* A member of any of the aboriginal peoples of the Western Hemisphere. The ancestors of the Native Americans are generally considered to have entered the Americas from Asia by way of the Bering Strait sometime during the late glacial epoch. Also called *American Indian, Amerindian, Indian*. —**Native American** *adj.*

USAGE NOTE: The term *Indian* has always been a misnomer for the earliest inhabitants of the Americas. Many people now prefer *Native American* both as a corrective to Columbus's mistaken appellation and as a means of avoiding the romantic and generally offensive stereotypes associated with phrases such as *wild Indian* or *cowboys and Indians*. Certainly there is great merit in a term that distinguishes the peoples indigenous to the Americas from the inhabitants of India, and wherever such confusion might exist *Native American* is an obvious choice. It is also preferred by many contemporary writers when emphasizing ethnic pride, as in "*Only the Native American can lay claim to equality in suffering with the Afro-American in this nation*" (S. Allen Counter). However, it should not be assumed that *Indian* is necessarily offensive or out of date. On the contrary, *Indian* is firmly rooted in English in neutral terms such as *Plains Indian, Paleo-Indian, and Indian summer*, as well as in numerous plant and place names, and in locutions of this kind there is no possibility of substitution. Furthermore, many Native Americans and others sympathetic to Native American issues continue to use *Indian* as a term of pride and respect, as in "*It was about this time that [my mother] began to see herself as an Indian. That dim native heritage became a fascination and a cause for her*" (N. Scott Momaday) and "*The desperate struggles of the Indian people for survival in this century are too widespread and various to be treated in a single volume*" (Peter Matthiessen). • The compound terms *American Indian* and the less frequent *Amerindian* offer an unambiguous and unproblematic alternative where *Native American* might seem out of place, as in certain historical contexts or in references to groups outside the boundaries of the United States. *Indian* is also a useful adjunct to the name of a people when it cannot be assumed that the reader is familiar with their cultural identity; thus one might say *the Wampanoag Indians* or *the Quiché Indians of Guatemala* rather than adding a gloss such as *the Quiché, a Native American people of Guatemala*. • *Native American* and *Indian* are not exact equivalents when referring to the aboriginal peoples of Canada and Alaska. *Native American*, the broader term, is properly used of all such peoples, whereas *Indian* is customarily used of the northern Athabaskan and Algonquian peoples

in contrast to the Eskimo and the Aleut.

[Middle English *noughti*, wicked, from *nought*, nothing, evil, from Old English *nāwiht*, nothing. See NAUGHT.] —**naugh'ti·ly** *adv.* —**naugh'ti·ness** *n.*

WORD HISTORY: Words have changes in their fortunes over time just as people and institutions do. The word *naughty* at one time might have been high on one's list as an all-purpose word similar to *bad* or *nice*. During the 16th century one could use *naughty* to mean "unhealthy, unpleasant, bad (with respect to weather), vicious (of an animal), inferior, or bad in quality" (one could say "very naughtie figes" or "naughty corrupt water"). All of these senses have disappeared, however, and *naughty* is now used mainly in contexts involving mischief or indecency. This recalls its early days in Middle English (with the form *noughti*), when the word was restricted to the senses "evil, hostile, ineffectual, and needy." Middle English *noughti*, first recorded in works written in the last quarter of the 14th century, was derived from *nought*, which as a noun had senses such as "evil," as a pronoun meant "nothing," and as an adjective could mean such things as "immoral, weak, useless." *Nought* was descended from Old English *nāwiht*, with similar senses, a compound made up of *nā*, "no," and *wiht*, "thing, being." Thus *naughty*, in a sense, has risen from nothing, but its fortunes have been better than they are at present.

nau·pli·us (nô'plē-əs) *n. pl. nau·pli·i* (-plē-ī'). The free-swimming first stage of the larva of certain crustaceans, having an unsegmented body with three pairs of appendages and a single median eye. [Latin, a kind of shellfish, from Greek *nauplios*.] —**nau'pli·al** (-əl) *adj.*

Discovered by the British in 1798, the coral atoll was annexed by Germany in 1888 and administered by Australia from 1919 until it became independent in 1968. Yaren is the capital. Population, 8,000. —**Na·u·ru·an** *adj.* & *n.*

nau·se·a (nô'zē-ə, -zhə, -sē-ə, -shə) *n.* **1.** A feeling of sickness in the stomach characterized by an urge to vomit. See Usage Note at **nauseous**. **2.** Strong aversion; disgust. [Middle English, from Latin, from Greek *nautia*, *nausiē*, seasickness, from *nautēs*, sailor, from *naus*, ship. See **nāu-** in Appendix.]

nau·se·ant (nô'zē-ənt, -zhē-, -sē-, -shē-) *adj.* Inducing nausea or vomiting. —**nau'se·ant** *n.*

nau·se·ate (nô'zē-āt', -zhē-, -sē-, -shē-) *v. intr. tr.* **nau·se·at·ed**, **nau·se·at·ing**, **nau·se·ates**. **1.** To feel or cause to feel nausea. **2.** To feel or cause to feel loathing or disgust. See Synonyms at **disgust**. See Usage Note at **nauseous**. [Latin *nauseāre*, *nauseāt-*, from *nausea*, nausea. See NAUSEA.]
—**nau'se-at'ing·ly** *adv.* —**nau'se-a'tion** *n.*

nau·seous (nô'shəs, -zē-əs) *adj.* **1.** Causing nausea; sickening: “*the most nauseous offal fit for the gods*” (John Fowles). **2.** *Usage Problem.* Affected with nausea. —**nau'seous·ly** *adv.*

USAGE NOTE: Traditional critics have insisted that *nauseous* is appropriately used only to mean “causing nausea” and that it is incorrect to use it to mean “affected with nausea,” as in *Roller coasters make me nauseous*. In this example, *nauseated* is preferred by 72 percent of the Usage Panel. What is curious, however, is that 88 percent of the Panelists indicated that they would prefer *nauseating* in the sentence *The children looked a little green from too many candy apples and nauseous rides*. Thus it appears that like a handful of other words such as *transpire*, *nauseous* is actively used mainly in the sense in which it is considered incorrect. • While the use of *nauseous* to mean “affected with nausea” may incur critical displeasure, it should be pointed out in its defense not only that it is quite common among educated speakers but that it is subtly distinct from *nauseated* in this sense. *Nauseated* is a passive participle, and hence suggests a condition induced by a specific external cause. By contrast, *nauseous* is an adjective that refers to an occurrent state whose cause may be nonspecific or unknown. The person who reports that *I woke up this morning feeling nauseous* might not be willing to accept that he or she had been *nauseated* by any external agent.

Nau·sic·a·a (nô-sīk'ē-ə, -ā-ə, nou-) *n.* *Greek Mythology.* In the *Odyssey*, a maiden who befriended the stranded Odysseus.

née also **nee** (nā) *adj.* **1.** Born. Used to indicate the maiden name of a married woman. **2.** *Usage Problem.* Formerly known as. [French, feminine past participle of *naître*, to be born, from Old French *naistre*, from Latin *nāscī*. See **genə**- in Appendix.]

USAGE NOTE: The traditional conventions of address dictate that *née* or *nee*

be followed only by a family name (which is, to be sure, the only name one has at birth): *Mrs. Mary Parks, née Case*, not *née Mary Case*. • *Née* is a feminine form in French, and both its spelling and its pronunciation indicate that it has not been fully nativized. Its use to describe men who have changed their names is likely to raise eyebrows among people who recognize the etymology of the word, unless the intention is clearly jocular. A phrase like *John Smith, née Schmidt*, would be more accurately—and less affectedly—paraphrased with an unexceptionally English word such as *born* or *formerly known as*.

need (nēd) *n.* **1.** A lack of something required or desirable: *crops in need of water; a need for affection.* **2.** Something required or wanted; a requisite: *Our needs are modest.* **3.** Necessity; obligation: *There is no need for you to go.* **4.** A condition of poverty or misfortune: *The family is in dire need.* — *v.* **need-ed, need-ing, needs.** — *aux.* To be under the necessity of or the obligation to: *They need not come.* — *v. tr.* To have need of; require: *The family needs money.* — *v. intr.* **1.** To be in need or want. **2.** To be necessary. [Middle English *nede*, from Old English *nēod*, *nēd*, distress, necessity.]

SYNONYMS: *need, necessity, exigency, requisite.* These nouns denote a condition in which something essential is required or wanted; they also refer to that which is required or wanted. *Need* is the most general: *There's no need to be concerned. She is serene and contented; her emotional and spiritual needs are being met.* *Necessity* more strongly than *need* suggests urgency, inevitability, or unavoidable obligation: “*I think the necessity of being ready increases.—Look to it*” (Abraham Lincoln). “*The rehabilitation of the cabin became a necessity*” (Bret Harte). *Exigency* implies acute urgency, especially that arising from conditions or circumstances such as those of an emergency: “*No... more pernicious [doctrine] was ever invented... than that any of [the Constitution's] provisions can be suspended during any of the great exigencies of government*” (David Davis) *Requisite* applies to something indispensable: “*a place where the three grand requisites of water, fuel and fodder were to be obtained*” (James Fenimore Cooper). See also Synonyms at **lack**

USAGE NOTE: Depending on the sense, the verb *need* behaves sometimes like an auxiliary verb (such as *can* or *may*) and sometimes like a main verb (such as *want* or *try*). When used as a main verb, *need* agrees with its subject, takes *to* before the verb following it, and combines with *do* in questions, negations, and certain other constructions: *He needs to go. Does he need to go so soon? He doesn't need to go.* When used as an auxiliary verb, *need* does not agree with its subject, does not take *to* before the verb following it, and does not combine with *do*: *He needn't go. Need he go so soon?* The auxiliary forms of *need* are used primarily in present-tense questions, negations, and conditional clauses. They differ subtly in meaning from the main verb forms in that they always refer to an externally imposed ob-

ligation. Hence one might say *You needn't* (or less formally, *don't need to*) *fill out both forms*, but where the sense of necessity is internal to the subject, only the main verb can be used: *I don't need to* (not *needn't*) *be told how to manage my own affairs*. Note also that the use of *need* as an auxiliary is often accompanied by a presupposition that the activity in question has in fact been performed. *The boys needn't have spoken frankly* implies that they did in fact speak frankly, whereas the sentence *The boys did not need to speak frankly* does not; only the latter could be followed by a clause like *they conveyed their meanings by indirection*.

Neh·ru (nā’rōō), Pandit **Motilal**. 1861-1931. Indian nationalist politician who was an associate of Mahatma Gandhi and an influential leader in the years leading to India’s independence. His son **Jawaharlal Nehru** (1889-1964), also greatly involved in the movement for self-governance, was the political heir to Gandhi and the first prime minister of independent India (1947-1964).

neigh (nā) *n.* The long, high-pitched sound made by a horse. — *v. intr.*

neighed, neigh·ing, neighs. To utter the characteristic sound of a horse; whinny. [From Middle English *neighen*, to neigh, from Old English *hnægan*, probably of imitative origin.]

neigh·bor (nā'bər) *n.* **1.** One who lives near or next to another. **2.** A person, place, or thing adjacent to or located near another. **3.** A fellow human being. **4.** Used as a form of familiar address. — *v.* **neigh·bored, neigh·bor·ing, neigh·bors.** — *v. tr.* To lie close to or border directly on. — *v. intr.* To live or be situated close by. — *adj.* Situated or living near another: *a neighbor state.* [Middle English *neighebor*, from Old English *nēahgebūr* : *nēah*, near; see **nēhw-iz** in Appendix + *gebūr*, dweller; see **bheuə-** in Appendix.]

WORD HISTORY: Loving one's neighbor as oneself would be much easier, or perhaps much more difficult, if the word *neighbor* had kept to its etymological meaning. The source of our word, the assumed West Germanic form *·nāhgabūr*, was a compound of the words *·nēhwiz*, "near," and *·būram*, "dweller, especially a farmer." A neighbor, then, was a near dweller. *Nēahgebūr*, the Old English descendant of this West Germanic word, and its descendant in Middle English, *neighebor*, and our Modern English *neighbor* have all retained the literal notion, even though one can now have many neighbors whom one does not know, a situation that would have been highly unlikely in earlier times. The extension of this word to mean "fellow" is probably attributable to the Christian concern with the treatment of one's fellow human beings, as in the passage in Matthew 19:19 that urges love of one's neighbor.

neigh·bor·hood (nā'bər-hōd') *n.* **1.** A district or an area with distinctive characteristics: *a neighborhood of fine homes; an ethnic neighborhood.* **2.** The people who live near one another or in a particular district or area: *The noise upset the entire neighborhood.* **3.** The surrounding area; vicinity: *happened to be in the neighborhood.* **4.** *Informal.* Approximate amount or range: *in the neighborhood of five million dollars.* **5.** Friendliness appropriate to a neighbor: *a feeling of neighborhood.* **6.** *Mathematics.* The set of points surrounding a specified point, each of which is within a certain, usually small distance from the specified point. — *n. attributive.* Often used to modify another noun: *neighborhood schools; neighborhood housing.*

neigh·bor·ly (nā'bər-lē) *adj.* Having or exhibiting the qualities of a friendly neighbor. — **neigh·bor·li·ness** *n.*

neigh·bour (nā'bər) *n., v. & adj.* *Chiefly British.* Variant of **neighbor**.

Its longest-lived isotope is Np-237 with a half-life of 2.1 million years. Found in trace quantities in uranium ores, it is produced synthetically by nuclear reactions. [After the planet NEPTUNE¹ (from the fact that it follows uranium in the periodic table).]

ne-ral (nîr'ăl) *n.* *Chemistry.* A structural isomer of citral that is obtained from the oxidation of nerol and is used to make perfumes and flavorings. [NER(OL) + -AL³.]

nerd also **nurd** (nûrd) *n.* *Slang.* **1.** A person regarded as stupid, inept, or unattractive. **2.** A person who is single-minded or accomplished in scientific pursuits but is felt to be socially inept. [Perhaps after *Nerd*, a character in *If I Ran the Zoo*, by Theodor Seuss Geisel.] —**nerd'y** *adj.*

WORD HISTORY: The word *nerd* and *a nerd*, undefined but illustrated, first appeared in 1950 in Dr. Seuss's *If I Ran the Zoo*: "And then, just to show them, I'll sail to Ka-Troo And Bring Back an It-Kutch a Preep and a Proo a Nerke a Nerd and a Seersucker, too!" (The *nerd* itself is a small humanoid creature looking comically angry, like a thin, cross Chester A. Arthur.) *Nerd* next appears, with a gloss, in the February 10, 1957, issue of the Glasgow, Scotland, *Sunday Mail* in a regular column entitled "ABC for SQUARES": "Nerd—a square, any explanation needed?" Many of the terms defined in this "ABC" are unmistakable Americanisms, such as *hep*, *ick*, and *jazzy*, as is the gloss "square," the current meaning of *nerd*. The third appearance of *nerd* in print is back in the United States in 1970 in *Current Slang*: "*Nurd* [sic], someone with objectionable habits or traits.... An uninteresting person, a 'dud.'" Authorities disagree on whether the two *nerds*—Dr. Seuss's small creature and the teenage slang term in the *Glasgow Sunday Mail*—are the same word. Some experts claim there is no semantic connection and the identity of the words is fortuitous. Others maintain that Dr. Seuss is the true originator of *nerd* and that the word *nerd* ("comically unpleasant creature") was picked up by the five- and six-year-olds of 1950 and passed on to their older siblings, who by 1957, as teenagers, had restricted and specified the meaning to the most comically obnoxious creature of their own class, a "square."

Ne-re-id (nîr'ē-īd) *n.* **1.** *Greek Mythology.* Any of the sea nymphs, the 50 daughters of Nereus. **2.** The satellite of Neptune that is third in distance from the planet. [Latin *Nērēis*, *Nērēid-*, from Greek, from *Nēreus*, Nereus.]

neu·ri·lem·ma (nōōr'ə-lēm'ə, nyōōr'-) *n.* The delicate membranous covering of a nerve fiber. [Alteration (influenced by Greek *lemma*, husk); see LEMMA², of French *névrilème*: *névr-*, nerve (from Greek *neuro-*, *neuro-*) + Greek *eilēma*, veil (from *eilein*, to wind, turn); see **wel**² in Appendix.] —**neu'ri·lem'mal** *adj.*

neu·ris·tor (nōō-rīs'tər, nyōō-) *n.* An electronic device that is capable of relaying a signal without attenuation in velocity. [NEUR(ON) + (TRANS)ISTOR.]

neu·ri·tis (nōō-rī'tīs, nyōō-) *n.* Inflammation of a nerve or group of nerves, characterized by pain, loss of reflexes, and atrophy of the affected muscles. —**neu·rit'ic** (-rīt'ik) *adj.*

neuro- or **neur-** *pref.* **1.** Nerve: *neuroblast*. **2.** Neural: *neuropathology*. [Greek *sinew*, *string*, from *neuron*. See **(s)neū-** in Appendix.]

neu·ro·a·nat·o·my (nōōr'ō-ə-nāt'ə-mē, nyōōr'-) *n.* *pl.*

neu·ro·a·nat·o·mies. **1.** The branch of anatomy that deals with the nervous system. **2.** The neural structure of an organ or a part: *the neuroanatomy of the eye*. —**neu'ro·an'a·tom'i·cal** (-än'ə-tōm'ī-kəl) *adj.* —**neu'ro·a·nat'o·mist** *n.*

neu·ro·bi·ol·o·gy (nōōr'ō-bī-ōl'ə-jē, nyōōr'-) *n.* The biological study of the nervous system or any part of it. —**neu'ro·bi'o·log'i·cal** (-bī'ə-lōj'ī-kəl) *adj.* —**neu'ro·bi·ol'o·gist** *n.*

neu·ro·blast (nōōr'ə-blāst', nyōōr'-) *n.* An embryonic cell from which a nerve cell develops.

neu-ro-blas-to-ma (nōor'ō-blā-stō'mə, nyōor'-) *n.* *pl.* **neu-ro-blas-to-mas** or **neu-ro-blas-to-ma-ta** (-mə-tə). A malignant tumor composed of neuroblasts, originating in the autonomic nervous system or the adrenal medulla and occurring chiefly in infants and young children.

neu-ro-chem-is-try (nōor'ō-kēm'ī-strē, nyōor'-) *n.* The study of the chemical composition and processes of the nervous system and the effects of chemicals on it. —**neu'ro-chem'i-cal** (-kəl) *adj.* —**neu'ro-chem'ist** *n.*

neu-ro-en-do-crine (nōor'ō-ēn'də-krīn, -krēn', -krīn', nyōor'-) *adj.* Of, relating to, or involving the interaction between the nervous system and the hormones of the endocrine glands: *the neuroendocrine apparatus in birds.*

neu-ro-en-do-cri-nol-o-gy (nōor'ō-ēn'də-krə-nōl'ə-jē, nyōor'-) *n.* The study of the interaction between the nervous system and the endocrine glands and their secretions. —**neu'ro-en'do-cri-no-log'i-cal** (-krīn'ə-lōj'ī-kəl) *adj.* —**neu'ro-en'do-cri-nol'o-gist** *n.*

neu-ro-fi-bril (nōor'ə-fī'brəl, -fīb'rəl, nyōor'-) *n.* Any of the long, thin, microscopic fibrils that run through the body of a neuron and extend into the axon and dendrites. —**neu'ro-fi-bril-lar'y** (-brə-lēr'ē) *adj.*

neu-ro-fi-bro-ma (nōor'ō-fī-brō'mə, nyōor'-) *n.* *pl.* **neu-ro-fi-bro-mas** or **neu-ro-fi-bro-ma-ta** (-mə-tə). A usually benign tumor originating in peripheral nerve fibers and composed chiefly of Schwann cells.

neu-ro-fi-bro-ma-to-sis (nōor'ō-fī'brō-mə-tō'sīs, nyōor'-) *n.* *Abbr.* **NF** A genetic disease characterized by the formation of neurofibromas, sometimes accompanied by physical deformation and a predisposition to brain tumors and various forms of cancer.

neu-ro-fil-a-ment (nōor'ə-fīl'ə-mənt, nyōor'-) *n.* Any of the long, fine threads that make up a neurofibril. —**neu'ro-fil'a-men'tous** (-mēn'təs) *adj.*

neu-ro-gen-e-sis (nōor'ə-jēn'ī-sīs, nyōor'-) *n.* *pl.* **neu-ro-gen-e-ses** (-sēz'). Formation of nervous tissue.

neu-ro-ge-net-ics (nōor'ō-jə-nēt'īks, nyōor'-) *n.* (*used with a sing. verb*). The study of the genetic factors that contribute to the development of neurological disorders.

neu-ro-gen-ic (nōor'ə-jēn'īk, nyōor'-) *adj.* **1.** Originating in the nerves or nervous tissue: *a neurogenic tumor.* **2.** Caused or affected by the nerves or nervous system: *neurogenic disorders.* —**neu'ro-gen'i-cal-ly** *adv.*

neu-ro-g-li-a (nōo-rōg'lē-ə, nyōō-, nōor'ə-glē'ə, -glī'-, nyōor'-) *n.* The delicate network of branched cells and fibers that supports the tissue of the central nervous system. Also called *glia* [NEURO- + Medieval Greek *glia*, glue; see ZOOGLA.] —**neu-ro-g'li-al** *adj.*

neu-ro-hor-mone (nōor'ō-hôr'mōn, nyōor'-) *n.* A hormone secreted by or acting on a part of the nervous system. —**neu'ro-hor-mo'nal** *adj.*

neu-ro-hy-poph-y-sis (nōor'ō-hī-pōf'ī-sīs, -hī-, nyōōr'-) *n. pl.*

neu-ro-hy-poph-y-ses (-sēz'). The posterior portion of the pituitary gland, having a rich supply of nerve fibers and releasing oxytocin and vasopressin.

—**neu'ro-hy'po-phys'e-al**, **neu'ro-hy'po-phys'i-al** (-hī'pə-fiz'ē-əl, -hīp'ə-, -hī-pōf'ə-sē'əl) *adj.*

neurol. *abbr.* Neurology.

neu-ro-lep-tic (nōōr'ə-lēp'tik, nyōōr'-) *n.* A tranquilizing drug, especially one used in treating mental disorders. — *adj.* Having a tranquilizing effect.

[French *neuroleptique*: *neuro-*, nerve (from Greek); see **NEURO-** + *-leptique*, affecting (from Greek *lēptikos*, seizing, from *lēptos*, seized, from *lambanein*, *lēp-*, to seize, take).]

neu-rol-o-gy (nōō-rōl'ə-jē, nyōō-) *n. Abbr. neur., neurol.* The medical science that deals with the nervous system and disorders affecting it. —**neu-**

'ro-log'ic (nōōr'ə-lōj'ik, nyōōr'-), **neu'ro-log'i-cal** (-ī-kəl) *adj.*

—**neu'ro-log'i-cal-ly** *adv.* —**neu-rol'o-gist** *n.*

neu-ro-ma (nōō-rōm'ə, nyōō-) *n. pl. neu-ro-mas* or **neu-ro-ma-ta** (-mə-tə). A tumor composed of nerve tissue.

neu-ro-mus-cu-lar (nōōr'ō-mūs'kyə-lər, nyōōr'-) *adj.* **1.** Of, relating to, or affecting both nerves and muscles. **2.** Having the characteristics of both nervous and muscular tissue.

neu-ron (nōōr'ōn', nyōōr'-) also **neu-rone** (-ōn') *n.* Any of the impulse-conducting cells that constitute the brain, spinal column, and nerves, consisting of a nucleated cell body with one or more dendrites and a single axon. Also called

nerve cell [Greek, sinew, string, nerve. See **(s)neū-** in Appendix.] —**neu'ron-al**

(nōō-rōn'l, nyōō-, nōōr'ə-nəl, nyōōr'-), **neu-ron'ic** *adj.* —**neu-ron'i-cal-ly** *adv.*

neu-ro-pa-thol-o-gy (nōōr'ō-pə-thōl'ə-jē, nyōōr'-) *n.* The scientific study of diseases of the nervous system. —**neu'ro-path'o-log'ic** (-pāth'ə-lōj'ik),

neu'ro-path'o-log'i-cal (-ī-əl) *adj.* —**neu'ro-pa-thol'o-gist** *n.*

neu-rop-a-thy (nōō-rōp'ə-thē, nyōō-) *n. pl. neu-rop-a-thies.* A disease or an abnormality of the nervous system.

neu-ro-phar-ma-col-o-gy (nōōr'ō-fār'mə-kōl'ə-jē, nyōōr'-) *n.* The study of the action of drugs on the nervous system. —**neu'ro-phar'ma-co-log'i-cal**

(-kə-lōj'ī-kəl) *adj.* —**neu'ro-phar'ma-col'o-gist** *n.*

neu-ro-phys-i-ol-o-gy (nōōr'ō-fiz'ē-ōl'ə-jē, nyōōr'-) *n.* The branch of physiology that deals with the functions of the nervous system. —**neu-**

'ro-phys'i-o-log'ic (-ə-lōj'ik), **neu'ro-phys'i-o-log'i-cal** *adj.*

—**neu'ro-phys'i-ol'o-gist** *n.*

neu-ro-psy-chi-a-try (nōōr'ō-sī-kī'ə-trē, -sī-, nyōōr'-) *n. Abbr. NP* The combined medical study of neurological and psychiatric disorders. —**neu'ro-psy-**

chi-at'ric (-sī'kē-āt'rik) *adj.* —**neu'ro-psy-chi'a-trist** *n.*

neu-ro-psy-chol-o-gy (nōōr'ō-sī-kōl'ə-jē, nyōōr'-) *n.* The branch of psychology that deals with the relationship between the nervous system, especially the brain, and cerebral or mental functions such as language, memory, and perception. —**neu'ro-psy'cho-log'i-cal** (-sī'kə-lōj'ī-kəl) *adj.* —**neu-ro-psy-chol'o-gist** *n.*

neu-rop-ter-an (nōō-rōp'tər-ən, nyōō-) *n.* A carnivorous insect of the order Neuroptera, such as the ant lion or dobsonfly, having four net-veined wings and mouthparts adapted for chewing. — *adj.* Of or belonging to the Neuroptera. [From New Latin *Neuroptera*, order name : Greek *neuron*, vein, tendon; see NEURON + Greek *ptera*, pl. of *pteron*, wing; see -PTER.] —**neu-rop'ter-ous** *adj.*

neu-ro-ra-di-ol-o-gy (nōōr'ō-rā'dē-ōl'ə-jē, nyōōr'-) *n.* **1.** The branch of radiology that deals with the nervous system. **2.** The use of x-rays in diagnosis and treatment of disorders of the nervous system. —**neu'ro-ra'di-o-log'i-cal** (-ə-lōj'ī-kəl) *adj.* —**neu'ro-ra'di-ol'o-gist** *n.*

neu-ro-sci-ence (nōōr'ō-sī'əns, nyōōr'-) *n.* Any of the sciences, such as neuroanatomy and neurobiology, that deal with the nervous system. —**neu-ro-sci'en-tif'ic** (-sī'ən-tif'ik) *adj.* —**neu'ro-sci'en-tist** (-sī'ən-tīst) *n.*

neu-ro-se-cre-tion (nōōr'ō-sī-krē'shən, nyōōr'-) *n.* **1.** The secretion of substances, such as hormones, by nerve cells. **2.** A substance secreted by this process. —**neu'ro-se-cre'to-ry** (-krē'tə-rē) *adj.*

neu-ro-sen-so-ry (nōōr'ō-sēn'sə-rē, nyōōr'-) *adj.* Of or relating to the sensory activity or functions of the nervous system: *neurosensory cells.*

neu-ro-sis (nōō-rō'sīs, nyōō-) *n.* *pl.* **neu-ro-ses** (-sēz). Any of various mental or emotional disorders, such as hypochondria or neurasthenia, arising from no apparent organic lesion or change and involving symptoms such as insecurity, anxiety, depression, and irrational fears.

neu-ro-sur-ger-y (nōōr'ō-sūr'jə-rē, nyōōr'-) *n.* *pl.* **neu-ro-sur-ger-ies.** Surgery on any part of the nervous system. —**neu'ro-sur'geon** (-jən) *n.* —**neu-ro-sur'gi-cal** (-jī-kəl) *adj.*

neu-rot-ic (nōō-rōt'ik, nyōō-) *adj.* **1.** Of, relating to, derived from, or affected with a neurosis: *a neurotic disorder; neurotic symptoms.* **2. Informal.** Overanxious: *neurotic about punctuality.* — *n.* **1.** A person suffering from a neurosis. **2. Informal.** A person prone to excessive anxiety and emotional upset. —**neu-rot'i-cal-ly** *adv.*

neu-rot-o-my (nōō-rōt'ə-mē, nyōō-) *n.* *pl.* **neu-rot-o-mies.** The surgical cutting or stretching of a nerve, usually to relieve pain.

neu-ro-tox-in (nōōr'ō-tōk'sin, nyōōr'-) *n.* A toxin that damages or destroys nerve tissue. —**neu'ro-tox'ic** (-tōk'sik) *adj.* —**neu'ro-tox-ic'i-ty** (-tōk-sis'ī-tē) *n.*

neu-ro-trans-mit-ter (nōōr'ō-trāns'mīt-ər, -trānz'-, nyōōr'-) *n.* A chemical substance, such as acetylcholine or dopamine, that transmits nerve impulses across a synapse.

neu-ro-trop-ic (nōōr'ə-trōp'īk, -trō'pīk, nyōōr'-) *adj.* Tending to affect or attack nervous tissue: *a neurotropic venom.* —**neu-rot'ro-pism** (nōō-rōt'rə-pīz'əm, nyōō-) *n.*

neus-ton (nōō'stōn, nyōō'-) *n.* The collection of minute or microscopic organisms that inhabit the surface layer of a body of water. [Greek *neuston*, neuter of *neustos*, swimming, from *nein*, to swim. See **(s)nāu-** in Appendix.]

Neuse (nōōs, nyōōs) A river of east-central North Carolina flowing about 442 km (275 mi) generally southeast to Pamlico Sound.

Neuss (nois) A city of west-central Germany across the Rhine River from Düsseldorf. Built on the site of a Roman camp, it was chartered in the 12th century and held by France from 1794 to 1815, when it passed to Prussia. Population, 143,762.

Neus-tri-a (nōō'strē-ə, nyōō'-) The western part of the kingdom of the Merovingian Franks from the sixth to the eighth century, in present-day northwest France. It engaged in almost constant warfare with Austrasia, the eastern portion of the realm. After 912 the name was applied to Normandy. —**Neu'stri-an** *adj.* & *n.*

neut. *abbr.* **1.** Neuter. **2.** Neutral.

neu-ter (nōō'tər, nyōō'-) *adj.* *Abbr. neut.* **1. Grammar. a.** Neither masculine nor feminine in gender. **b.** Neither active nor passive; intransitive. Used of verbs. **2. a. Biology.** Having undeveloped or imperfectly developed sexual organs: *the neuter caste in social insects.* **b. Botany.** Having no pistils or stamens; asexual. **c. Zoology.** Sexually undeveloped. **3.** Taking no side; neutral. — *n.*

1. Grammar. a. The neuter gender. **b.** A neuter word. **c.** A neuter noun. **2.** A castrated animal. **3.** A sexually undeveloped or imperfectly developed insect, such as a worker bee. **4.** A plant without stamens or pistils. **5.** One that is neutral. — *v. tr. neu-tered, neu-ter-ing, neu-ters.* To castrate or spay. [Middle English *neutre*, from Old French, from Latin *neuter*, neither, neuter : *ne-*, not; see **ne** in Appendix + *uter*, either; see **k^wo-** in Appendix.]

neu-tral (nōō'trəl, nyōō'-) *adj.* *Abbr. neut.* **1.** Not aligned with, supporting, or favoring either side in a war, dispute, or contest. **2.** Belonging to neither side in a controversy: *on neutral ground.* **3.** Belonging to neither kind; not one thing or the other; indifferent. **4.** Sexless; neuter. **5. Chemistry. a.** Of or relating to a solution or compound that is neither acidic nor alkaline. **b.** Of or relating to a compound that does not ionize in solution. **6. Physics. a.** Of or relating to a particle, an object, or a system that has neither positive nor negative electric charge. **b.** Of or relating to a particle, an object, or a system that has a net electric charge of zero. **7. Color.** Of or indicating a color, such as gray, black, or white, that lacks

hue; achromatic. **8. Linguistics.** Pronounced with the tongue in a middle position, neither high nor low, as the *a* in *around*. — *n.* **1. a.** A nation nonaligned with either side in a war. **b.** A citizen of such a nation. **2.** One who takes no side in a controversy: “*I am by disposition one of life’s neutrals, a human Switzerland*” (John Gregory Dunne). **3. Color.** A neutral hue. **4.** A position in which a set of gears is disengaged so that power cannot be transmitted. [Middle English *neutral*, from Old French *neutral*, from Latin *neutrālis*, grammatically neuter, from *neuter*, *neutr-*. See NEUTER.] —**neu’tral-ly** *adv.*

Neu-tral (nōō’trəl, nyōō’-) *n. pl.* **Neutral** or **Neu-trals**. **1.** A confederacy of Iroquoian-speaking Native American peoples formerly inhabiting the northern shore of Lake Erie. The Neutral were destroyed by the Iroquois in the mid-17th century. **2.** A member of this people.

neutral ground (nōō’trəl ground) *n.* *Louisiana & Southern Mississippi.* See **median strip**.

REGIONAL NOTE: The strip of grass dividing the opposing lanes of an avenue or a highway is known by a variety of terms in the United States. The most common term is *median strip* or *median*. In upstate New York it is called a *mall*, and in Pennsylvania, a *medial strip*. In the Upper Midwest the strip is known as a *meridian*, a *boulevard*, or a *boulevard strip*. In Louisiana and southern Mississippi the term used is *neutral ground*—“as if the highway were a battle zone,” observes Craig M. Carver in *American Regional Dialects*.

neu-tral-ism (nōō’trə-līz’əm, nyōō’-) *n.* **1.** The state of being neutral; neutrality. **2.** A political policy or advocacy of nonalignment or noninvolvement in conflicting alliances and of attempting to mediate or conciliate in conflicts between states: “*Neutralism differs from neutrality in that it is an attitude of mind in time of peace rather than a legal status in time of war*” (London Times). —**neu’tral-ist** *adj.*, *n.* —**neu’tral-is’tic** *adj.*

neu-tral-i-ty (nōō-trəl’ī-tē, nyōō-) *n.* The state or policy of being neutral, especially nonparticipation in war.

neu-tral-i-za-tion (nōō’trə-lī-zā’shən, nyōō’-) *n.* **1. a.** The act or process of neutralizing. **b.** The state or quality of being neutralized. **2. Chemistry.** A reaction between an acid and a base that yields a salt and water.

neu-tral-ize (nōō’trə-līz’, nyōō’-) *v. tr.* **neu-tral-ized**, **neu-tral-iz-ing**, **neu-tral-iz-es**. **1.** To make neutral. **2.** To counterbalance or counteract the effect of; render ineffective. **3.** To declare neutral and therefore inviolable during a war. **4. Chemistry. a.** To make (a solution) neutral. **b.** To cause (an acid or a base) to undergo neutralization. **5. Medicine.** To counteract the effect of (a drug or toxin). **6. Slang.** To remove as a threat, especially by killing. —**neu’tral-iz’er** *n.*

SYNONYMS: *neutralize, negate, nullify, counteract.* These verbs mean to make something ineffective by or as if by applying an opposite or counterbalancing force. *Neutralize* implies a state of ineffectiveness, inaction, or inoperativeness: “*American life is a powerful solvent. It seems to neutralize every intellectual element... and to fuse it in the native good will, complacency, thoughtlessness, and optimism*” (George Santayana). *Negate* and *nullify* suggest cancellation of validity, force, usefulness, value, consequence, or significance: *Terror momentarily negated the effects of his injury. “The [15th] Amendment nullifies sophisticated as well as simple-minded modes of discrimination”* (Felix Frankfurter). *Counteract* frequently implies the opposition of forces thought of as being desirable and undesirable; it may suggest action taken as a corrective measure: *The prime minister addressed the nation in an effort to counteract the damage the scandal had done to his credibility.*

neutral spirits (nōō'trəl spīr'its) *pl.n.* (used with a *sing.* or *pl. verb*). Ethyl alcohol distilled at or above 190 proof and used frequently in blended alcoholic beverages.

neu·tri·no (nōō-trē'nō, nyōō-) *n. pl. neu·tri·nos.* Any of three electrically neutral subatomic particles in the lepton family. [Italian, from *neutro*, neuter, from Latin *neuter*, *neutr-*. See NEUTER.]

neu·tron (nōō'trōn', nyōō'-) *n. Abbr. n* An electrically neutral subatomic particle in the baryon family, having a mass 1,839 times that of the electron, stable when bound in an atomic nucleus, and having a mean lifetime of approximately 1.0×10^3 seconds as a free particle. It and the proton form nearly the entire mass of atomic nuclei. [NEUTR(AL) + -ON¹.]

neutron bomb (nōō'trōn' bōm) *n.* A nuclear bomb that would produce great numbers of neutrons but little blast and thus destroy life but spare property.

neutron star (nōō'trōn' stār) *n.* A celestial body hypothesized to occur in a terminal stage of stellar evolution, essentially consisting of a superdense mass of neutrons and having a powerful gravitational attraction from which only neutrinos and high-energy photons can escape, thus rendering the body invisible except to x-ray detection.

neu·tro·phil (nōō'trə-fīl', nyōō'-) *adj.* Not stained strongly or definitely by either acid or basic dyes but stained readily by neutral dyes. Used especially of white blood cells. — *n.* A neutrophil cell, especially an abundant type of granular white blood cell that is highly destructive of microorganisms. [NEUTR(AL) + PHIL(E).] — **neu'tro·phile'** (-fīl'), **neu'tro·phil'ic** (-fīl'ik) *adj.*

Neu·wied (noi-vēd', -vēt') A city of west-central Germany on the Rhine River southeast of Bonn. It developed around a palace built in 1648. Population, 58,795.

Nev. *abbr.* Nevada.

Ne·va (nē'və, nyī-vä') A river of northwest Russia flowing about 74 km (46 mi) from Lake Ladoga to the Gulf of Finland, an arm of the Baltic Sea.

Ne·vad·a (nə-văd'ə, -vā'də) *Abbr. NV, Nev.* A state of the western United States. It was admitted as the 36th state in 1864. Part of the area ceded by Mexico to the United States in 1848, it was made into a separate territory in 1861 after an influx of settlers who were drawn by the discovery (1859) of the Comstock Lode. Carson City is the capital and Las Vegas the largest city. Population, 1,206,152.
—**Ne·vad'an, Ne·vad'i-an** *adj. & n.*

né·vé (nā-vā') *n.* **1.** The upper part of a glacier where the snow turns into ice. **2. a.** A snow field at the head of a glacier. **b.** The granular snow typically found in such a field. [French, from French dialectal *névi*, from Vulgar Latin **nivātum*, from neuter of Latin *nivātus*, cooled by snow, from *nix*, *niv-*, snow.]

Nev·el·son (něv'əl-sən), **Louise.** 1899-1988. Russian-born American sculptor whose massive works, often of wood, cast metal, and found objects, are characterized by complex and rhythmic abstract shapes.

nev·er (něv'ər) *adv.* **1.** Not ever; on no occasion; at no time: *He had never been there before. You never can be sure.* **2.** Not at all; in no way; absolutely not: *Never fear. That will never do.* [Middle English, from Old English *nāfre*: *ne*, not; see **ne** in Appendix + *āfre*, ever; see **aiw-** in Appendix.]

nev·er·end·ing (něv'ər-ən'diŋ) *adj.* Having no foreseeable end: *the never-ending search for happiness.*

nev·er·more (něv'ər-mōr', -mōr') *adv.* Never again.

nev·er·nev·er land (něv'ər-něv'ər lænd) *n.* An imaginary and wonderful place; a fantasy land. [After *Never-Never Land*, fictional setting used in the play *Peter Pan* by J.M. Barrie.]

nev·er·the·less (něv'ər-thə-lēs') *adv.* In spite of that; nonetheless; however: *a small, nevertheless fatal error.*

Nev·ins (něv'inz), **Allan.** 1890-1971. American historian noted for his political biographies and *The Ordeal of the Union* (1947-1971), a history of the U.S. Civil War.

Ne·vis (nē'vīs, něv'is) One of the Leeward Islands of the eastern West Indies in the Caribbean Sea. Discovered by Columbus in 1493, it was colonized by the English after 1628 and is now part of St. Christopher-Nevis.

ne·vus (nē'vəs) *n. pl. ne·vi* (-vī'). A congenital growth or mark on the skin, such as a mole or birthmark. [Latin *naevus*.] —**ne·void'** (-void') *adj.*

new (nō, nyō) *adj.* **new·er, new·est.** **1.** Having been made or come into being only a short time ago; recent: *a new law.* **2. a.** Still fresh: *a new coat of paint.* **b.** Never used or worn before now: *a new car; a new hat.* **3.** Just found, discovered, or learned: *new information.* **4.** Not previously experienced or encountered; novel or unfamiliar: *ideas new to her; visiting new places.*

5. Different from the former or the old: *the new morality*. **6.** Recently obtained or acquired: *new political power; new money*. **7.** Additional; further: *new sources of energy*. **8.** Recently arrived or established in a place, position, or relationship: *new neighbors; a new president*. **9.** Changed for the better; rejuvenated: *The nap has made a new person of me*. **10.** Being the later or latest in a sequence: *a new edition*. **11.** Currently fashionable: *a new dance*. **12. New.** In the most recent form, period, or development. **13.** Inexperienced or unaccustomed: *new at the job; new to the trials of parenthood*. — *adv.* Freshly; recently. Often used in combination: *new-mown*. [Middle English *newe*, from Old English *nīwe*, *nēowe*. See **newo-** in Appendix.] —**new/ness** *n.*

SYNONYMS: *new, fresh, novel, newfangled, original.* These adjectives describe what has existed for only a short time, has only lately come into use, or has only recently arrived at a state or position, as of prominence. *New* is the most general: *a new movie; new clothes; a new friend; a new popular hero*. “*It is time for a new generation of leadership, to cope with new problems and new opportunities. For there is a new world to be won*” (John F. Kennedy). Something *fresh* has or has retained qualities of newness such as briskness, brightness, or purity: *The police found fresh fingerprints on the light switch. Identifying the virus gave scientists fresh hope of discovering a vaccine.* *Novel* applies to what is both new and strikingly unusual: “*The Spaniards were astonished at these novel maneuvers [by musketeers on skates] upon the ice*” (John Lothrop Motley). *Newfangled* suggests that something is needlessly novel; the term is often derogatory: “*the newfangled doctrine of utility*” (John Galt). Something that is *original* is novel and the first of its kind: “*The science of pure mathematics, in its modern development, may claim to be the most original creation of the human spirit*” (Alfred North Whitehead).

news (nōōz, nyōōz) *pl.n.* (used with a *sing. verb*). **1. a.** Information about recent events or happenings, especially as reported by newspapers, periodicals, radio, or television. **b.** A presentation of such information, as in a newspaper or on a newscast. **2.** New information of any kind: *The requirement was news to him.* **3.** Newsworthy material: “a public figure on a scale unimaginable in America; whatever he did was news” (James Atlas). [Middle English *newes*, new things, tidings, pl. of *newe*, new thing, new. See **NEW**.] —**news/less** *adj.*

SYNONYMS: *news, advice, intelligence, tidings, word.* The central meaning shared by these nouns is “information about hitherto unknown events and happenings”: *just heard the good news; sent advice that the mortgage would be foreclosed; a source of intelligence about the negotiations; tidings of victory; received word*

of the senator's death.

WORD HISTORY: If you take the first letters of the directions North, East, West, and South, it is true that you have the letters of the word *news*, but it is not true that you have the etymology of *news*, contrary to what has often been thought. The history of the word is much less clever than this and not at all unexpected. *News* is simply the plural of the noun *new*, which we use, for example, in the adage “Out with the old, in with the new.” The first recorded user of this plural to mean “tidings” may have been James I of Scotland; a work possibly written by him around 1437 contains the words “Awak... I bring The [thee] newis [news] glad.” It is pleasant to see that the first news was good. However, his descendant James I of England is the first person recorded (1616) to have said “No newis is better than evill newis,” or as we would put it, “No news is good news.”

Nin (nĕn, nĭn), **Anaïs**. 1903-1977. French-born American writer and diarist known for her novels, including *Winter of Artifice* (1939), and *The Diary of Anaïs Nin 1931-1966* (published 1966-1980).

nin-com-poop (nĭn'kəm-pōōp', nĭng'-) *n.* A person regarded as silly, foolish, or stupid. [Origin unknown.] —**nin'com-poop'er-y** *n.*

nine (nĭn) *n.* **1.** The cardinal number equal to 8 + 1. **2.** The ninth in a set or sequence. **3.** Something having nine parts, units, or members. **4. Games.** A playing card marked with nine pips. **5.** A set of nine persons or things, especially: **a. Baseball.** The nine players on a side, or the whole team. **b. Nine. Greek Mythology.** The nine Muses. **6.** A size, as in clothing or shoes, designated as nine. **7. Sports.** The first or second 9 holes of an 18-hole golf course. —**idiom. to the nines.** *Informal.* To the highest degree: *dressed to the nines*. [Middle English, from Old English *nigon*. See **newŋ** in Appendix.] —**nine** *adj. & pron.*

nine-band-ed armadillo (nĭn'băn'dĭd ār'mə-dĭl'ō) *n.* The most common species of armadillo, *Dasyus novemcinctus*, usually having nine jointed bands of bony plates. The females give birth to quadruplets from one egg.

nine-bark (nĭn'bărk') *n.* Any of several shrubs of the genus *Physocarpus*, especially *P. opulifolius* of eastern North America, having peeling or shredding bark and clusters of small white flowers. [From the many layers in its bark.]

nine days' wonder (nĭn dāz wŭn'dər) *n.* A thing or an event that creates a brief sensation.

nine-pin (nĭn'pĭn') *n. Sports. 1. ninepins.* (*used with a sing. or pl. verb*). A bowling game in which nine wooden pins are the target. **2.** A wooden pin used in the game of ninepins.

nine-teen (nĭn-tĕn') *n.* **1.** The cardinal number equal to 18 + 1. **2.** The 19th in a set or sequence. [Middle English *nintene*, from Old English *nigontēne*. See **newŋ** in Appendix.] —**nine-teen'** *adj. & pron.*

nine-teenth (nĭn-tĕnth') *n.* **1.** The ordinal number matching the number 19 in a series. **2.** One of 19 equal parts. —**nine-teenth'** *adv. & adj.*

nine-ti-eth (nĭn'tĕ-ĭth) *n.* **1.** The ordinal number matching the number 90 in a series. **2.** One of 90 equal parts. —**nine'ti-eth** *adv. & adj.*

nine-to-fiv-er (nĭn'tə-fĭv'ər) *n.* One who works regular daytime hours, as in an office.

nine-ty (nĭn'tĕ) *n. pl. nine-ties. 1.* The cardinal number equal to 9 × 10. **2. nineties. a.** Often **Nineties**. The decade from 90 to 99 in a century. **b.** A decade or the numbers from 90 to 99: *My grandparents are in their nineties. Dur-*

ing the heat wave, the temperature stayed in the nineties. [Middle English *ninti*, from Old English *nigontig*. See **newn** in Appendix.] —**nine/ty** *adj.* & *pron.*

Nin-e-veh (nɪn'ə-və) An ancient city of Assyria on the Tigris River opposite the site of present-day Mosul, Iraq. As capital of the Assyrian Empire, it enjoyed great influence and prosperity, especially under Sennacherib and Ashurbanipal (seventh century B.C.). The city was captured and destroyed by Babylonia and its allies in 612 B.C.

Ning-bo (nɪŋ'bo) also **Ning-po** (-pō) A city of eastern China east-southeast of Hangzhou on Hangzhou Bay. Built on a site occupied since the eighth century, it was used as a trading post by the Portuguese from 1520 to 1545 and became a treaty port in 1842. Population, 350,000.

Ning-xia Hui-zu (nɪŋ'shyä' hwē'dzō) also **Ning-sia Hui** (hwē) An autonomous region of northern China. Formerly a province, it was incorporated into Gansu in 1954 but reconstituted as a region in 1958. Yinchuan is the capital. Population, 4,150,000.

nin-ja (nɪn'jə) *n. pl. ninja* or **nin-jas**. A member of a class of 14th-century Japanese mercenary agents who were trained in the martial arts and hired for covert operations such as assassination and sabotage. — *n. attributive*. Often used to modify another noun: *ninja weapons*. [Japanese : *nin*, to endure + *ja*, person.]

nin-ny (nɪn'ē) *n. pl. nin-nies*. A fool; a simpleton. [Perhaps alteration of INNOCENT.]

Ni-ño (nēn'yō) *n.* El Niño.

ni-non (nē'nōn') *n.* A sheer fabric of silk, rayon, or nylon made in a variety of tight smooth weaves or open lacy patterns. [Probably from French *Ninon*, nickname for *Anne*.]

ninth (nɪnth) *n.* **1.** The ordinal number matching the number nine in a series. **2.** One of nine equal parts. **3. Music. a.** A harmonic or melodic interval of an octave and a second. **b.** The tone at the upper limit of such an interval. **c.** A chord consisting of a root with its third, seventh, and ninth. [Middle English *ninthe*, from Old English *nigonthe*, from *nigon*, nine. See **newn** in Appendix.] —**ninth** *adv.* & *adj.*

Ni-o-be (nī'ə-bē) *n.* *Greek Mythology.* The daughter of Tantalus who turned to stone while bewailing the loss of her children.

ni-o-bite (nī'ə-bīt') *n.* Columbite. [NIOB(IUM) + -ITE¹.]

ni-o-bi-um (nī-ō'bē-əm) *n.* *Symbol Nb* A silvery, soft, ductile metallic element that occurs chiefly in columbite-tantalite and is used in steel alloys, arc welding, and superconductivity research. Atomic number 41; atomic weight 92.906; melting point 2,468°C; boiling point 4,927°C; specific gravity 8.57; valence 2, 3, 5. [After NIOBE (so called because it is extracted from tantalite).]

Ni·o·brar·a (nī'ə-brār'ə) A river, about 692 km (430 mi) long, rising in eastern Wyoming and flowing generally eastward to the Missouri River in northeast Nebraska.

Niort (nyôr) A city of western France southeast of Nantes. Originally a Gallo-Roman town, it was a stronghold of the Huguenots in the 16th and 17th centuries. Population, 58,203.

nip¹ (nĭp) *v.* **nipped, nip-ing, nips.** — *v. tr.* **1.** To seize and pinch or bite: *The fish nipped the wader's toe.* **2.** To remove or sever by pinching or snipping: *nipped off the plant leaf.* **3.** To bite or sting with the cold; chill. **4.** To check or cut off the growth or development of: *a conspiracy that was nipped in the bud by the police.* See Synonyms at **blast.** **5.** *Slang.* **a.** To snatch up hastily. **b.** To take (the property of another) unlawfully; steal. — *v. intr.* *Chiefly British.* To move quickly; dart. — *n.* **1.** The act or an instance of seizing or pinching. **2. a.** A pinch or snip that cuts off or removes a small part: *He gave a small nip to each corner of the cloth.* **b.** The small bit or portion so removed: *There were nips of construction paper all over the child's table.* **3. a.** A sharp, stinging quality, as of frosty air. **b.** Severely sharp cold or frost. **4.** A cutting remark. **5.** A sharp, biting flavor; a tang: *the nip of Mexican salsa.* [Middle English *nippen*, perhaps from Middle Dutch *nipen*.]

nip² (nĭp) *Informal. n.* A small amount of liquor. — *v.* **nipped, nip-ping, nips.** — *v. tr.* To sip (alcoholic liquor) in small amounts: *had been nipping brandy.* — *v. intr.* To take a sip or sips of alcoholic liquor: *nips all day long.* [Probably short for *nipperkin*, of Dutch or Low German origin.]

ni·pa (nē'pə) *n.* **1.** A large palm (*Nipa frutescens*) of the Philippines and Australia, having long leaves often used for thatching. **2.** An alcoholic beverage made from the sap of this plant. [New Latin, from Malay *nipah*.]

nip and tuck (nĭp ənd tük) *adv. & adj.* So close that the advantage or lead shifts from one to another and is virtually indeterminable; neck and neck.

Nip·i·gon (nĭp'ĭ-gŏn'), **Lake.** A lake of southwest-central Ontario, Canada, north of Lake Superior. It is a popular resort center.

Nip·is·sing (nĭp'ĭ-sĭng'), **Lake.** A lake of southeast Ontario, Canada, between the Ottawa River and Georgian Bay.

nip·per (nĭp'ər) *n.* **1.** A tool, such as pliers or pincers, used for squeezing or nipping. Often used in the plural. **2.** A pincerlike part, such as the large claw of a crustacean. **3.** *Chiefly British.* A small boy.

nip·ping (nĭp'ĭng) *adj.* **1.** Sharp and biting, as the cold. **2.** Bitingly sarcastic. —**nip'ping·ly** *adv.*

nip·ple (nĭp'əl) *n.* **1.** The small projection near the center of the mammary gland containing the outlets of the milk ducts through which young mammals obtain milk from the adult female; a teat. **2. a.** The rubber cap on a bottle from which a baby nurses. **b.** A pacifier for an infant. **3.** Any of various devices func-

tioning like or resembling a nipple, especially: **a.** A regulated opening for discharging a liquid, as in a small stopcock. **b.** A pipe coupling threaded on both ends. **c.** A short extension of pipe to which a nozzle can be attached. **d.** A small projection through which grease in a grease gun can be forced into a bearing. **4.** A natural or geographic projection resembling a nipple, as a mountain crest. [From obsolete *neble*, diminutive of NEB.]

nip-ple-wort (nĭp'əl-wŭrt', -wŏrt') *n.* A European annual plant (*Lapsana communis*) naturalized in eastern North America, having a milky juice and small yellow flower heads. [From its former use in folk medicine to treat breast tumors.]

Nip-pon (nĭ-pŏn', nĭp'ŏn, nē-pŏn') Japan. The name was derived from the Chinese characters for “the place where the sun comes from,” or the Land of the Rising Sun.

Nip-pon-ese (nĭp'ə-nēz', -nēs') *adj.* & *n.* Japanese.

Nip-pur (nĭ-pŏŏr') An ancient city of Babylonia on the Euphrates River southeast of Babylon. It was an important religious center in Sumerian times.

nip-py (nĭp'ē) *adj.* **nip-pi-er, nip-pi-est.** **1.** Tending to nip: *an exuberant, nippy puppy.* **2.** Sharp or biting: *nippy cheese.* **3.** Bitingly cold: *a nippy fall day.* —**nip/pi-ly** *adv.* —**nip/pi-ness** *n.*

nip-up (nĭp'ŭp') *n.* *Sports.* An acrobatic spring from a supine to an upright position.

N.Ire. *abbr.* Northern Ireland.

Nir-en-berg (nĭr'ĭn-bŭrg'), **Marshall Warren.** Born 1927. American biochemist. He shared a 1968 Nobel Prize for the study of genetic codes.

nir·va·na (nĭr-vă'nə, nə-) *n.* **1.** Often **Nirvana.** **a.** *Buddhism.* The ineffable ultimate in which one has attained disinterested wisdom and compassion. **b.** *Hinduism.* Emancipation from ignorance and the extinction of all attachment. **2.** An ideal condition of rest, harmony, stability, or joy. [Sanskrit *nirvāṇam*, a blowing out, extinction, nirvana : *nis-*, *nir-*, out, away + *vāti*, it blows; see **wē-** in Appendix.]

Niš also **Nish** (nĭsh) A city of southeast Serbia near the Bulgarian border. The birthplace of Constantine the Great, it was held at various times by Bulgarians, Hungarians, Turks, and Serbians. Population, 151,600.

Ni-san (nĭs'ən, nē-sän') *n.* The seventh month of the year in the Jewish calendar. See Table at **calendar.** [Hebrew *nīsān*, from Akkadian *nissanu*, the first month of the year, from Sumerian *nisag*, first fruits.]

Ni-sei (nē-sā', nē'sā') *n. pl.* **Nisei** or **Ni-seis.** A person born in America of parents who emigrated from Japan. [Japanese : *ni*, second + *sei*, generation.]

Nish (nĭsh) See **Niš.**

Ni-shi-no-mi-ya (nīsh'ə-nō'mē-ä, nē'shē-nô'mē-yä') A city of southern Honshu, Japan, on Osaka Bay east of Kobe. It is a resort and an industrial center. Population, 421,267.

ni-si (nī'sī') *adj.* *Law.* Taking effect at a specified date unless cause is shown for modification or nullification: *a decree nisi*. [Latin *nīsī*, unless. See **ne** in Appendix.]

Nis-ka-yu-na (nīskə-yōō'nə) An unincorporated community of east-central New York, a suburb between Albany and Schenectady. There are research laboratories in the town. Population, 17,471.

Nis-sen hut (nī'sən hŭt) *n.* A prefabricated building of corrugated steel in the shape of a half cylinder, used especially by military personnel as a shelter. [After Peter Norman Nissen (1871-1930), British army officer and mining engineer.]

ni-sus (nī'səs) *n. pl. nisus.* An effort or endeavor to realize an aim. [Latin *nīsus*, from past participle of *nītī*, to strive.]

nit¹ (nīt) *n.* The egg or young of a parasitic insect, such as a louse. [Middle English, from Old English *hnitu*.] —**nit'ty** *adj.*

nit² (nīt) *n.* A unit of illuminative brightness equal to one candle per square meter, measured perpendicular to the rays of the source. [From Latin *nitōr*, brightness, from *nitēre*, to shine.]

NIT *abbr.* **1.** National Intelligence Test. **2.** *Sports.* National Invitational Tournament.

ni-ter (nī'tər) *n.* A white, gray, or colorless mineral of potassium nitrate, KNO_3 , used in making gunpowder. Also called *saltpetter* [Middle English *nitre*, sodium carbonate, natron, from Old French, from Latin *nitrum*, from Greek *nitron*, from Egyptian *ntr*.]

Ni-te-roi (nē'tə-roī') A city of southeast Brazil on Guanabara Bay opposite Rio de Janeiro. Founded in 1671, it is a residential and industrial center. Population, 382,736.

nit-pick (nīt'pīk') *v. intr. nit-picked, nit-pick-ing, nit-picks.* To be concerned with or find fault with insignificant details. See Synonyms at **quibble**. —**nit'pick'er** *n.*

nit-pick-ing (nīt'pīk'īng) *n.* Minute, trivial, unnecessary, and unjustified criticism or faultfinding.

nit- *pref.* Variant of **nitro-**.

Ni-tra (nē'trə) A city of western Slovakia on the **Nitra River**, a tributary of the Danube. Dating from Roman times, Nitra was a religious center after the ninth century and became a free city in 1248. Population, 83,338.

ni-trate (nī'trāt', -trīt) *n.* **1.** The univalent radical NO_3 or a compound containing it, as a salt or an ester of nitric acid. **2.** Fertilizer consisting of sodium nitrate or potassium nitrate. — *v. tr. ni-trat-ed, ni-trat-ing, ni-trates.* To treat with

nitric acid or a nitrate, usually to change (an organic compound) into a nitrate.

—**ni-tra'tion** *n.* —**ni'tra'tor** *n.*

nitrate bacterium (nī'trāt' bāk-tîr'ē-əm) *n.* Any of several nitrobacteria that convert nitrites to nitrates by oxidation. Also called *nitric bacterium*

ni-tre (nī'tər) *n.* Chiefly British. Variant of **niter**.

ni-tric (nī'trĭk) *adj.* Of, derived from, or containing nitrogen, especially in a valence state higher than that in a comparable nitrous compound.

nitric acid (nī'trĭk äs'ĭd) *n.* A transparent, colorless to yellowish, fuming corrosive liquid, HNO_3 , a highly reactive oxidizing agent used in the production of fertilizers, explosives, and rocket fuels and in a wide variety of industrial metallurgical processes. Also called *aqua fortis*

nitric bacterium (nī'trĭk bāk-tîr'ē-əm) *n.* See **nitrate bacterium**.

nitric oxide (nī'trĭk ök'sĭd') *n.* A colorless, poisonous gas, NO , produced as an intermediate during the manufacture of nitric acid from ammonia or atmospheric nitrogen.

ni-tride (nī'trĭd') *n.* A compound containing nitrogen with another more electropositive element, such as phosphorus or a metal.

ni-tri-fy (nī'trə-fĭ') *v. tr.* **ni-tri-fied, ni-tri-fy-ing, ni-tri-fies.** **1.** To oxidize (an ammonia compound) into nitric acid, nitrous acid, or any nitrate or nitrite, especially by the action of nitrobacteria. **2.** To treat or combine with nitrogen or compounds containing nitrogen. —**ni'tri-fi-ca'tion** (-fĭ-kā'shən) *n.*

—**ni'tri-fi'er** *n.*

ni-trile also **ni-tril** (nī'trəl) *n.* An organic cyanide containing a CN group.

[NITR(O)- + *-ile*, chemical suff. (probably variant of *-YL*).]

ni-trite (nī'trĭt') *n.* The univalent radical NO_2 or a compound containing it, such as a salt or an ester of nitrous acid.

nitrite bacterium (nī'trĭt' bāk-tîr'ē-əm) *n.* Any of several nitrobacteria that convert ammonia to nitrites by oxidation. Also called *nitrous bacterium*

nitro- or **nitr-** *pref.* **1.** Nitrate; niter: *nitrobacterium*. **2. a.** Nitrogen: *nitriole*.

b. Containing the univalent group NO_2 : *nitromethane*. [New Latin, from Latin *nitrum*, natron. See NITER.]

ni-tro-bac-te-ri-um (nī'trō-bāk-tîr'ē-əm) *n. pl. ni-tro-bac-te-ri-a* (-tîr'ē-ə).

Any of various soil bacteria that take part in the nitrogen cycle, oxidizing ammonium compounds into nitrites or nitrites into nitrates.

ni-tro-ben-zene (nī'trō-bĕn'zĕn', -bĕn-zĕn') *n.* A poisonous organic compound, $\text{C}_6\text{H}_5\text{NO}_2$, either bright yellow crystals or an oily liquid, having the odor of almonds and used in the manufacture of aniline, insulating compounds, and polishes.

ni-tro-cel-lu-lose (nī'trō-sĕl'yə-lōs', -lōz') *n.* A pulpy or cottonlike polymer derived from cellulose treated with sulfuric and nitric acids and used in the man-

ufacture of explosives, collodion, plastics, and solid monopropellants. Also called *guncotton*, *cellulose nitrate*. —**ni'tro-cel'lu-los'ic** (-lō'sīk, -zīk) *adj.*

ni·tro·chlo·ro·form (nī'trō-klōr'ə-fōrm', -klōr'-) *n.* See **chloropicrin**.

ni·tro·fu·ran (nī'trō-fyōōr'än', -fyōō-rän') *n.* Any of several drugs derived from furan that are used to inhibit bacterial growth.

ni·tro·fur·an·to·in (nī'trō-fyōō-rän'tō-īn) *n.* A derivative of nitrofuran, $C_8H_6N_4O_5$, used in the treatment of bacterial infections of the urinary tract. [NITROFURAN + (*hydantoin*), a chemical compound; see DIPHENYLHYDANTOIN.]

ni·tro·gen (nī'trə-jən) *n.* *Symbol N* A nonmetallic element that constitutes nearly four fifths of the air by volume, occurring as a colorless, odorless, almost inert diatomic gas, N_2 , in various minerals and in all proteins and used in a wide variety of important manufactures, including ammonia, nitric acid, TNT, and fertilizers. Atomic number 7; atomic weight 14.0067; melting point $-209.86^\circ C$; boiling point $-195.8^\circ C$; valence 3, 5. [French *nitrogène*: *nitro-*, nitric acid (from New Latin); see NITRO- + *-gène*, *-gen*.] —**ni-trog'e-nous** (nī-trōj'ə-nəs) *adj.*

ni-trog·e·nase (nī-trōj'ə-nās', -nāz', nī'trə-jə-) *n.* An enzyme of nitrogen-fixing bacteria that activates the conversion of nitrogen to ammonia.

nitrogen balance (nī'trə-jən bäl'əns) *n.* The difference between the amount of nitrogen taken into the body or the soil and the amount excreted or lost.

nitrogen cycle (nī'trə-jən sī'kəl) *n.* **1. Ecology.** The circulation of nitrogen in nature, consisting of a cycle of chemical reactions in which atmospheric nitrogen is compounded, dissolved in rain, and deposited in the soil, where it is assimilated and metabolized by bacteria and plants, eventually returning to the atmosphere by bacterial decomposition of organic matter. **2. Physics.** See **carbon-nitrogen cycle**.

nitrogen dioxide (nī'trə-jən dī-ōk'sīd) *n.* A poisonous brown gas, NO_2 , often found in smog and automobile exhaust fumes and synthesized for use as a nitrating agent, a catalyst, and an oxidizing agent.

nitrogen fixation (nī'trə-jən fīk-sā'shən) *n.* **1.** The conversion of atmospheric nitrogen into compounds, such as ammonia, by natural agencies or various industrial processes. **2.** The conversion by certain soil microorganisms, such as rhizobia, of atmospheric nitrogen into compounds that plants and other organisms can assimilate. —**ni'tro-gen-fix'er** (nī'trə-jən-fīk'sər) *n.*

—**ni'tro-gen-fix'ing** *adj.*

ni-trog·en·ize (nī-trōj'ə-nīz', nī'trə-jə-) *v. tr.* **ni-trog·en·ized, ni-trog·en·iz·ing, ni-trog·en·iz·es.** To combine or treat with nitrogen or a nitrogen compound.

nitrogen narcosis (nī'trə-jən nār-kō'sīs) *n.* A condition of confusion or stupor resulting from increased levels of dissolved nitrogen in the blood, as that occurring in deep-sea divers breathing air under high pressure.

ni·tro·glyc·er·in also **ni·tro·glyc·er·ine** (nī'trō-glis'ər-ĭn, -trə-) *n.* A thick, pale yellow liquid, $\text{CH}_2\text{NO}_3\text{CHNO}_3\text{CH}_2\text{NO}_3$, that is explosive on concussion or exposure to sudden heat. It is used in the production of dynamite and blasting gelatin and as a vasodilator in medicine.

ni·tro·hy·dro·chlo·ric acid (nī'trō-hī'drə-klôr'ĭk əs'ĭd, -klôr'-) *n.* See **aqua regia**.

ni·tro·meth·ane (nī'trō-mĕth'ān') *n.* A colorless, oily liquid, CH_3NO_2 , used in making dyes and resins, in organic synthesis, and as a rocket propellant.

ni·tro·par·af·fin (nī'trō-pār'ə-fĭn) *n.* Any of a group of organic compounds formed by replacing one or more of the hydrogen atoms of a paraffin hydrocarbon with the univalent group, NO_2 , as in nitromethane, CH_3NO_2 .

ni·tros·a·mine (nī-trō'sə-mĕn', nī'trōs-əm'ĕn) *n.* Any of a class of organic compounds with the general formula R_2NNO or RNHNO , present in various foods and other products and found to be carcinogenic in laboratory animals.

[Latin *nitrosus*, full of natron (from *nitrum*, natron); see NITER + AMINE.]

ni·tro·starch (nī'trə-stārch') *n.* A highly explosive orange powder, $\text{C}_{12}\text{H}_{12}(\text{NO}_2)_8\text{O}_{10}$, derived from starch and used for demolition.

ni·trous (nī'trəs) *adj.* Of, derived from, or containing nitrogen, especially in a valence state lower than that in a comparable nitric compound.

SYNONYMS: *noise, din, racket, uproar, pandemonium, hullabaloo, hubbub, clamor, babel.* These nouns refer to loud, confused, or disagreeable sound or sounds. *Noise* is the least specific: *deafened by the noise in the subway; the noise of cannon fire.* A *din* is a jumble of loud, usually discordant sounds: *The din in the factory ends abruptly when the noon whistle sounds.* *Racket* is loud, distressing noise: *Can you imagine the racket made by a line of empty trailer trucks rolling along cobblestone streets?* *Uproar, pandemonium,* and *hullabaloo* imply disorderly tumult

together with loud, bewildering sound: “The evening uproar of the howling monkeys burst out” (W.H. Hudson). “When night came, it brought with it a pandemonium of dancing and whooping, drumming and feasting” (Francis Parkman). The first performance of the iconoclastic composition caused a tremendous hullabaloo in the audience. *Hubbub* emphasizes turbulent activity, as of those engaged in commerce, and concomitant din: *We couldn’t hear the starting announcement above the hubbub of bettors, speculators, tipsters, and touts.* *Clamor* is loud, usually sustained noise, as of a public outcry of dissatisfaction: “not in the clamor of the crowded street” (Henry Wadsworth Longfellow). *The debate was interrupted by a clamor of opposition.* *Babel* stresses confusion of vocal sounds arising from simultaneous utterance and random mixture of languages: *My outstanding memory of the diplomatic reception is of elegantly dressed guests chattering in a babel of tongues.*

WORD HISTORY: For those who find that too much noise makes them ill, it will come as no surprise that the word *noise* possibly can be traced back to the Latin word *nausea*, “seasickness, feeling of sickness.” Our words *nausea* and *noise* are doublets, that is, words borrowed in different forms from the same word. *Nausea*, first recorded probably before 1425, was borrowed directly from Latin. *Noise*, on the other hand, first recorded around the beginning of the 13th century, came to us through Old French, probably ultimately from Latin, which explains its change in form. The unrecorded change in sense probably took place in Vulgar Latin. Old French *nois*, descended from Latin *nausea*, meant “sound, din, uproar, quarrel,” all senses that came into Middle English with the word. *Noise*, however, is an example of how words can change for the better, for a noise can be pleasant as well as unpleasant, as in the sentence “The only noise was the wind in the pines.”

noise-less (noiz/’lis) *adj.* Making or marked by no noise. See Synonyms at **still**¹. —**noise/less-ly** *adv.* —**noise/less-ness** *n.*

nonce word (nɒns wûrd) *n.* A word occurring, invented, or used just for a particular occasion; for example, the word *mileconsuming* in "*the wagon beginning to fall into its slow and mileconsuming clatter*" (William Faulkner).

non·cha·lance (nɒn'shə-ləns') *n.* Casual lack of concern: "*The contemptuous nonchalance of her trailed hand irritated him*" (Elizabeth Bowen).

non·cha·lant (nɒn'shə-lənt') *adj.* Seeming to be coolly unconcerned or indifferent. See Synonyms at **cool**. [French, from Old French, present participle of *nonchaloir*, to be unconcerned : *non-*, *non-* + *chaloir*, to cause concern to (from

Latin *calēre*, to be warm, heat up); see **kelə-¹** in Appendix.] —**non'cha-lant/ly** *adv.*

WORD HISTORY: A nonchalant person is not likely to become warm or heated about anything, a fact that is underscored by the etymology of the word *nonchalant*. *Non-*, the first part of the word, is easy to spot as a familiar negative prefix; since this word was formed in Old French, we have *non-*, the Old French descendant of Latin *nōn-*. The second element, *chalant*, is the Old French present participle of the verb *chaloir*, meaning “to be concerned.” This in turn came from the Latin word *calēre*, which from its concrete sense “to be hot or warm” developed the figurative sense “to be roused or fired with hope, zeal, or anger.” Obviously the Old French verb *chaloir* has lost some of the warmth of Latin *calēre*, but then, the nonchalant person has little warmth or concern. The word *nonchalant* is first recorded in English before 1734, although French *nonchalance*, a derivative of French *nonchalant*, seems to have entered English first. English *nonchalance* is first recorded in 1678.

non·chro·mo·som·al (nɒn'krō-mə-sō'məl) *adj.* Not situated on or involving a chromosome: *nonchromosomal DNA*.

non·cit·i·zen (nɒn-sīt'ī-zən) *n.* See **alien** (*n.*, sense 1).

non·clear·ing member (nɒn-klîr'ɪŋ mēm'bər) *n.* A member of a securities exchange that does not belong to the exchange's clearing facility but pays another firm to provide the service.

USAGE NOTE: It is widely asserted that *none* is equivalent to *no one*, and hence requires a singular verb and singular pronoun: *None of the prisoners was given his soup.* It is true that *none* is etymologically derived from the Old English word *ān*, “one,” but the word has been used as both a singular and a plural noun from Old English onward. The plural use can be found in reputable sources such as the King James Bible, Dryden, and Burke; and H.W. Fowler described the traditional rule as “a mistake.” Either a singular or a plural verb is acceptably used in a sentence such as *None of the conspirators has (or have) been brought to trial.* When *none* is modified by *almost*, however, it is difficult to avoid treating the word as a plural: *Almost none of the officials were (not was) interviewed by the committee.* *None* can only be plural in its use in sentences such as *None but his most loyal supporters believe (not believes) his story.* See Usage Note at **every**. See Usage Note at **neither**.

USAGE NOTE: The term *nonstandard* was introduced by linguists and lexicographers to describe usages and language varieties that had previously been labeled with terms such as *vulgar* and *illiterate*. *Nonstandard* is not simply a euphemism but reflects the empirical discovery that the varieties used by low-prestige groups have rich and systematic grammatical structures and that their stigmatization more often reflects a judgment about their speakers rather than any inherent deficiencies in logic or expressive power. Note, however, that the use of nonstandard forms is not necessarily restricted to the communities with which they are associated in the public mind. Many educated speakers freely use forms such as *can't hardly* or *ain't I* to set a popular or informal tone. • Some dictionaries use the term *substandard* to describe forms, such as *ain't*, associated with uneducated speech, while reserving *nonstandard* for forms such as *irregardless*, which are common in writing but are still regarded by many as uneducated. But *substandard* is itself susceptible of disparaging interpretation, and most linguists and lexicographers now use only *nonstandard*, the practice followed in this Dictionary.

USAGE NOTE: The traditional rule requires that *nor* be used following *neither* in expressions in which the negation is carried over to the second element: *He is neither able nor (not or) willing to go.* *Nor* is likewise required when a negation is carried over into the second of two independent clauses, in which case it also triggers inversion of the subject and the auxiliary verb in the second clause: *He cannot find anyone now, nor does he expect to find anyone in the future; Jane will never compromise with Bill, nor will Bill compromise with Jane.* When the first negative is expressed by *not* or *never*, however, and when the second conjoined element is a verb phrase, the use of *nor* is often optional: *He will not permit the change, or (or nor) even consider it.* When a noun phrase of the type *no this or that* is introduced by *no*, *or* is more common than *nor*: *He has no experience or interest (less frequently nor interest) in chemistry.* *Or* is also more common than *nor* when such a noun phrase, adjective phrase, or adverb phrase is introduced by *not*: *He is not a philosopher or a statesman. We were not rich or happy.* See Usage Note at **neither**. See Usage Note at **or**¹.

no·whith·er (nō'hwîth'ər, -wîth'-) *adv.* In no definite direction.

no·win (nō'wîn') *adj.* *Informal.* Certain to end in failure or disappointment: *trapped in a no-win situation.*

no·wise (nō'wîz') *adv.* In no way, manner, or degree; not at all.

nox·ious (nɔk'shəs) *adj.* **1.** Harmful to living things; injurious to health: *noxious chemical wastes.* **2.** Harmful to the mind or morals; corrupting: *noxious ideas.* [Middle English *noxius*, from Latin, from *noxa*, damage. See **nek**-¹ in Appendix.] — **nox·ious·ly** *adv.* — **nox'ious·ness** *n.*

Noyes (noiz), **Alfred.** 1880-1958. British poet whose works, traditional in style, concern nature and science, English history, and his conversion to Catholicism.

Noyes (noiz), **John Humphrey**. 1811-1886. American religious leader who founded (1848) an experimental community at Oneida, New York, based on his belief in perfectionism and communal living.

noz-zle (nɔz'əl) *n.* **1.** A projecting part with an opening, as at the end of a hose, for regulating and directing a flow of fluid. **2.** *Slang.* The human nose. [Middle English *noselle*, socket on a candlestick, diminutive of *nose*. See NOSE.]

Np The symbol for the element **neptunium**.

NP *abbr.* **1.** Neuropsychiatry. **2.** *Grammar.* Noun phrase. **3.** Nurse practitioner.

N.P. *abbr.* Notary public.

NPN *abbr.* Nonprotein nitrogen.

NPR *abbr.* National Public Radio.

nr *abbr.* Near.

NRA *abbr.* **1.** National Recovery Administration. **2.** National Rifle Association. **3.** Naval Reserve Association.

NRC *abbr.* **1.** National Research Council. **2.** Nuclear Regulatory Commission.

ns *abbr.* Nanosecond.

NS *abbr.* **1.** Also **N.S.**. Nova Scotia. **2.** Nuclear ship.

n.s. *abbr.* **1.** New series. **2.** Not specified.

N.S. *abbr.* New Style.

n/s *abbr.* Not sufficient.

NSA *abbr.* National Security Agency.

NSC *abbr.* National Security Council.

NSE *abbr.* National Stock Exchange.

nsec *abbr.* Nanosecond.

NSF *abbr.* National Science Foundation.

n.s.f. or **N.S.F.** *abbr.* Not sufficient funds.

N.S.P.C.A. *abbr.* National Society for the Prevention of Cruelty to Animals.

NT *abbr.* **1.** Also **N.T.**. *Bible.* New Testament. **2.** Northwest Territories.

-n't Not.

nth (ěnth) *adj.* **1.** Relating to an indefinitely large ordinal number: *ten to the nth power*. **2.** Highest; utmost: *delighted to the nth degree*. [N^2 , indefinite number + TH^3 .]

nth root (ěnth rōot) *n.* *Mathematics.* See **root**¹ (*n.*, sense 9a).

n.t.p. or **N.T.P.** *abbr.* Normal temperature and pressure.

NTSB *abbr.* National Transportation Safety Board.

nt.wt. *abbr.* Net weight.

nu (nōō, nyōō) *n.* The 13th letter of the Greek alphabet. [Greek, of Semitic origin; akin to Hebrew *nûn*, nun.]

nu·ance (nōō'āns', nyōō'-, nōō-āns', nyōō-) *n.* **1.** A subtle or slight degree of difference, as in meaning, feeling, or tone; a gradation. **2.** Expression or appreciation of subtle shades of meaning, feeling, or tone: *a rich artistic performance*,

full of nuance. [French, from Old French, from *nuer*, to shade, cloud, from *nue*, cloud, from Vulgar Latin **nūba*, from Latin *nūbēs*.] —**nu·anced'** *adj.*

SYNONYMS: *nuance, gradation, shade.* The central meaning shared by these nouns is “a slight variation or differentiation between nearly identical entities”: *sensitive to delicate nuances of style; gradations of feeling from infatuation to deep affection; subtle shades of meaning.*

nub (nüb) *n.* **1.** A protuberance or knob. **2.** A small lump. **3.** The essence; the core: *the nub of a story.* [Variant of *knub*, probably from Low German *knubbe*, from Middle Low German, variant of *knobbe*.] —**nub'by** *adj.*

Nu·ba (nōō'bə, nyōō'-) *n. pl. Nuba.* **1.** A member of any of several peoples inhabiting the hills of south-central Sudan. **2.** See **Nubian** (n., sense 2).

Nu·bi·a (nōō'bē-ə, nyōō'-) A desert region and ancient kingdom in the Nile River valley of southern Egypt and northern Sudan. After the 20th century B.C. it was controlled by the rulers of Egypt, although in the 8th and 7th centuries an independent kingdom arose that conquered Egypt and ruled as the XXV Dynasty (712-663). Converted to Christianity in the 6th century A.D., Nubia united with Ethiopia but fell to the Muslims in the 14th century. Much of the region was flooded by the completion of the Aswan High Dam in the 1960's.

Nu·bi·an (nōō'bē-ən, nyōō'-) *adj.* Of or relating to Nubia or its peoples, languages, or cultures. — *n.* **1.** A native or inhabitant of Nubia. **2.** Any of a group of closely related Nilo-Saharan languages spoken in the Sudan. In this sense, also called *Nuba*

Nubian Desert (nōō'bē-ən dəz'ərt) A desert region of northeast Sudan extending east of the Nile River to the Red Sea.

nu·bile (nōō'bīl, -bīl', nyōō'-) *adj.* **1.** Ready for marriage; of a marriageable age or condition. Used of young women. **2.** Sexually mature and attractive. Used of young women. [Latin *nūbilis*, from *nūbere*, to take a husband.] —**nu·bil'i·ty** (nōō-bīl'i-tē, nyōō'-) *n.*

nu·cel·lus (nōō-sěl'əs, nyōō'-) *n. pl. nu·cel·li* (-sěl'ī). *Botany.* The central portion of an ovule in which the embryo sac develops; the megasporangium. [New Latin, from *nux, nuc-*, nut.] —**nu·cel'lar** *adj.*

nu·cha (nōō'kə, nyōō'-) *n.* The nape of the neck. [Middle English, spinal cord, from Medieval Latin, from Arabic *nuḥḥ*, marrow.] —**nu'chal** *adj.*

nucle- *pref.* Variant of **nucleo-**.

nu·cle·ar (nōō'klē-ər, nyōō'-) *adj.* **1. Biology.** Of, relating to, or forming a nucleus: *a nuclear membrane.* **2. Physics.** Of or relating to atomic nuclei. **3.** Using or derived from the energy of atomic nuclei; atomic. **4.** Of, using, or possessing atomic or hydrogen bombs: *nuclear war; nuclear nations.* [From NUCLEUS.]

nuclear age (nōō'klē-ər āj) *n.* The atomic age.

nuclear emulsion (nōō'klē-ər ĭ-mŭl'shən) *n.* *Physics.* Any of several photographic emulsions used to detect and visually display the paths of charged subatomic particles, especially of charged cosmic ray particles.

nuclear energy (nōō'klē-ər ěn'ər-jē) *n.* **1.** The energy released by a nuclear reaction, especially by fission or fusion. **2.** Nuclear energy regarded as a source of power. Also called *atomic energy*

nuclear envelope (nōō'klē-ər ěn'və-lōp') *n.* See **nuclear membrane**.

nuclear family (nōō'klē-ər fām'ə-lē) *n.* A family unit consisting of a mother and father and their children.

nuclear force (nōō'klē-ər fōrs) *n.* *Physics.* Strong interaction.

nu·cle·ar-free zone (nōō'klē-ər frē' zōn, nyōō'-) *n.* An area in which the siting of nuclear weapons or reactors is banned.

nu·cle·ar·ize (nōō'klē-ər-rīz', nyōō'-) *v. tr.* **nu·cle·ar·ized, nu·cle·ar·iz·ing, nu·cle·ar·iz·es.** To equip with nuclear weapons. —**nu'cle·ar·i·za'tion** (-ər-ĭ-zā'shən) *n.*

nuclear magnetic resonance (nōō'klē-ər mǎg-nĕt'ĭk rĕz'ə-nəns) *n.*

Abbr. **NMR** The absorption of electromagnetic radiation of a specific frequency by an atomic nucleus that is placed in a strong magnetic field, used especially in spectroscopic studies of molecular structure and in medicine to measure rates of metabolism.

nuclear magneton (nōō'klē-ər mǎg'nĭ-tōn') *n.* *Physics.* A unit of the magnetic moment of a nucleon.

nuclear medicine (nōō'klē-ər mĕd'ĭ-sĭn) *n.* The branch of medicine that deals with the use of radionuclides in diagnosis and treatment of disease.

nuclear membrane (nōō'klē-ər mĕm'brān') *n.* The double-layered membrane enclosing the nucleus of a cell. Also called *nuclear envelope*

nuclear physics (nōō'klē-ər fĭz'ĭks) *n.* (*used with a sing. verb*). The scientific study of the forces, reactions, and internal structures of atomic nuclei.

nuclear power (nōō'klē-ər pou'ər) *n.* Power, especially electricity, the source of which is nuclear fission or fusion.

nuclear reaction (nōō'klē-ər rĕ-ăk'shən) *n.* A reaction, as in fission, fusion, or radioactive decay, that alters the energy, composition, or structure of an atomic nucleus.

nuclear reactor (nōō'klē-ər rĕ-ăk'tər) *n.* Any of several devices in which a chain reaction is initiated and controlled, with the resulting heat typically used for power generation and the neutrons and fission products used for military, experimental, and medical purposes.

nuclear weapon (nōō'klē-ər wĕp'ən) *n.* A device, such as a bomb or war-head, whose great explosive power derives from the release of nuclear energy.

nuclear winter (nōō'klē-ər wɪn'tər) *n.* A worldwide darkening and cooling of the atmosphere with consequent devastation of surviving life forms, believed by some scientists to be a probable outcome of large-scale nuclear war.

nu·cle·ase (nōō'klē-ās', -āz', nyōō'-) *n.* Any of several enzymes, such as endonucleases and exonucleases, that hydrolyze nucleic acids.

nu·cle·ate (nōō'klē-īt, nyōō'-) *adj.* Nucleated. — *v.* **nu·cle·at·ed**,

nu·cle·at·ing, **nu·cle·ates** (-āt'). — *v. tr.* **1.** To bring together into a nucleus.

2. To act as a nucleus for. **3.** To provide a nucleus for. — *v. intr.* To form a nucleus. —**nu'cle-a'tion** *n.* —**nu'cle-a'tor** *n.*

nu·cle·at·ed (nōō'klē-ā'tɪd, nyōō'-) *adj.* Having a nucleus or nuclei: *the nucleated cell of a spermatozoon.*

nu·cle·i (nōō'klē-ī', nyōō'-) *n.* A plural of **nucleus**.

nu·cle·ic acid (nōō-klē'ɪk əs'ɪd, -klā'-, nyōō-) *n.* Any of a group of complex compounds found in all living cells and viruses, composed of purines, pyrimidines, carbohydrates, and phosphoric acid. Nucleic acids in the form of DNA and RNA control cellular function and heredity.

nu·cle·in (nōō'klē-ɪn, nyōō'-) *n.* Any of the substances present in the nucleus of a cell, consisting chiefly of proteins, phosphoric acids, and nucleic acids. —**nu'cle-in'ic** *adj.*

nucleo- or **nucle-** *pref.* **1.** Nucleus: *nucleon; nucleoplasm.* **2.** Nucleic acid: *nucleoprotein.* [From NUCLEUS.]

nu·cle·o·cap·sid (nōō'klē-ō-kăp'sɪd, nyōō'-) *n.* The basic structure of a virus, consisting of a core of nucleic acid enclosed in a protein coat.

nu·cle·o·his·tone (nōō'klē-ō-hɪs'tōn', nyōō'-) *n.* A nucleoprotein whose protein component is a histone.

nu·cle·oid (nōō'klē-oid', nyōō'-) *n.* The part of a bacterium or virus that contains nucleic acid and is analogous in function to the nucleus of a eucaryotic cell.

nu·cle·o·late (nōō'klē-ə-lāt', nyōō'-) also **nu·cle·o·lat·ed** (-lā'tɪd) *adj.* Having a nucleolus or nucleoli. [NUCLEOL(US) + -ATE¹.]

nu·cle·o·lus (nōō-klē'ə-ləs, nyōō-) *n. pl.* **nu·cle·o·li** (-lī'). *Biology.* A small, typically round, granular body composed of protein and RNA in the nucleus of a cell, usually associated with a specific chromosomal site and involved in ribosomal RNA synthesis and the formation of ribosomes. [Latin, diminutive of *nucleus*, kernel. See NUCLEUS.] —**nu·cle'o·lar** (-lər) *adj.*

nu·cle·on (nōō'klē-ŏn', nyōō'-) *n.* A proton or a neutron, especially as part of an atomic nucleus. —**nu'cle-on'ic** *adj.*

nu·cle·on·ics (nōō'klē-ŏn'ɪks, nyōō'-) *n.* (*used with a sing. verb.*) **1.** The study of the behavior and characteristics of nucleons or atomic nuclei. **2.** Development of instruments for use in nuclear research. [From NUCLEON.]

nucleon number (nōō'klē-ŏn' nŭm'bər) *n.* See **mass number**.

nu·cle·o·phile (nōō'klē-ə-fīl', nyōō'-) *n.* A chemical compound or group that is attracted to nuclei and tends to donate or share electrons.

nu·cle·o·plasm (nōō'klē-ə-plāz'əm, nyōō'-) *n.* The protoplasm of a cell nucleus. Also called *karyoplasm* —**nu'cle·o·plas'mic**, **nu'cle·o·plas·mat'ic** (-ō-plāz-măt'ik) *adj.*

nu·cle·o·pro·tein (nōō'klē-ō-prō'tēn', -prō'tē-īn, nyōō'-) *n.* Any of a group of substances found in the nuclei of all living cells and in viruses, composed of a protein and a nucleic acid.

nu·cle·o·side (nōō'klē-ə-sīd', nyōō'-) *n.* Any of various compounds consisting of a sugar, usually ribose or deoxyribose, and a purine or pyrimidine base, especially a compound obtained by hydrolysis of a nucleic acid, such as adenosine or guanine.

nu·cle·o·some (nōō'klē-ə-sōm', nyōō'-) *n.* Any of the repeating subunits of chromatin, consisting of a DNA chain coiled around a core of histones. —**nu'cle·o·som'al** (-sō'məl) *adj.*

nu·cle·o·syn·the·sis (nōō'klē-ō-sīn'thī-sīs, nyōō'-) *n.* The process by which heavier chemical elements are synthesized from hydrogen nuclei in the interiors of stars. —**nu'cle·o·syn·thet'ic** (-sīn-thēt'ik) *adj.*

nu·cle·o·tid·ase (nōō'klē-ə-tī'dās, -dāz, nyōō'-) *n.* An enzyme that catalyzes the hydrolysis of a nucleotide to a nucleoside and phosphoric acid.

nu·cle·o·tide (nōō'klē-ə-tīd', nyōō'-) *n.* Any of various compounds consisting of a nucleoside combined with a phosphate group and forming the basic constituent of DNA and RNA. [Alteration of NUCLEOSIDE.]

nu·cle·us (nōō'klē-əs, nyōō'-) *n.* *pl.* **nu·cle·i** (-klē-ī') or **nu·cle·us·es**. **1.** A central or essential part around which other parts are gathered or grouped; a core: *the nucleus of a city.* **2.** Something regarded as a basis for future development and growth; a kernel: *a few paintings that formed the nucleus of a great art collection.*

3. Biology. A large, membrane-bound, usually spherical protoplasmic structure within a living cell, containing the cell's hereditary material and controlling its metabolism, growth, and reproduction. **4. Botany. a.** The central kernel of a nut or seed. **b.** The center of a starch granule. **5. Anatomy.** A group of specialized nerve cells or a localized mass of gray matter in the brain or spinal cord.

6. Physics. The positively charged central region of an atom, composed of protons and neutrons and containing almost all of the mass of the atom. **7. Chemistry.** A group of atoms bound in a structure, such as a benzene ring, that is resistant to alteration in chemical reactions. **8. Astronomy. a.** The central portion of the head of a comet. **b.** The central or brightest part of a nebula or galaxy.

9. Meteorology. A particle on which water vapor molecules accumulate in free air to form a droplet or ice crystal. [Latin *nuculeus*, *nucleus*, kernel, from *nucula*, little nut, diminutive of *nux*, *nuc-*, nut.]

nu·clide (nōō'klīd', nyōō'-) *n.* A type of atom specified by its atomic number, atomic mass, and energy state, such as carbon 14. — **nu·clid'ic** (nōō-klīd'īk, nyōō-) *adj.*

nude (nōōd, nyōōd) *adj.* **nud·er, nud·est.** **1.** Being without clothing; naked.

2. *Law.* Lacking any of various legal requisites, such as evidence. — *n.* **1.** An unclothed human figure, especially an artistic representation. **2.** The condition of being unclothed. [Latin *nūdus*. See **nog^w-** in Appendix.] — **nude'ly** *adv.*

— **nu'di·ty** (nōō'dī-tē, nyōō'-), **nude'ness** *n.*

nudge¹ (nŭj) *v. tr.* **nudged, nudg·ing, nudg·es.** **1.** To push against gently, especially in order to gain attention or give a signal. **2.** To come close to; near: “*The temperature was nudging 105 degrees in the shade*” (Scouting). — *n.* A gentle push. [Probably of Scandinavian origin.] — **nudg'er** *n.*

nudge² or **nudz^h** (nōōj) *Slang. n.* One who persistently pesters, annoys, or complains. — *v.* **nudged** or **nudz^hed, nudg·ing** or **nudz^h·ing, nudg·es** or **nudz^h·es.** — *v. tr.* To annoy persistently; pester. — *v. intr.* To complain or carp persistently. [From Yiddish *nudyen*, to pester, bore, from Polish *nudzić*.]

nudi- *pref.* Naked; bare: *nudibranch*. [Latin *nūdi-*, from *nūdus*, naked. See **nog^w-** in Appendix.]

nu·di·branch (nōō'də-brāŋk', nyōō'-) *n.* See **sea slug**. [From New Latin *Nudibranchia*, order name : NUDI- + BRANCHIA.] — **nu'di·bran'chi·ate** (-brāŋk'kē-īt), **nu'di·bran'chi·an** (-kē-ən) *adj. & n.*

nud·ism (nōō'dīz'əm, nyōō'-) *n.* The belief in or practice of going nude, especially in secluded, sexually mixed groups for reasons of health. — **nud'ist** *adj. & n.*

nud·nik also **nud·nick** (nōōd'nīk) *n. Slang.* An obtuse, boring, or bothersome person; a pest. [Yiddish, *nudne*, boring (from *nudyen*, to bore); see **NUDGE²** + *-nik, -nik.*]

nudz^h (nōōj) *n. & v. Slang.* Variant of **nudge²**.

Nu·e·ces (nōō-ā'sīs, nyōō-) A river of southern Texas flowing about 507 km (315 mi) to **Nueces Bay**, an inlet of the Gulf of Mexico near Corpus Christi.

Nue·vo La·re·do (nōō-ā'vō lə-rā'dō, nwě'vō lă-rě'thō) A city of northeast Mexico across the Rio Grande from Laredo, Texas. Founded in 1755, it was part of Laredo until the end of the Mexican War in 1848. Population, 201,731.

nu·ga·to·ry (nōō'gə-tōr'ē, -tōr'ē, nyōō'-) *adj.* **1.** Of little or no importance; trifling. **2.** Having no force; invalid. See Synonyms at **vain**. [Latin *nūgātōrius*, from *nūgātor*, trifler, from *nūgārī*, to trifle, from *nūgae*, jokes.]

nug·get (nŭg'īt) *n.* **1.** A small, solid lump, especially of gold. **2.** A small compact portion or unit: *nuggets of information*. [Perhaps diminutive of English dialectal *nug*, lump.]

nui·sance (nōō'səns, nyōō'-) *n.* **1.** One that is inconvenient, annoying, or vexatious; a bother: *Having to stand in line was a nuisance. The disruptive child was a*

nuisance to the class. **2. Law.** A use of property or course of conduct that interferes with the legal rights of others by causing damage, annoyance, or inconvenience. [Middle English, from Old French, from *nuire*, *nuis-*, to harm, from Vulgar Latin **nocere*, from Latin *nocēre*. See **nek**-¹ in Appendix.]

nuisance tax (nōō'səns tāk) *n.* A small excise tax levied on separate purchases and collected directly from the purchaser.

nuke (nōōk, nyōōk) *Slang. n.* **1.** A nuclear device or weapon. **2.** A nuclear-powered electric generating plant. — *v. tr.* **nuked, nuk-ing, nukes.** **1.** To attack with nuclear weapons. **2.** To heat in a microwave oven: "I obtained this soup by nuking one cup of water and mixing that with... bouillon" (Judy Markey). [Shortening and alteration of NUCLEAR.]

Nu·ku·a·lo·fa (nōō'kōō-ə-lō'fə) The capital of Tonga in the southwest Pacific Ocean. Population, 21,745.

null (nŭl) *adj.* **1.** Having no legal force; invalid: *render a contract null and void.* **2.** Of no consequence, effect, or value; insignificant. **3.** Amounting to nothing; absent or nonexistent: *a null result.* **4. Mathematics.** Of or relating to a set having no members or to zero magnitude. — *v. tr.* **nulled, null-ing, nulls.** To make null. — *n.* **1.** Zero; nothing. **2.** An instrument reading of zero. [French *null*, from Old French, from Latin *nŭllus*. See **ne** in Appendix.]

nul·lah (nŭl'ə) *n.* A ravine or gully, especially in southern Asia. [Hindi *nālā*, rivulet, probably of Dravidian origin.]

Null·ar·bor Plain (nŭl'ə-bōr' plān, nŭl-är'bər) A region of south-central Australia south of the Great Victoria Desert and north of the Great Australian Bight. It is the site of a major rocket research center.

null character (nŭl kār'ək-tər) *n. Computer Science.* A data control character that fills computer time by adding nonsignificant zeros to a data sequence.

nul·li·fi·ca·tion (nŭl'ə-fī-kā'shən) *n.* **1. a.** The act of nullifying. **b.** The state of being nullified. **2.** Refusal or failure of a U.S. state to recognize or enforce a federal law within its boundaries. —**nul'li-fi-ca'tion-ist** *n.*

nul·li·fi·er (nŭl'ə-fī'ər) *n.* **1.** One that nullifies. **2.** One who believes in nullification as a means by which U.S. states may resist federal laws.

nul·li·fy (nŭl'ə-fī') *v. tr.* **nul-li-fied, nul-li-fy-ing, nul-li-fies.** **1.** To make null; invalidate. **2.** To counteract the force or effectiveness of. See Synonyms at **neutralize**. [Latin *nŭllificāre*, to despise : *nŭllus*, none; see **ne** in Appendix + *-ficāre*, *-fy*.]

nul·lip·a·ra (nə-līp'ər-ə) *n.* A woman who has never given birth. [Latin *nŭllus*, none; see **ne** in Appendix + *-PARA*.] —**nul·lip'a-rous** *adj.*

nul·li·ty (nŭl'ī-tē) *n. pl. nul-li-ties.* **1.** The state or quality of being null. **2.** Something that is null, especially an act having no legal validity.

num. *abbr.* **1.** Number. **2.** Numeral.

Num. *abbr. Bible.* Numbers.

Nu·ma·zu (nōō-mä'zōō) A city of south-central Honshu, Japan, southwest of Yokohama. It is a popular resort. Population, 210,484.

numb (nŭm) *adj.* **numb·er, numb·est.** **1.** Deprived of the power to feel or move normally; benumbed: *toes numb with cold; too numb with fear to cry out.*

2. Emotionally unresponsive; indifferent: *numb to yet another appeal.* — *v. tr. intr.* **numbed, numb·ing, numbs.** To make or become numb. [Middle English *nome*, variant of *nomin*, past participle of *nimen*, to seize, from Old English *niman*. See **nem-** in Appendix.] —**numb'ly** *adv.* —**numb'ness** *n.*

WORD HISTORY: One of the more frequently used words in English, *take*, is evidence of the importance of the Scandinavian influence on English. Chiefly Danes and Norwegians, the invaders and settlers of the 8th through the 11th century contributed more than 900 words to the English language, but perhaps few so important as *take*. The Old Norse word *taka* was adopted as Old English *tacan*, the ancestor of our *take*. But Old English already had a word that paralleled *tacan* in sense, and that was *niman*. In Middle English *nimen*, from *niman*, still thrived, but by the 16th century the word had all but disappeared, surviving today only as *nim* in the archaic sense “to steal.” However, all was not lost, for the past participle of *nimen*, *nomin*, was used as an adjective, meaning “deprived of the power of movement, unable to move, paralyzed.” We know this word in the form *numb*, from which the new verb *numb* has been derived.

num·ber (nŭm'bər) *n.* **1. Mathematics. a.** A member of the set of positive integers; one of a series of symbols of unique meaning in a fixed order that can be derived by counting. **b.** A member of any of the further sets of mathematical objects, such as negative integers and real numbers, that can be derived from the positive integers by induction. **2. numbers.** Arithmetic. **3. Abbr. no., n., num., No. a.** A symbol or word used to represent a number. **b.** A numeral or a series of numerals used for reference or identification: *his telephone number; the apartment number.* **4. a.** A position in an ordered sequence that corresponds to one of the positive integers: *the house that is number three from the corner; ranked number six in her class.* **b.** One item in a group or series considered to be in numerical order: *an old number of a magazine.* **5.** A total; a sum: *the number of feet in a mile.* **6.** An indefinite quantity of units or individuals: *The crowd was small in number. A number of people complained about the poor lighting in the museum.* **7. numbers. a.** A large quantity; a multitude: *Numbers of people visited the fair.* **b.** Numerical superiority: *The South had leaders, the North numbers.* **8. Grammar.** The indication, as by inflection, of the singularity or plurality of a linguistic form. **9. numbers. a.** Metrical feet or lines; verses: “*These numbers will I tear, and write in prose*” (Shakespeare). **b. Obsolete.** Poetic meter. **10. numbers. Archaic.** Musical periods or measures. **11. numbers.** (*used with*

a sing. or pl. verb). *Games*. A numbers game. **12. Numbers.** (used with a sing. verb). *Abbr.* **Nb., Num.** A book of the Bible. See Table at **Bible**. **13.** One of the separate offerings in a program of music or other entertainment: *The band's second number was a ballad.* **14. Slang.** A frequently repeated, characteristic speech, argument, or performance: *The suspects will do their usual number—protesting innocence—and then confess.* **15. Slang.** A person or thing singled out for a particular characteristic: *a suspect who was a crafty number.* — *v.* **num·bered, num·ber·ing, num·bers.** — *v. tr.* **1.** To assign a number to. **2.** To determine the number or amount of; count. **3.** To total in number or amount; add up to. **4.** To include in a group or category: *He was numbered among the lost.* **5.** To mention one by one; enumerate. **6.** To limit or restrict in number: *Our days are numbered.* — *v. intr.* **1.** To call off numbers; count: *numbering to ten.* **2.** To constitute a group or number: *The applicants numbered in the thousands.* — **idioms. by the numbers.** **1.** In unison as numbers are called out by a leader: *performing calisthenics by the numbers.* **2.** In a strict, step-by-step or mechanical way. **do a number on.** *Slang.* To defeat, abuse, or humiliate in a calculated and thorough way. **get (someone's) number** (or **have (someone's) number**). To determine or know someone's real character or motives. **without number** (or **beyond number**). Too many to be counted; countless: *Mosquitoes without number filled the yard.* [Middle English *nombre*, from Old French, from Latin *numerus*. See **nem-** in Appendix.] — **num'ber·er** *n.*

USAGE NOTE: As a collective noun *number* may take either a singular or a plural verb. It takes a singular verb when it is preceded by the definite article *the*: *The number of skilled workers is small.* It takes a plural verb when preceded by the indefinite article *a*: *A number of the workers are unskilled.*

On: “*A plague of all cowards, I say*” (Shakespeare). [Middle English, from Old English. See **apo-** in Appendix.]

USAGE NOTE: Grammarians have sometimes condemned categorically the so-called double genitive construction, as in *a friend of my father's*; *a book of mine*. The construction is well supported by literary precedent, however, and serves a useful purpose. Thus there is no substitute for the double genitive in a sentence such as *That's the only friend of yours that I've ever met*, since sentences such as *That's your only friend that I've ever met* and *That's your only friend, whom I've ever met* are obviously impossible.

OF *abbr.* Baseball. Outfield; outfielder.

O'Faolain (ō-fāl'ən, ō-fā'lən), **Sean.** 1900-1991. Irish writer. His short stories are contained in volumes such as *Midsummer Night Madness* (1932) and *The Heat of the Sun* (1966). O'Faolain's novels include *A Nest of Simple Folk* (1934).

o·fay (ō'fā') *n.* *Offensive Slang.* Used as a disparaging term for a white person. [Possibly of West African origin.]

WORD HISTORY: The commonly seen etymology of *ofay*—Pig Latin for *foe*—is perhaps of less interest than the more likely story of this word's origins. The word, which is first recorded in the first quarter of the 20th century, must have been in use much longer if it is, as some scholars think, borrowed from an African source. Although this source has not been pinned down, the suggested possibilities are in themselves interesting. One would trace it to the Ibibio word *afia*, “white or light-colored.” Another would have it come from Yoruba *ofe*, a word that was said in order to protect oneself from danger. The term was then transferred to white people, regarded as a danger to Black people throughout the wretched days of slavery and beyond.

off (ôf, ôf) *adv.* **1.** From a place or position: *drove off.* **2. a.** At a certain distance in space or time: *a mile off; a week off.* **b.** From a given course or route; aside: *swerved off into a ditch.* **c.** Into a state of unconsciousness: *I must have dozed off.* **3. a.** So as to be no longer on, attached, or connected: *shaved off his mustache.* **b.** So as to be divided: *marked off the playing field by yards.* **4.** So as to be no longer continuing, operating, or functioning: *switched off the radio.* **5.** So as to be completely removed, finished, or eliminated: *kill off the mice.* **6.** So as to be smaller, fewer, or less: *Sales dropped off.* **7.** So as to be away from work or duty: *They took a day off.* **8.** Offstage. — *adj.* **1. a.** Distant or removed; farther: *the*

of-fence (ə-fĕns') *n.* Chiefly British. Variant of **offense.**

of-fend (ə-fĕnd') *v.* **of-fend-ed, of-fend-ing, of-fends.** — *v. tr.* **1.** To cause displeasure, anger, resentment, or wounded feelings in. **2.** To be displeasing or disagreeable to: *Onions offend my sense of smell.* **3. a.** To transgress; violate: *offend all laws of humanity.* **b.** To cause to sin. — *v. intr.* **1.** To result in displeasure: *Bad manners may offend.* **2. a.** To violate a moral or divine law; sin. **b.** To violate a rule or law: *offended against the curfew.* [Middle English *offenden*, from Old French *offendre*, from Latin *offendere*. See **g^when-** in Appendix.]

SYNONYMS: *offend, insult, affront, outrage.* These verbs mean to cause resentment, humiliation, or hurt. To *offend* is to cause displeasure, wounded feelings, or repugnance in another: “*He often offended men who might have been useful friends*” (John Lothrop Motley). *Insult* implies gross insensitivity, insolence, or contemptuous rudeness resulting in shame or embarrassment: “*His letters... boil with sarcastic gibes and insulting remarks on the subject of universal suffrage*” (Mario Vargas Llosa). To *affront* is to insult openly, usually intentionally: *Affronted at his impertinence, she stared at him coldly and wordlessly.* *Outrage* implies the flagrant violation of a person’s integrity, pride, or sense of right and decency: “*Agnes... was outraged by what seemed to her Rose’s callousness*” (Mrs. Humphry Ward).

[Middle English, from Old French *ofense*, from Latin *offēnsa*, from feminine past participle of *offendere*, to offend. See OFFEND.]

SYNONYMS: *offense, crime, sin, error.* These nouns are related in denoting a violation or an infraction of a moral, social, or legal code. *Offense* applies most broadly: *The phrase between you and I is often considered an offense against proper usage. Juveniles convicted of criminal offenses are sent to reformatories. Crime* refers both to an act committed or omitted in violation of—and punishable by—law and to a serious or grave offense: “*treason, bribery, or other high crimes and misdemeanors*” (U.S. Constitution, Article II) “*Is it... a crime to love too well?*” (Alexander Pope). A *sin* is a transgression of religious or moral law; more loosely it applies to something regarded as being utterly wrong: “*The sins of the fathers are to be laid upon the children*” (Shakespeare). “*The only deadly sin I know is cynicism*” (Henry L. Stimson). *Error* is departure from what is morally right; the term often suggests bad judgment or lack of awareness rather than willful violation: “*All men are liable to error; and most men are... under temptation to it*” (John Locke).

of·fen·sive (ə-fě'n'siv) *adj.* **1.** Disagreeable to the senses: *an offensive odor.* **2.** Causing anger, displeasure, resentment, or affront: *an offensive gesture.* **3. a.** Making an attack: *The offensive troops gained ground quickly.* **b.** Of, relating to, or designed for attack: *offensive weapons.* **4.** (öf'ěn-) *Sports.* Of or relating to a team having possession of a ball or puck: *the offensive line.* — *n.* **1.** An attitude or a position of attack: *a peace offensive.* **2.** An attack or assault: *led a massive military offensive.* —**of·fen'sive·ly** *adv.* —**of·fen'sive·ness** *n.*

SYNONYMS: *offensive, disgusting, loathsome, nasty, repellent, repulsive, revolting, vile.* The central meaning shared by these adjectives is “extremely unpleasant to the senses or feelings”: *an offensive remark; disgusting language; a loathsome disease; a nasty smell; a repellent demand; repulsive behavior; revolting food; vile thoughts.* See also Synonyms at **hateful**

of·fer (ô'fər, öf'ər) *v.* **of·fered, of·fer·ing, of·fers.** — *v. tr.* **1.** To present for acceptance or rejection; proffer: *offered me a drink.* **2. a.** To put forward for

Lawrence). — *n.* **1.** The act of offering: *an offer of assistance*. **2.** Something, such as a suggestion, proposal, bid, or recommendation, that is offered. **3. Law.** A proposal that if accepted constitutes a legally binding contract. **4.** The condition of being offered, especially for sale: *thousands of bushels of wheat on offer*. **5. a.** An attempt; a try. **b.** A show of intention. [Middle English *offren*, from Old English *offrian*, to present in worship, and from Old French *offrir*, to propose, present both from Latin *offerre*, to present, offer : *ob-*, to; see *OB-* + *ferre*, to bring; see **bher**⁻¹ in Appendix.] — **of'fer-er, of'fer-or** *n.*

SYNONYMS: *offer, proffer, tender, present.* These verbs are compared as they mean to put before another for acceptance or rejection. *Offer* is the basic general term in this group: *the hostess offered us a cup of coffee. Many department stores offer television sets. I offered him some money for his help. "She offered no response"* (Arnold Bennett). *Proffer* implies voluntary action motivated especially by courtesy or generosity: "*Mr. van der Luyden... proffered to Newland low-voiced congratulations*" (Edith Wharton). *To tender* is to offer formally; it may connote polite observance of amenities: *She tendered her respects. The chief of staff is expected to tender his resignation this week.* *Present* suggests formality and often a measure of ceremony: *The impresario will present an expanded series of concerts next season. The ambassador presented her credentials to the monarch. "A footman entered, and presented... some mail on a silver tray"* (Winston Churchill).

WORD HISTORY: Although we use this word hundreds of times a week whether things are OK or not, we have probably rarely wondered about its history. That history is in fact a brief one, the word being first recorded in 1839, though it was no doubt in circulation before then. Much scholarship has been expended on the origins of *OK*, but Allen Walker Read has conclusively proved that *OK* is based on a sort of joke. Someone pronounced the phrase *all correct* as *oll* (or *orl*) *korrekt*, and the same person or someone else spelled it *oll korrekt*, which abbreviated gives us *OK*. This term gained wide currency by being used as a political slogan by the 1840 Democratic candidate Martin Van Buren, who was nicknamed *Old Kinderhook* because he was born in Kinderhook, New York. An editorial of the same year, referring to the receipt of a pin with the slogan *O.K.*, had this comment: “frightful letters... significant of the birth-place of Martin Van Buren, old Kinderhook, as also the rallying word of the Democracy of the late election, ‘all correct’... Those who wear them should bear in mind that it will require their most strenuous exertions... to make all things O.K.”

—**om'buds'man-ship'** *n.*

WORD HISTORY: The word *ombudsman* looks as if its constituents would be familiar, judging from the element *man*, but it is difficult to think of what *ombuds* could mean. *Ombudsman* is from Swedish, a Germanic language in the same family as English, and *man* in Swedish corresponds to our word *man*. *Ombud* means “commissioner, agent,” coming from Old Norse *umbodh*, “charge, commission, administration by a delegacy,” *umbodh* being made up of *um*, “regarding,” and *bodh*, “command.” In Old Norse an *umbodhsmadhr* was a “trusty manager, commissary.” In Swedish an *ombudsman* was a deputy who looked after the interests and legal affairs of a group such as a trade union or business. In 1809 the office of *riksdagens justitieombudsman* was created to act as an agent of justice, that is, to see after the interests of justice in affairs between the government and its citizens. This office of ombudsman and the word *ombudsman* have been adopted elsewhere, as in individual states in the United States. The term has also been expanded in sense to include people who perform the same function for business corporations or newspapers.

[Middle English, from Old English *an, on*. See **an-** in Appendix.]

USAGE NOTE: To indicate motion toward a position, both *on* and *onto* can be used: *The cat jumped on the table. The cat jumped onto the table.* *Onto* is more specific, however, in indicating that the motion was initiated from an outside point. *He wandered onto the battlefield* means that he began his wandering at some point off the battlefield. *He wandered on the battlefield* may mean that his wan-

dering began on the battlefield. • In constructions where *on* is an adverb attached to a verb, it should not be joined with *to* to form the single word *onto*: *move on to* (not *onto*) *new subjects*; *hold on to* (not *onto*) *our gains*. • In their uses to indicate spatial relations, *on* and *upon* are often interchangeable: *It was resting on* (or *upon*) *two supports*. *She took it on* (or *upon*) *herself to finish the project*. *We saw a finch light on* (or *upon*) *a bough*. To indicate a relation between two things, however, instead of between an action and an end point, *upon* cannot always be used: *Hand me the book on* (not *upon*) *the table*. *It was the only town on* (not *upon*) *the main line*. Similarly, *upon* cannot always be used in place of *on* when the relation is not spatial: *He wrote a book on* (not *upon*) *alchemy*. *She will be here on* (not *upon*) *Tuesday*.

[Middle English *on*, from Old English *ān*. See **oi-no-** in Appendix.]

USAGE NOTE: When constructions headed by *one* appear as the subject of a sentence or relative clause, there may be a question as to whether the verb should be singular or plural. Such a construction is exemplified in the sentence *One of every ten rotors was found defective.* Although the plural *were* is sometimes used in such sentences, an earlier survey found that the singular was preferred by a large majority of the Usage Panel. • Another problem is raised by constructions such as *one of those people who* or its variants. In the sentence *The defeat turned out to be one of the most costly blows that were ever inflicted on our forces*, most grammarians would hold that the plural *were* is correct, inasmuch as the subject of the verb is the plural noun *blows*. However, constructions of this sort are often used with a singular verb even by the best writers. Note also that when the phrase containing *one* is introduced by the definite article, the verb in the relative clause must be singular: *He is the only one of the students who has (not have) already taken Latin.* See Usage Note at **he**¹.

b. However; and yet: *The merchandise is well made, only we can't use it.* [Middle English, from Old English *ānlic* : *ān*, one; see ONE + *-lic*, having the form of; see -LY¹.]

USAGE NOTE: When used as an adverb, *only* should be placed with care to avoid ambiguity. Generally this means having *only* adjoin the word or words that it limits. Variation in the placement of *only* can change the meaning of the sentence, as the following examples show: *Dictators respect only force; they are not moved by words. Dictators only respect force; they do not worship it. She picked up the receiver only when he entered, not before. She only picked up the receiver when he entered; she didn't dial the number.* Though strict grammarians insist that the rule for placement of *only* should always be followed, there are occasions when placement of *only* earlier in the sentence seems much more natural. In the following example *only* is placed according to the rule: *The committee can make its decision by Friday of next week only if it receives a copy of the latest report.* Placement of *only* earlier in the sentence, immediately after *can*, would serve the rhetorical function of warning the reader that a condition on the statement follows. See Usage Note at **not**.

See Regional note at **possum**.

2. Any of several similar marsupials of Australia belonging to the family Phalangeridae. [Virginia Algonquian.]

WORD HISTORY: The word *opossum* takes us back to the earliest days of the United States. The settlement of Jamestown, Virginia, was founded in 1607 by the London Company, chartered for the planting of colonies. Even though the first years were difficult, promotional literature was glowing. In one such piece, *A True Declaration of the Estate of the Colonie in Virginia*, published in 1610, we find this passage: "There are... Apossouns, in shape like to pigges." This is the first recorded use of *opossum*, although in a spelling that differs from the one later settled on to reproduce the sound of the Virginia Algonquian word from which our word came. The word *opossum* and its shortened form *possum*, first recorded in 1613 in more promotional literature, remind us of a time when the New World was still very new, settlers were few, and the inhabitants for whom the New World was not new were plentiful.

opossum shrimp (ə-pös'əm shrĭmp) *n.* See **mysid**.

or¹ (ôr; ər *when unstressed*) *conj.* **1. a.** Used to indicate an alternative, usually only before the last term of a series: *hot or cold; this, that, or the other*. **b.** Used to indicate the second of two alternatives, the first being preceded by *either* or *whether*: *Your answer is either ingenious or wrong. She didn't know whether to laugh or cry*. **c. Archaic.** Used to indicate the first of two alternatives, with the force of *either* or *whether*. **2.** Used to indicate a synonymous or equivalent expression: *acrophobia, or fear of great heights*. **3.** Used to indicate uncertainty or indefiniteness: *two or three*. [Middle English, from *other*, or (from Old English *other*, from *oththe*), and from *outher* (from Old English *āhwæther*, *āther*); see **EITHER**.]

USAGE NOTE: When all the elements in a series connected by *or* are singular, the verb they govern is singular: *Tom or Jack is coming. Beer, ale, or wine is included in the charge*. When all the elements are plural, the verb is plural. When the elements do not agree in number, some grammarians have suggested that the verb be governed by the element to which it is nearer: *Tom or his sisters are coming. The girls or their brother is coming. Cold symptoms or headache is the usual first sign*. Other grammarians, however, have argued that such constructions must be avoided and that substitutes be found in which the problem of agreement does not arise: *Either Tom is coming or his sisters are. The usual first sign may be either cold symptoms or a headache*. See Usage Note at **and/or**. See Usage Note at **either**. See Usage Note at **neither**. See Usage Note at **nor**¹.

or² (ôr) *Archaic. conj.* Before. Followed by *ever* or *ere*: “*I doubt he will be dead or ere I come*” (Shakespeare). — *prep.* Before. [Middle English, variant of *er*, from Old English *ǣr*, soon, early, and from Old Norse *ār*; see **ayer-** in Appendix.]

3. Color. The hue of that portion of the visible spectrum lying between red and yellow, evoked in the human observer by radiant energy with wavelengths of approximately 590 to 630 nanometers; any of a group of colors between red and yellow in hue, of medium lightness and moderate saturation. [Middle English, from Old French *pume orange*, translation and alteration (influenced by Orange, Orange, a town in France), of Old Italian *melarancio* : *mela*, fruit + *arancio*, orange tree (alteration of Arabic *nāranj*, from Persian *nārang*, from Sanskrit *nāraṅgaḥ*, possibly of Dravidian origin).] —**or'ange** *adj.*

WORD HISTORY: Oranges imported to China from the United States reflect a journey come full circle, for the orange had worked its way westward for cen-

turies, originating in China, then being introduced to India, and traveling on to the Middle East, into Europe, and finally to the New World. The history of the word *orange* keeps step with this journey only part of the way. The word is possibly ultimately of Dravidian origin, that is, it comes from a language or languages in a large non-Indo-European family of languages, including Tamil and Telugu, that are spoken in southern India and northern Sri Lanka. The Dravidian word or words were adopted into the Indo-European language Sanskrit with the form *nāraṅgaḥ*. As the fruit passed westward, so did the word, as evidenced by Persian *nārang* and Arabic *nāranj*. Arabs brought the first oranges to Spain, and the fruit rapidly spread throughout Europe. The important word for the development of our term is Old Italian *melarancio*, derived from *mela*, “fruit,” and *arancio*, “orange tree,” from Arabic *nāranj*. Old Italian *melarancio* was translated into Old French as *pume orange*, the *o* replacing the *a* because of the influence of the name of the town of Orange, from which oranges reached the northern part of France. The final stage of the odyssey of the word was its borrowing into English from the Old French form *orange*. Our word is first recorded in Middle English in a text probably composed around 1380, a time preceding the arrival of the orange in the New World.

[From *orgies*, secret rites, from Old French, from Latin *orgia*, from Greek. See **werg-** in Appendix.]

WORD HISTORY: The word *orgy* has become connected in the minds of many of us with unrestrained sexual activity, but its origins are much less licentious. We can trace the word as far back as the Indo-European root *werg-*, meaning “to do” and the source of our word *work*. Greek *orgia*, “secret rites, worship,” also comes from the root *werg-*, by way of the form *·worg-*. The Greek word was used with

reference to the worship and the rites practiced in the worship of various deities, such as Orpheus and Dionysus. The word in Greek did not denote sexual activity, although this was a part of some of the various rites. The rites of Dionysus, for example, included only music, dancing, drinking, and the eating of animal sacrifices. Having passed through Latin and Old French into English the word *orgy* is first recorded in English with reference to the secret rites of the Greek and Roman religions in 1589. It is interesting to note that the word is first recorded with its modern sense in 18th-century English and perhaps in 17th-century French. Whether this speaks to a greater licentiousness in society or not must be left to the historian, but certainly the religious nature of the word has gone into eclipse.

See **ōs-** in Appendix.] —**os'cil·la'tor** *n.* —**os'cil·la·to'ry** (-lə-tôr'ē, -tôr'ē) *adj.*

WORD HISTORY: The rather dry word *oscillate* may become a bit less dry as we learn its story. It is possible that it goes back to the Latin word *ōscillum*, a diminutive of *ōs*, "mouth," meaning "small mouth." In a passage in the *Georgics*, Virgil applies the word to a small mask of Bacchus hung from trees to move back and forth in the breeze. From this word *ōscillum* may have come another word *ōscillum*, meaning "something, such as a swing, that moves up and down or back and forth." And this *ōscillum* was the source of the verb *ōscillāre*, "to ride in a swing," and the noun (from the verb) *ōscillātio*, "the action of swinging or oscillating." The words have given us, respectively, our verb *oscillate*, first recorded in 1726, and our noun *oscillation*, first recorded in 1658. The next time one sees something oscillating, one might think of that small mask of Bacchus swinging

from a pine tree in the Roman countryside.

[Middle English *outlaue*, from Old English *ūtlaga*, from Old Norse *ūtlagi*, from *ūtlagr*, outlawed, banished : *ūt*, out; see **ud-** in Appendix + *lög*, law; see **leg-** in Appendix.] —**out'law'** *adj.*

WORD HISTORY: The word *outlaw* brings to mind cattle rustlers and gun-slingers of the Wild West, but it comes to us from a much earlier time, when guns were not yet invented but cattle stealing was. *Outlaw* can be traced back to the Old Norse word *ūtlagr*, “outlawed, banished,” made up of *ūt*, “out,” and *lög*, “law.” An *ūtlagi* (derived from *ūtlagr*) was someone outside the protection of the law. The Scandinavians, who invaded and settled in England during the 8th through the 11th century, gave us the Old English word *ūtlaga*, which designated someone who because of criminal acts must give up his property to the crown and could be killed without recrimination. The legal status of the outlaw became less severe over the course of the Middle Ages. However, the looser use of the word to designate criminals in general, which arose in Middle English, lives on in tales of the Wild West.

out·law·ry (out'lə'rē) *n. pl. out·law·ries. 1.* The act or process of outlawing or the state of having been outlawed. **2.** Defiance of the law. [Middle English *outlauerie*, from Anglo-Norman *utlagerie*, and from Medieval Latin *ūtlagāria* both from Old English *ūtlaga*, outlaw. See OUTLAW.]

ox·i·dase (ök'sī-dās', -dāz') *n.* Any of a group of enzymes that catalyze oxidation, especially an enzyme that reacts with molecular oxygen to catalyze the oxidation of a substrate. [OXID(ATION) + -ASE.] —**ox'i·da'sic** *adj.*

ox·i·da·tion (ök'sī-dā'shən) *n.* **1.** The combination of a substance with oxygen. **2.** A reaction in which the atoms in an element lose electrons and the valence of the element is correspondingly increased. [French, from *oxidier*, to oxidize, from *oxide*, oxide. See OXIDE.] —**ox'i·da'tive** *adj.* —**ox'i·da'tive·ly** *adv.*

ox·i·da·tion·re·duc·tion (ök'sī-dā'shən-rī-dük'shən) *n.* A chemical reaction in which an atom or ion loses electrons to another atom or ion. — *n.* *attributive.* Often used to modify another noun: *an oxidation-reduction reaction; oxidation-reduction equilibrium.*

oxidative phosphorylation (ök'sīd'ə-tīv fōs'fær-ə-lā'shən) *n.* The process in cell metabolism by which respiratory enzymes in the mitochondria synthesize ATP from ADP during the oxidation of reduced NAD by molecular oxygen.

oxide (ök'sīd') *n.* A binary compound of an element or a radical with oxygen. [French : *ox(ygène)*, oxygen; see OXYGEN + (*ac*)*ide*, acid (from Latin *acidus*, tart, acid); see ACID.] —**ox·id'ic** (ök-sīd'ik) *adj.*

ox·i·dize (ök'sī-dīz') *v.* **ox·i·dized, ox·i·diz·ing, ox·i·diz·es.** *Chemistry.* — *v. tr.* **1.** To combine with oxygen; make into an oxide. **2.** To increase the positive charge or valence of (an element) by removing electrons. **3.** To coat with oxide. — *v. intr.* To become oxidized. —**ox'i·diz'a·ble** *adj.* —**ox'i·di·za'tion** (-dī-zā'shən) *n.*

ox·i·diz·er (ök'sī-dī'zər) *n.* A substance that oxidizes another substance; an oxidizing agent. Also called *oxidant*

ox·i·do·re·duc·tase (ök'sī-dō-rī-dük'tās', -tāz') *n.* An enzyme that catalyzes an oxidation-reduction reaction. [OXID(ATION) + REDUCT(ION) + -ASE.]

ox·ime (ök'sēm) *n.* Any of a group of compounds containing a CNOH group, formed by treating aldehydes or ketones with hydroxylamine. [OX(O)- + IM(ID)E.]

ox·im·e·ter (ök-sím'ī-tər) *n.* A device for measuring the oxygen saturation of arterial blood. —**ox'i-met'ric** (-mēt'rik) *adj.* —**ox'i-met'ri-cal·ly** *adv.*
—**ox-im'e-try** *n.*

ox·lip (öks'líp') *n.* A Eurasian primrose (*Primula elatior*) having yellow flowers clustered in a one-sided umbel. [Middle English *oxeslippe*, from Old English *oxanslyppe*: *oxan*, genitive sing. of *oxa*, ox + *slyppe*, slimy substance; see **sleubh-** in Appendix.]

Ox·nard (öks'närd') A city of southern California west-northwest of Los Angeles on the Pacific coast. It is a commercial and industrial center. Population, 142,216.

oxo- or **ox-** *pref.* Oxygen: *oxime*. [From OXYGEN.]

Ox·on Hill (öks'sön hīl, -sən) A community of central Maryland, a suburb of Washington, D.C. Population, 35,794.

Ox·o·ni·an (ök-sō'nē-ən) *adj.* Of, relating to, or characteristic of Oxford or Oxford University. — *n.* **1.** A native or inhabitant of Oxford. **2.** A person who studies or has studied at Oxford University. [From Medieval Latin *Oxōnia*, Oxford, from Old English *Oxnaford*: *oxena*, genitive pl. of *oxa*, ox; see **OX** + *ford*, ford; see **FORD**.]

ox·tail (öks'täl') *n.* The tail of an ox, especially when used for food. —**ox'tail'** *adj.*

Ox·us (öks'səs) See **Amu Darya**.

oxy- *pref.* Oxygen, especially additional oxygen: *oxyacetylene*. [From OXYGEN.]

ox·y·a·cet·y·lene (öks'sē-ə-sět'l-īn, -ēn') *adj.* Of or using a mixture of acetylene and oxygen: *an oxyacetylene torch*.

ox·y·ac·id (öks'sē-äs'īd) *n.* An oxygen-containing acid.

ox·y·ceph·a·ly (öks'sē-sěf'ə-lē) *n. pl.* **ox·y·ceph·a·lies.** A congenital abnormality of the skull in which the top of the head assumes a conical or pointed shape. Also called *acrocephaly* [From Greek *oxukephalos*, sharp-headed: *oxus*, sharp; see **OXYGEN** + *-kephalos*, -cephalous.] —**ox'y-ce-phal'ic** (-sə-fäl'ik), **ox'y-ceph'a-lous** *adj.*

ox·y·co·done (öks'sī-kō'dōn') *n.* A narcotic alkaloid, C₁₈H₂₁NO₄, related to codeine, used as an analgesic and a sedative chiefly in the form of its hydrochloride salt. [From chemical name (*dihydrohydr*)*oxycod(ein)one*.]

ox·y·gen (öks'sī-jən) *n. Symbol O* A nonmetallic element constituting 21 percent of the atmosphere by volume that occurs as a diatomic gas, O₂, and in many compounds such as water and iron ore. It combines with most elements, is essential for plant and animal respiration, and is required for nearly all combustion. Atomic number 8; atomic weight 15.9994; melting point -218.4°C; boiling point

–183.0°C; gas density at 0°C 1.429 grams per liter; valence 2. [French *oxygène* : Greek *oxus*, sharp, acid; see **ak-** in Appendix + French *-gène*, *-gen.*]

—**ox'y-gen'ic** (-jĕn'ĭk) *adj.* —**ox'y-gen'i-cal-ly** *adv.* —**ox-yg'e-nous** (ök-sĭj'ə-nəs) *adj.*

ox·y·gen·ase (ök'sĭ-jə-nās', -nāz') *n.* An oxidoreductase that catalyzes the incorporation of molecular oxygen into its substrate.

ox·y·gen·ate (ök'sĭ-jə-nāt') also **ox·y·gen·ize** (-jə-nĭz') *v. tr.*

ox·y·gen·at·ed also **ox·y·gen·ized**, **ox·y·gen·at·ing** also **ox·y·gen·iz·ing**, **ox·y·gen·ates** also **ox·y·gen·iz·es**. To treat, combine, or infuse with oxygen.

—**ox'y-gen-a'tion** *n.* —**ox'y-gen-a'tor** *n.*

oxygen debt (ök'sĭ-jən dĕt) *n.* The amount of extra oxygen required by muscle tissue during recovery from vigorous exercise.

oxygen demand (ök'sĭ-jən dĭ-mānd') *n.* Biochemical oxygen demand.

oxygen mask (ök'sĭ-jən māsĭk) *n.* A masklike device placed over the mouth and nose and through which oxygen is supplied from an attached storage tank.

oxygen tent (ök'sĭ-jən tĕnt) *n.* A canopy placed over the head and shoulders or over the entire body of a patient to provide oxygen at a higher level than normal.

This cry, used to open a court. [Middle English, from Anglo-Norman, hear ye, imperative pl. of *oyer*, to hear, from Latin *audīre*. See **au-** in Appendix.]

WORD HISTORY: Hearing the cry “Oyez, oyez, oyez,” in a courtroom may have puzzled more than one auditor, especially if pronounced “O yes.” (Many people have thought that in fact it is like *O yes*.) This cry serves to remind us that up until the 18th century, speaking English in a British court of law was not required and one could instead use Law French, a form of French that evolved after the Norman Conquest, when Anglo-Norman became the language of the official class in England. *Oyez* descends from the Anglo-Norman *oyez*, the plural imperative form of *oyer*, “to hear”; thus *oyez* means “hear ye” and was used as a call for silence and attention. Although it would have been much heard in Medieval England, it is first recorded as an English word fairly late in the Middle English period, in a work composed around 1425.

pal (pāl) *Informal. n.* A friend; a chum. — *v. intr. palled, pal·ling, pals.* To associate as friends or chums. Often used with *around*. [Romany *phral, phal*; akin to Sanskrit *bhrātā*, brother. See **bhräter-** in Appendix.]

WORD HISTORY: *Pal*, like *buddy* and *chum*, has an informal, thoroughly “American” ring to it. One might think that *pal* had been a fixture in the English language forever. In fact, *pal* is a fairly recent acquisition from a rather exotic source—the language of the Gypsies. First recorded in English in the 17th century, *pal* was borrowed from Romany, the Indic language of the Gypsies, specifically from a word meaning “brother, comrade,” which occurs as *phal* in the Romany spoken in England and *phral* in the Romany spoken in Europe. Gypsies speak an Indic language because they originally migrated to Europe from the border region between Iran and India. In other Indic languages we find related words meaning “brother,” such as Hindustani *bhāi*, Prakrit *bhāda* or *bhāyā*, and Sanskrit *bhrātā*. All these terms trace their ancestry to the same Indo-European word that our word *brother* does.

WORD HISTORY: “But Dr. Brett cautioned that what sounds exciting from the Moon does not always pan out in the laboratory” (*London Daily Telegraph*, December 14, 1972). If Dr. Brett had been talking about hunting for gold on the moon, there would be a solid connection between his use of the expression *pan out* and its original use in gold mining. *Pan out*, like the verb *pan* itself, comes from the noun *pan* in the sense “a shallow circular metal vessel used in washing gold from gravel.” The expression *pan out* was used in a variety of senses, including “to wash gold-bearing earth in a pan”; “to obtain gold by washing ore in a miner’s pan”; and with reference to a mine or mineral-bearing soil, “to produce gold or minerals.” From such literal usages *pan out* was transferred to other situations. In Frederick Whymper’s *Travel and Adventure in the Territory of Alaska*, published in 1868, we are told that “‘It panned out well’ means that ‘it gave good returns.’” All these uses occurred first in American English, making the expression a true Americanism.

pan² (pän) *n.* **1.** A leaf of the betel vine. **2.** A chewing preparation of this leaf with betel nuts, spices, and lime, used in the Far East. [Hindi *pān*, from Sanskrit *parṇam*, feather, betel leaf. See **per-²** in Appendix.]

WORD HISTORY: It would seem unlikely that the name of a 4th-century Roman Catholic saint should be the ultimate source of a word for a modern article of clothing commonly worn by both men and women. *Pants*, however, can be traced back to Pantaleon, the patron saint of Venice. He became so closely associated with the inhabitants of that city that the Venetians became popularly known as *Pantalon*. Consequently, among the commedia dell'arte's stock characters the representative Venetian (a stereotypically wealthy but miserly merchant) was called *Pantalone*. His name in French, *Pantalon*, was borrowed into English (first recorded around 1590). During the middle of the 17th century the French came to identify him with one particular style of trousers, and this same style became known as *pantaloons* in English. *Pantaloons* was later applied to another style of trousers that came into fashion toward the end of the 18th century, tight-fitting garments that had begun to replace knee breeches. After that *pantaloons* was used to refer to trousers in general. The last step in the development of the word *pants* met with some resistance. This abbreviation of *pantaloons* was considered vulgar and, as Oliver Wendell Holmes put it, "a word not made for gentlemen, but 'gents.'" First found in the writings of Edgar Allan Poe in 1840, *pants* has replaced the "gentleman's word" in English and has lost all obvious connection to Saint Pantaleon.

WORD HISTORY: Perhaps the supreme example of the semantic process known as melioration is the word *paradise*. In tracing this word from its origins to its present status, we see an elevation, or melioration, of meaning that raises the word to new heights. The history begins with the Avestan (the eastern dialect of Old Iranian) word *pairi-daēza-*, “enclosure,” made up of *pairi*, “around,” and *daēza-*, “wall.” The Greek military leader and historian Xenophon, who served with Greek mercenaries in Persia, first used the Greek word *paradeisos* adopted from the Avestan word to refer to the Persian kings’ and nobles’ parks or pleasure grounds. This Greek word extended to mean “garden” or “orchard” was an obvious choice for translators of the Bible into Greek to use both for the Garden of Eden and the Abode of the Blessed, or heaven. The Greek word was adopted into Late Latin and was used much as we might expect in its biblical senses in ecclesiastical Latin (Late Latin *paradisus*). The Old English word *paradis* taken from Latin is found, but our word probably really established itself in Middle English (first recorded before 1200), derived both from Latin and from Old French, which had adopted the word from Latin.

par·a·jour·nal·ism (pär'ə-jûr'nə-lîz'əm) *n.* Subjective journalism that uses some of the techniques or license of fiction. — **par'·a·jour'nal·ist** *n.* — **par'·a·jour'nal·is'tic** *adj.*

par·a·keet (pär'ə-kēt') *n.* Any of various small slender parrots, usually having long tapering tails and often kept as pets. [Spanish *periquito*, probably diminutive of *Perico*, diminutive of *Pedro*, Peter.]

par·al·de·hyde (pə-räl'də-hīd') *n.* A colorless liquid polymer, C₆H₁₂O₃, of acetaldehyde, used as a solvent and a sedative.

par·a·le·gal (pär'ə-lē'gəl) *adj. Law.* Of, relating to, or being a person with specialized training who assists an attorney. — **par'·a·le'gal** *n.*

par·al·lax (pär'ə-läks') *n.* An apparent change in the direction of an object, caused by a change in observational position that provides a new line of sight. [French *parallaxe*, from Greek *parallaxis*, from *parallassein*, to change : *para-*, among; see *PARA*⁻¹ + *allassein*, to exchange (from *allos*, other); see *al*⁻¹ in Appendix.] — **par'·al·lac'tic** (-läk'tík) *adj.*

par·al·lel (pär'ə-lēl') *adj. Abbr. par. 1.* Being an equal distance apart everywhere: *dancers in two parallel rows. 2. Mathematics. a.* Of, relating to, or disig-

nating two or more straight coplanar lines that do not intersect. **b.** Of, relating to, or designating two or more planes that do not intersect. **c.** Of, relating to, or designating a line and a plane that do not intersect. **d.** Of, relating to, or designating curves or surfaces everywhere equidistant. **3. a.** Having comparable parts, analogous aspects, or readily recognized similarities: *the parallel lives of two contemporaries*. **b.** Having the same tendency or direction: *parallel motives and aims*. **4. Grammar.** Having identical or equivalent syntactic constructions in corresponding clauses or phrases. **5. Music.** Moving consistently by the same intervals: *harmony with parallel voices*. **6. Electronics.** Denoting a circuit or part of a circuit connected in parallel. **7. Computer Science. a.** Of or relating to the simultaneous transmission of all the bits of a byte over separate wires: *a parallel part; a parallel printer*. **b.** Of or relating to the simultaneous performance of multiple operations: *parallel processing*. — *adv.* In a parallel relationship or manner: *a road and a railway that run parallel*. — *n. Abbr. par.* **1. Mathematics.** One of a set of parallel geometric figures, such as lines or planes. **2. a.** One that closely resembles or is analogous to another: *a unique event, without parallel in history*. **b.** A comparison indicating likeness; an analogy. **3.** The condition of being parallel; near similarity or exact agreement in particulars; parallelism. **4.** Any of the imaginary lines representing degrees of latitude that encircle the earth parallel to the plane of the equator. **5. Printing.** A sign indicating material referred to in a note or reference. **6. Electronics.** An arrangement of components in a circuit that splits the current into two or more paths. Used chiefly in the phrase *in parallel*. — *v. tr.* **par-al-leled** also **par-al-lelled**, **par-al-lel-ing** also **par-al-lel-ling**, **par-al-lels** also **par-al-lels**. **1.** To make or place parallel to something else: *paralleled the ditch to the highway*. **2.** To be or extend parallel to: *a trail that parallels the crater rim*. **3.** To be similar or analogous to: *claimed that fetal development parallels the evolution of the species*. **4.** To be or provide an equal for; match. **5.** To show to be analogous; compare or liken: *critics who have paralleled the novel's plot to an ancient myth*. [Latin *parallēlus*, from Greek *parallēlos*: *para*, beside; see *PARA*⁻¹ + *allēlōn*, of one another (from *allos*, other); see **al**⁻¹ in Appendix.]

USAGE NOTE: In its mathematical usage *parallel* is an absolute term—two lines either do or do not intersect—and as such does not admit of qualification as to degree. Some grammarians have argued that this restriction should apply as well to nontechnical uses of the word. According to this logic, one may not say *The two roads have been made more parallel*, except perhaps as a loose way of saying what is rendered more precisely by expressions such as *more nearly parallel*. Like the analogous objection that has been made to the comparison of *equal*, the point betrays a misconception about the relation between mathematical concepts and their ordinary-language equivalents. Applied to objects in the world, *parallel* can

only denote a rough approximation to a geometric ideal. A pair of rails or parked cars cannot be truly parallel in the mathematician's sense of the term but only more or less so, just as a road or shelf cannot be truly straight in the geometric sense but nonetheless may be described as very straight or relatively straight. The grammarians' compunctions make even less sense when applied to metaphorical uses of *parallel*, as in *The difficulties faced by the Republicans are quite parallel to those that confronted the Democrats four years ago*, in which the intended meaning has nothing to do with the possibility of intersection but instead suggests the structural correspondence of two distinct situations. In this sense, parallelism is clearly a matter of degree and the word *parallel* can be modified accordingly. See Usage Note at **equal**. See Usage Note at **perfect**. See Usage Note at **unique**.

parallel bars (pär'ə-ləl' bärz) *pl.n.* *Sports.* An apparatus for gymnastic exercises consisting of two horizontal bars set parallel to each other in adjustable upright supports.

parallel cousin (pär'ə-ləl' küz'in) *n.* A cousin who is the child of one's mother's sister or one's father's brother.

par-al-lel-e-pi-ped (pär'ə-ləl'ə-pī'pid, -pī'pid) *n.* A solid with six faces, each a parallelogram and each being parallel to the opposite face. [Greek *parallēpipedon* : *parallēlos*, parallel; see PARALLEL + *epipedon*, plane surface, from neuter sing. of *epipedos*, level (*epi-*, *epi-* + *pedon*, ground); see **ped-** in Appendix.]

par-al-lel-ism (pär'ə-ləl'iz'əm) *n.* **1.** The quality or condition of being parallel; a parallel relationship. **2.** Likeness, correspondence, or similarity in aspect, course, or tendency. **3.** *Grammar.* The use of identical or equivalent syntactic constructions in corresponding clauses. **4.** *Philosophy.* The doctrine that to every mental change there corresponds a concomitant but causally unconnected physical alteration.

par-al-lel-o-gram (pär'ə-ləl'ə-gräm') *n.* A four-sided plane figure with opposite sides parallel. [Late Latin *parallēlogrammum*, from Greek *parallēlogrammon*, from neuter sing. of *parallēlogrammos*, bounded by parallel lines : *parallēlos*, parallel; see PARALLEL + *grammē*, line; see **gerbh-** in Appendix.]

pa-ral-o-gism (pə-räl'ə-jiz'əm) *n.* A fallacious or illogical argument or conclusion. [Late Latin *paralogismus*, from Greek *paralogismos*, from *paralogos*, unreasonable : *para-*, beyond; see PARA-¹ + *logos*, reason; see **leg-** in Appendix.]
—**pa-ral'o-gist** *n.* —**pa-ral'o-gis'tic** *adj.*

Par-a-lym-pic Games (pär'ə-lim'pik gāmz) *pl.n.* *Sports.* An international competition for physically impaired athletes. [PARA-¹ + (O)LYMPIC.]

—**par'a-lym'pi-an** *adj. & n.*

par-a-lyse (pär'ə-līz') *v.* *Chiefly British.* Variant of **paralyze**.

pa-ral-y-sis (pə-räl'i-sīs) *n. pl.* **pa-ral-y-ses** (-sēz'). **1. a.** Loss or impairment of the ability to move a body part, usually as a result of damage to its nerve sup-

ply. **b.** Loss of sensation over a region of the body. **2.** Inability to move or function; total stoppage or severe impairment of activity: *fear that led to national paralysis*. [Latin, from Greek *paralysus*, from *paraluein*, to disable, loosen : *para-*, on one side; see *PARA*⁻¹ + *luein*, to release; see **leu-** in Appendix.]

paralysis ag-i-tans (pə-räl'ī-sīs äj'ī-tänz') *n.* See **Parkinson's disease**.

[New Latin *paralysis agitans* : Latin *paralysis*, palsy + Latin *agitans*, present participle of *agitare*, to shake.]

par-a-lyt-ic (par'ə-līt'ik) *adj.* **1.** Of or relating to paralysis. **2.** Characteristic of or resembling paralysis. **3.** Affected with paralysis; paralyzed. — *n.* A person affected with paralysis. — **par'a-lyt'i-cal-ly** *adv.*

par-a-lyze (pär'ə-līz') *v. tr.* **par-a-lyzed, par-a-lyz-ing, par-a-lyz-es.** **1.** To affect with paralysis; cause to be paralytic. **2.** To make unable to move or act: *paralyzed by fear*. **3.** To impair the progress or functioning of; make inoperative or powerless: *strict regulations that paralyze economic activity*. [French *paralyser*, from *paralyse*, paralysis, from Old French, from Latin *paralysis*. See *PARALYSIS*.] — **par'a-ly-za'tion** (-lī-zā'shən) *n.* — **par'a-lyz'er** *n.* — **par'a-lyz'ing-ly** *adv.*

par-a-mag-net (pär'ə-mäg'nīt) *n.* A paramagnetic substance. [Back-formation from *PARAMAGNETIC*.]

par-a-mag-net-ic (pär'ə-mäg-nēt'ik) *adj.* Relating to or being a substance in which an induced magnetic field is parallel and proportional to the intensity of the magnetizing field but is much weaker than in ferromagnetic materials. — **par'a-mag-net'i-cal-ly** *adv.* — **par'a-mag/net-ism** (-mäg'nī-tīz'əm) *n.*

Par-a-mar-i-bo (pär'ə-mär'ə-bō') The capital and largest city of Suriname, on the Suriname River near its mouth on the Atlantic Ocean. Settled by the British from Barbados in the 1630's, it came under Dutch rule in 1815. Population, 67,905.

par-a-mat-ta or **par-ra-mat-ta** (pär'ə-mät'ə) *n.* A fine, lightweight, silk and wool or cotton and wool dress fabric. [After **Parramatta**.]

par-a-me-ci-um (pär'ə-mē'shē-əm, -sē-əm) *n. pl.* **par-a-me-ci-a** (-shē-ə, -sē-ə) or **par-a-me-ci-ums**. Any of various freshwater ciliate protozoans of the genus *Paramecium*, usually oval and having an oral groove for feeding. [New Latin *Paramecium*, genus name, from Greek *paramēkēs*, oblong in shape : *para-*, alongside; see *PARA*⁻¹ + *mēkos*, length; see **māk-** in Appendix.]

par-a-med-ic (pär'ə-mēd'ik) *n.* A person who is trained to give emergency medical treatment or assist medical professionals.

par-a-med-i-cal (pär'ə-mēd'ī-kəl) *adj.* Of, relating to, or being a person trained to give emergency medical treatment or assist medical professionals.

par-a-ment (pär'ə-mənt) *n. pl.* **par-a-ments** or **par-a-men-ta** (-mēn'tə). An ecclesiastical vestment or hanging. [From Middle English *paramentes*, ornamentation, adornments, from Old French *parement*, ornament, from Medieval Latin *parāmentum*, from *parāre*, to decorate, from Latin, to prepare. See *PARE*.]

pa·ram·e·ter (pə-rām'ī-tər) *n.* **1. Mathematics.** **a.** A constant in an equation that varies in other equations of the same general form, especially such a constant in the equation of a curve or surface that can be varied to represent a family of curves or surfaces. **b.** One of a set of independent variables that express the coordinates of a point. **2. a.** One of a set of measurable factors, such as temperature and pressure, that define a system and determine its behavior and are varied in an experiment. **b. Usage Problem.** A factor that restricts what is possible or what results: “*all the parameters of shelter—where people will live, what mode of housing they will choose, and how they will pay for it*” (New York). **c.** A factor that determines a range of variations; a boundary: *an experimental school that keeps expanding the parameters of its curriculum.* **3. Statistics.** A quantity, such as a mean, that is calculated from data and describes a population. **4. Usage Problem.** A distinguishing characteristic or feature. [New Latin *parametrum*, a line through the focus and parallel to the directrix of a conic : Greek *para-*, beside; see *PARA-*¹ + Greek *metron*, measure; see *-METER*.] —**par'a-met'ric** (pär'ə-mět'rik), **par'a-met'ri-cal** *adj.* —**par'a-met'ri-cal-ly** *adv.*

USAGE NOTE: In recent years *parameter* has become the archetype for the borrowing of scientific terms into general usage and as such has occasioned a good deal of skeptical comment. Some of its new uses can be justified as useful extensions of the technical senses of the word. For example, the provisions of a zoning ordinance that limit the height or density of new construction can be reasonably likened to mathematical parameters that establish the limits of other variables. Therefore one can properly say *The zoning commission announced new planning parameters for the historic Lamping district of the city.* But other uses suggest that the writer has not understood the technical sense and has chosen it primarily as a way of injecting an aura of scientific precision into what would otherwise be a pedestrian communication. Thus there is no semantic justification for using *parameter* as a general substitute for *characteristic*, as in *The Judeo-Christian ethic is one of the important parameters of Western culture*, an example found unacceptable by 80 percent of the Usage Panel. • Some of the difficulties with nontechnical use of *parameter* appear to arise from its resemblance to the word *perimeter*, with which it shares the sense “limit,” though the two words differ in their precise meaning. This confusion doubtless explains the use of *parameter* in a sentence such as *U.S. forces report that the parameters of the mine area in the Gulf are fairly well established*, where the word *perimeter* would have expressed the intended sense more exactly. This example of a use of *parameter* was unacceptable to 61 percent of the Usage Panel.

par·a·mil·i·tar·y (pär'ə-mīl'ī-tēr'ē) *adj.* Of, relating to, or being a group of civilians organized in a military fashion, especially to operate in place of or assist

regular army troops. — *n. pl.* **par·a·mil·i·tar·ies**. A member of a paramilitary force.

par·am·ne·sia (pär'äm-nē'zhə) *n.* **1.** A distortion of memory in which fantasy and objective experience are confused. **2.** An inability to recall the meanings of common words.

pa·ra·mo (pä'rə-mō', pä'rə-) *n. pl.* **pa·ra·mos**. A treeless alpine plateau of the Andes and tropical South America. [American Spanish *páramo*, from Spanish, wasteland.]

par·a·morph (pä'rə-môrf') *n.* A mineral crystal formed or affected by par-amorphism. Also called *allomorph*¹

par·a·mor·phine (pä'rə-môrf'fēn') *n.* See **thebaine**.

par·a·mor·phism (pä'rə-môrf'fīz'əm) *n.* Structural alteration of a mineral without change of chemical composition. — **par'a-mor'phic** (-fīk),

par'a-mor'phous (-fəs) *adj.*

par·a·mount (pä'rə-mount') *adj.* **1.** Of chief concern or importance: *tending first to one's paramount needs*. **2.** Supreme in rank, power, or authority. See Synonyms at **dominant**. — *n.* One that has the highest rank, power, or authority. [Anglo-Norman *paramont*, above : *par*, by (from Latin *per*); see **per**¹ in Appendix + *amont*, above, upward; see **AMOUNT**.] — **par'a-mount'cy** *n.*

— **par'a-mount'ly** *adv.*

Par·a·mount (pä'rə-mount') A city of southern California southeast of Los Angeles. Originally a dairy center, it became industrialized after the 1950's. Population, 47,669.

par·a·mour (pä'rə-mōr') *n.* A lover, especially one in an adulterous relationship. [Middle English, from *par amour*, by way of love, passionately, from Anglo-Norman : *par*, by (from Latin *per*); see **per**¹ in Appendix + *amour*, love (from Latin *amor*, from *amāre*, to love).]

Pa·ram·us (pə-rām'əs) A borough of northeast New Jersey northeast of Paterson. It is mainly residential. Population, 25,067.

par·am·y·lum (pä-rām'ə-ləm) also **par·am·y·lon** (-lən) *n.* A carbohydrate resembling starch that is composed of glucose and forms the reserve foodstuff of certain algae.

par·a·myx·o·vi·rus (pä'rə-mīk'sə-vī'rəs) *n. pl.* **par·a·myx·o·vi·rus·es**. Any of a group of viruses that contain RNA and are similar to but larger and more variable in size than the related myxovirus. The paramyxoviruses include the Sendai virus, the parainfluenza viruses, and the viruses that cause measles and mumps.

Pa·ra·ná (pä'rə-nä', pä'rä-) A city of northeast Argentina on the Paraná River north of Rosario. It is a river port accessible for oceangoing vessels. Population, 161,638.

Pa-ra-na-í-ba (pǎr'ə-nə-ē'bə, pǎ'rä-nä-ē'bä) A river, about 805 km (500 mi) long, of south-central Brazil. It is one of the headstreams of the Paraná River.

Pa-ra-ña-que (pǎ'rä-nyä'kë) A city of southwest Luzon Island, Philippines, a residential suburb of Manila on southeast Manila Bay. Population, 208,552.

Paraná River (pǎr'ə-nä' rĭv'ər) A river of central South America rising in east-central Brazil at the confluence of the Rio Grande and the Paranaíba and flowing about 2,896 km (1,800 mi) generally southwest to its junction with the Paraguay River then south and east to join the Uruguay River and form the Río de la Plata estuary in eastern Argentina. It was first ascended by Sebastian Cabot in 1526.

pa-rang (pǎ'rǎng') *n.* A short, heavy, straight-edged knife used in Malaysia and Indonesia as a tool and weapon. [Malay.]

par-a-noi-a (pǎr'ə-noi'ə) *n.* **1.** A psychotic disorder characterized by delusions of persecution or grandeur, often strenuously defended with apparent logic and reason. **2.** Extreme, irrational distrust of others. [Greek, madness, from *para-noos*, demented : *para-*, beyond; see *PARA*⁻¹ + *nous, noos*, mind.]

par-a-noi-ac (pǎr'ə-noi'äk', -noi'ĭk) *n.* A paranoid. — *adj.* Of, relating to, or resembling paranoia.

par-a-noid (pǎr'ə-noid') *adj.* **1.** Relating to, characteristic of, or affected with paranoia. **2.** Exhibiting or characterized by extreme fear or distrust of others: *a paranoid suspicion that the phone might be bugged.* — *n.* One affected with paranoia.

par-a-nor-mal (pǎr'ə-nôr'məl) *adj.* Beyond the range of normal experience or scientific explanation: *such paranormal phenomena as telepathy; a medium's paranormal powers.* — **par'a-nor-mal'i-ty** (-nôr-mäl'ĭ-tē) *n.* — **par'a-nor'mal-ly** *adv.*

par-a-pa-re-sis (pǎr'ə-pə-rē'sĭs, -pǎr'ĭ-sĭs) *n. pl.* **par-a-pa-re-ses** (-sēz). Partial paralysis of the lower extremities.

par-a-pet (pǎr'ə-pĭt, -pĕt') *n.* **1.** A low protective wall or railing along the edge of a raised structure such as a roof or balcony. **2.** An earthen or stone embankment protecting soldiers from enemy fire. See Synonyms at **bulwark**. [French, from Italian *parapetto* : *parare*, to shield; see *PARASOL* + *petto*, chest (from Latin *pectus*).]

par-aph (pǎr'əf, pə-rǎf') *n.* A flourish made after or below a signature, originally to prevent forgery. [French *paraphe*, from Old French *paraffe*, abbreviated signature, from Medieval Latin *paraphus*, paragraph sign, short for *paragraphus*. See *PARAGRAPH*.]

par-a-pher-na-lia (pǎr'ə-fər-nāl'yə, -fə-nāl'yə) *pl.n.* (*used with a sing. or pl. verb*). **1.** Personal belongings. **2.** The articles used in a particular activity; equipment: *a photographer's paraphernalia*. See Synonyms at **equipment**. **3. Law.** A married woman's personal property exclusive of her dowry, according to com-

mon law. [Medieval Latin *paraphernālia*, neuter pl. of *paraphernālis*, pertaining to a married woman's property exclusive of her dowry, from Late Latin *parapherna*, a married woman's property exclusive of her dowry, from Greek : *para-*, beyond; see *PARA*⁻¹ + *phernē*, dowry; see **bher**⁻¹ in Appendix.]

par·a·phrase (pär'ə-frāz') *n.* **1.** A restatement of a text or passage in another form or other words, often to clarify meaning. **2.** The restatement of texts in other words as a studying or teaching device. — *v.* **par·a·phrased**, **par·a·phras·ing**, **par·a·phras·es**. — *v. tr.* To restate in a paraphrase. — *v. intr.* To compose a paraphrase. [French, from Latin *paraphrasis*, from Greek, from *paraphrazein*, to paraphrase : *para-*, alongside; see *PARA*⁻¹ + *phrazein*, to show, explain; see **g^whren-** in Appendix.] — **par'·a·phras'·a·ble** *adj.*

—**par'·a·phras'er** *n.*

par·a·phras·tic (pär'ə-fräs'tik) or **par·a·phras·ti·cal** (-tī-kəl) *adj.* Of, relating to, or having the nature of paraphrase. [Medieval Latin *paraphrasticus*, from Greek *paraphrastikos*, from *paraphrazein*, to paraphrase. See *PARAPHRASE*.]

—**par'·a·phras'ti·cal·ly** *adv.*

pa·raph·y·sis (pə-räf'i-sis) *n. pl. pa·raph·y·ses* (-sēz'). One of the erect, sterile filaments often occurring among the reproductive organs of certain fungi, algae, and mosses. [New Latin : *PARA*⁻¹ + Greek *phusis*, nature, growth; see *PHYSIC*.]

par·a·ple·gi·a (pär'ə-plē'jē-ə, -jə) *n.* Complete paralysis of the lower half of the body including both legs, usually caused by damage to the spinal cord. [Greek *paraplēgiē*, hemiplegia, from *paraplēssesthai*, to be paralyzed, from *paraplēssein*, to strike on one side : *para-*, beside; see *PARA*⁻¹ + *plēssein*, to strike; see **plāk**⁻² in Appendix.] — **par'·a·ple'gic** (-plē'jīk) *adj. & n.*

par·a·po·di·um (pär'ə-pō'dē-əm) *n. pl. par·a·po·di·a* (-dē-ə). One of the fleshy paired appendages of polychete annelids that function in locomotion and breathing.

par·a·prax·is (pär'ə-prāk'sis) *n. pl. par·a·prax·es* (-prāk'sēz). *Psychology.* A minor error, such as a slip of the tongue, thought to reveal a subconscious motive. [*PARA*⁻¹ + Greek *praxis*, act, action; see *PRAXIS*.]

par·a·pro·fes·sion·al (pär'ə-prə-fēsh'ə-nəl) *n.* A trained worker who is not a member of a given profession but assists a professional. — *adj.* Of, relating to, or performing the work of a paraprofessional.

par·a·psy·chol·o·gy (pär'ə-sī-kōl'ə-jē) *n.* The study of the evidence for psychological phenomena, such as telepathy, clairvoyance, and psychokinesis, that are inexplicable by science. — **par'·a·psy'cho·log'i·cal** (-sī'kə-lōj'i-kəl) *adj.*

—**par'·a·psy·chol'o·gist** *n.*

par·a·quat (pär'ə-kwöt') *n.* A colorless compound, $C_{12}H_{14}Cl_2N_2$, or a related yellow compound, $C_{12}H_{14}N_2(CH_3SO_4)_2$, used as a herbicide. [*PARA*⁻¹ + *QUAT*(ERNARY).]

Pa-rá rubber (pə-rä' rüb'ər, pä'rə) *n.* Rubber obtained from various tropical South American trees of the genus *Hevea*, especially *H. brasiliensis*. [After Pará, a state of northern Brazil.]

par-a-sail (pä'rə-säl') *n.* A special parachute with winglike extensions that lifts a rider in its harness up and through the air when towed by an automobile or motorboat. — *v. intr.* **par-a-sailed, par-a-sail-ing, par-a-sails.** To be pulled into the air while harnessed to such a parachute. — **par'a-sail'er** *n.*

par-a-sang (pä'rə-säng') *n.* An ancient Persian unit of distance, usually estimated at 3.5 miles (5.6 kilometers). [Latin *parasanga*, from Greek *parasangēs*, of Iranian origin.]

par-a-se-le-ne (pä'rə-sī-lē'nē) *n. pl. par-a-se-le-nae* (-nē). A luminous spot on a lunar halo. [PARA-¹ + Greek *selēnē*, moon.] — **par'a-se-le'nic** (-lē'nīk, -lən'īk) *adj.*

par-a-sen-so-ry (pä'rə-sən'sə-rē) *adj.* Extrasensory. — **par'a-sen-so'ri-ly** (-sôr'ə-lē, -sōr'-) *adv.*

par-a-sex-u-al (pä'rə-sək'shōō-əl) *adj.* Of, relating to, or involving a form of reproduction in which recombination of genes from different individuals occurs without meiosis and fertilization. — **par'a-sex'u-al'i-ty** (-äl'ī-tē) *n.*

par-a-site (pä'rə-sīt') *n.* **1. Biology.** An organism that grows, feeds, and is sheltered on or in a different organism while contributing nothing to the survival of its host. **2. a.** One who habitually takes advantage of the generosity of others without making any useful return. **b.** One who lives off and flatters the rich; a sycophant. **3.** A professional dinner guest, especially in ancient Greece. [Latin *parasītus*, a person who lives by amusing the rich, from Greek *parasitos*, person who eats at someone else's table, parasite : *para-*, beside; see PARA-¹ + *sitos*, grain, food.]

par-a-sit-ic (pä'rə-sīt'īk) also **par-a-sit-i-cal** (-ī-kəl) *adj.* **1.** Of, relating to, or characteristic of a parasite. **2.** Caused by a parasite: *parasitic diseases*. — **par'a-sit'i-cal-ly** *adv.*

par-a-sit-i-cide (pä'rə-sīt'ī-sīd') *n.* An agent or a preparation used to destroy parasites. — *adj.* Destructive to parasites. — **par'a-sit'i-ci'dal** (-sīd'l) *adj.*

par-a-sit-ism (pä'rə-sī-tīz'əm, -sī-) *n.* **1.** The characteristic behavior or mode of existence of a parasite or parasitic population. **2.** Parasitosis.

par-a-sit-ize (pä'rə-sī-tīz', -sī-) *v. tr.* **par-a-sit-ized, par-a-sit-iz-ing, par-a-sit-iz-es.** To live on or in (a host) as a parasite.

par-a-sit-oid (pä'rə-sī-toīd', -sī'toid) *n.* Any of various insects, such as the ichneumon fly, whose larvae are parasites that eventually kill their hosts. — *adj.* Of or relating to a parasitic insect of this kind.

par-a-si-tol-o-gy (pä'rə-sī-tōl'ə-jē, -sī-) *n.* The scientific study of parasitism. — **par'a-si'to-log'ic** (-sī'tə-lōj'īk), **par'a-si'to-log'i-cal** (-ī-kəl) *adj.* — **par'a-si-tol'o-gist** *n.*

par·a·si·to·sis (pǎr'ə-sī-tō'sīs, -sī-) *n.* *pl.* **par·a·si·to·ses** (-sēz). A disease resulting from parasitic infestation.

[Middle English, from Old French, from Latin *parēns*, *parent-* from past active participle of *parere*, to give birth. See **perə**⁻¹ in Appendix.] —**par'ent-hood'** *n.*

USAGE NOTE: The Usage Panel is better disposed to accept the verb *parent* than in previous surveys, though a majority continues to find it unacceptable. In 1968 it was acceptable to only 19 percent of the Panel; in the most recent survey 45 percent accepted it in the sentence *In looking for foster homes, we give preference first to relatives and second to families with prior experience in parenting.* • The use of the verb *parent* to mean “act as a parent to” is not entirely new: it occurs as early as 1884 in a metaphorical context. But its use in a literal sense with respect to children is a recent development and reflects a modern reconceptualization of family life. The word is not completely synonymous with the traditional expres-

sion *raise a child*, though the precise nature of the differences may depend on the context. For some speakers, use of the word suggests a self-conscious shift from child to parent as the focus of the parental relationship, and it may be this implication that feeds critical reservations about the verb. But the usage also reflects a widespread practical realization that the activities required of a parent extend well beyond the direct interaction with the child emphasized in *child raising*. Thus the *parenting* classes for young parents offered by schools and state agencies encompass not only the activities traditionally associated with raising a child but also topics such as personal self-sufficiency, household financial management, and methods of dealing with schools and health care agencies. See Usage Note at **father**.

pa·ri·ah (pə-rī'ə) *n.* **1.** A social outcast: “*Shortly Tom came upon the juvenile pariah of the village, Huckleberry Finn, son of the town drunkard*” (Mark Twain).

2. A member of a low caste of agricultural and domestic workers in southern India and Burma. [Tamil *paṛaiyar*, *pl.* of *paṛaiyan*, pariah caste, from *paṛai*, festival drum.]

WORD HISTORY: In the word *pariah*, which can be used for anyone who is a social outcast, independent of social position, we have a reminder of a much more rigid social system, where only certain people could be pariahs. The caste system of India placed members of the pariah caste very low in society; until 1949 they were also known as *untouchables*. The word *pariah*, however, which we have extended in meaning, came into English from Tamil *paṛaiyar*, the plural of *paṛaiyan*, the caste name, which literally means “(hereditary) drummer” and comes from the word *paṛai*, the name of a drum used at certain festivals. The word is first recorded in English in 1613. Its use in English and its extension in use probably owe much to the close relationship that developed between Great Britain and India. Indeed, many of the British servants in India were from the pariah caste.

par-ti-ci-ple (pär'ti-sīp'əl) *n.* *Abbr. p. Grammar.* A form of a verb that in some languages, such as English, can function independently as an adjective, as the past participle *baked* in *We had some baked beans*, and is used with an auxiliary verb to indicate tense, aspect, or voice, as the past participle *baked* in the passive sentence *The beans were baked too long.* [Middle English, from Old French, variant of *participe*, from Latin *participium*, from *particeps*, *particip-*, partaker. See **PARTICIPATE.**]

USAGE NOTE: The “dangling participle” is quite common in speech, where it often passes unremarked; but its use in writing can lead to unintentional absurdities, as in *He went to watch his horse take a turn around the track carrying a copy of the breeders' guide under his arm.* Even when the construction occasions no ambiguity, it is likely to distract the reader, who will ordinarily be operating on the assumption that a participle or other modifying phrase will be associated with the noun phrase that is immediately adjacent to it. Thus the sentence *Turning the corner, the view was quite different* would be better rewritten as *The view was quite different when we turned the corner* or *Turning the corner, we saw a different view.*

• A number of expressions originally derived from active participles are now well established as prepositions of a kind, and these may be used freely to introduce phrases that are not associated with the immediately adjacent noun phrase. Such expressions include *concerning*, *considering*, *failing*, *granting*, *judging by*, and *speaking of*. Thus one may write *Speaking of politics, the elections have been postponed* or *Considering the hour, it is surprising that he arrived at all.*

par-ti-cle (pär'ti-kəl) *n.* *Abbr. part. 1.* A very small piece or part; a tiny portion or speck. **2.** A very small or the smallest possible amount, trace, or degree: *not a particle of doubt.* **3. side, group, from Old French, from feminine past participle of *partir*, to divide, from Latin *partire*, from *pars*, *part-*, part. See PART.]

USAGE NOTE: *Party* is unexceptionable when used to refer to a participant in a social arrangement, as in *She was not named as a party in the conspiracy*. It is this sense that underlies the legal use of the term, as when one speaks of the *parties to a contract*. The legal use has in turn led to the presence of the word in many fixed expressions, such as *injured party* and *third party*. But *party* is also widely used as a general substitute for *person*, as in *Would all parties who left packages at the desk please reclaim their property*. This usage has been established for many centuries, but in the Victorian era it came to be associated with the language of the semieducated (the *Oxford English Dictionary* describes it as “shoppy”), and it has been the subject of many later criticisms. This use of *party* may have been reinforced by its modern adoption by telephone operators. In other contexts, when used in earnest, it may be perceived as a superfluous variant for *person*. But the jocular use of the term is well established, particular in references such as *a wise old party*.

[Middle English *paien*, from Old French *paiier*, from Late Latin, to appease, from Latin *pācāre*, to pacify, from *pāx*, *pāc-*, peace. See **pag-** in Appendix.]

WORD HISTORY: Given the unpeaceful feelings one often has in paying bills or income taxes, it is difficult to believe that the word *pay* ultimately derives from the Latin word *pāx*, “peace.” However, it is not the peace of the one who pays that is involved in this development of meaning. From *pāx*, meaning “peace” and also “a settlement of hostilities,” was derived the word *pācāre*, “to impose a settlement on peoples or territories.” In Late Latin *pācāre* was extended in sense to mean “to appease.” The Old French word *paiier* that developed from Latin *pācāre* came to have the specific application “to pacify or satisfy a creditor,” a sense that came into Middle English along with the word *paien* (first recorded around the beginning of the 13th century), the ancestor of our word *pay*.

WORD HISTORY: In an age when we can speak of *peeping Tom cameras* or *electronic peeping Toms* we have indeed come far from the time of the legendary peeping Tom. Godgifu (fl. 1040-1080), Lady Godiva to us, pledged her legendary ride as a means of persuading her husband, Leofric, Earl of Mercia, to lower taxes. In the original version of the story she was observed by all the townspeople as she disrobed, but in a much later version of the story a tailor or butcher named Tom was the only person to observe her as she rode by, everyone else having shuttered their windows as they had been asked. *Peeping Tom*, first recorded around 1796, has become a term for a voyeur, not at all a pleasant fate for this legendary fellow. As W.H. Auden has said, "Peeping Toms Are never praised, like novelists or bird watchers,/For their keenness of observation."

See APPEND.]

WORD HISTORY: The word *penthouse* and the structure it denotes have both come a long way. The word goes back to Latin *appendere*, "to cause to be suspended." In Medieval Latin *appendere* developed the sense "to belong, depend," a sense that passed into *apendre*, the Old French development of *appendere*. From *apent*, the past participle of *apendre*, came the derivative *apentiz*, "low building behind or beside a house," and the Anglo-Norman plural form *pentiz*. The form without the *a-* was then borrowed into Middle English, giving us *pentis* (first recorded about 1300), which was applied to sheds or lean-tos added on to buildings. Because these structures often had sloping roofs, the word was connected with the French word *pente*, "slope," and the second part of the word changed to *house*, which could mean simply "a building for human use." The use of the term with reference to fancy penthouse apartments developed from the application of the word to a structure built on the roof to cover such things as a stairway or an elevator shaft. *Penthouse* then came to mean an apartment built on a rooftop and

finally the top floor of an apartment building.

[Middle English *peple*, from Old French *pueple*, from Latin *populus*, of Etruscan origin.] — **peo'pler** *n.*

USAGE NOTE: Used as a plural *people* is a form with no exactly corresponding singular. (English is not odd in this respect: the equivalent word is anomalous in Spanish, Italian, Russian, and many other languages.) In the past, grammarians have sometimes insisted that *people* is a collective noun that should not be used as a substitute for *persons* when referring to a specific number of individuals, as in *Six people were arrested.* But *people* has always been used in such contexts, and the distinction is now so widely ignored in general writing that it seems pedantic to insist on it. *Persons* is still preferred in quasilegal contexts, however, as in *Vehicles containing fewer than three persons may not use the left lane during rush hours.* Only the singular *person* is used in compounds involving a specific numeral: *a six-person car; a two-person show.* But *people* is used in other compounds: *people mover; people power.* These examples are exceptions to the general rule that plural nouns cannot be used in such compounds; note that we do not say *teethpaste* or *books-burning.* See Usage Note at **man**.

peo·ple·hood (pē'pəl-hōd') *n.* The state or condition of being a people or one of a people: "*As symbols go, few are as national and sectarian as the menorah. It is the symbol of Jewish peoplehood*" (Charles Krauthammer).

per-cent also **per cent** (pər-sěnt') *adv. Abbr. p.c., pct.* Out of each hundred; per hundred. — *n.* **1. pl. percent** also **per cent**. One part in a hundred: *The report states that 42 percent of the alumni contributed to the endowment.* Also called *per centum* **2. pl. percents**. A percentage or portion: *She has invested a large percent of her salary.* **3. percents.** *Chiefly British.* Public securities yielding interest at a specified percentage. — *adj.* Paying or demanding interest at a specified percentage: *a 52 percent checking account.* [From *per cent.*, abbreviation of *per centum*, by the hundred : *per*, *per*; see PER + *centum*, hundred; see **dekṃ** in Appendix.]

USAGE NOTE: Statistically speaking, a quantity can be increased by any percentage but cannot be decreased by more than 100 percent. Once pollution has been reduced by 100 percent, for example, it ceases to exist, and no further reduction is possible. In defiance of this logic, however, advertisers sometimes refer

to a 150 percent decrease in lost luggage or a new dental rinse that reduces plaque on teeth by over 300 percent. On reflection, it is possible to infer the intended meaning in these examples—presumably the rinse is three times as effective as some other tooth-cleaning procedure—but the ostensible claim is logically nonsensical, and the phrasing serves mostly to obscure the fact that the standard of comparison has not been made explicit. The latter phrase was unacceptable to 66 percent of the Usage Panel.

per-cent-age (pər-sĕn/ˈtj) *n.* **1. a.** A fraction or ratio with 100 understood as the denominator; for example, 0.98 equals a percentage of 98. **b.** The result obtained by multiplying a quantity by a percent. **2.** A proportion or share in relation to a whole; a part: *The hecklers constituted only a small percentage of the audience.* **3.** An amount, such as an allowance, a duty, or a commission, that varies in proportion to a larger sum, such as total sales: *work for a percentage.* **4. Informal.** Advantage; gain: *There is no percentage in work without pay.*

USAGE NOTE: *Percentage*, when preceded by *the*, takes a singular verb: *The percentage of unskilled workers is small.* When preceded by *a*, it takes either a singular or plural verb, depending on the number of the noun in the prepositional phrase that follows: *A small percentage of the workers are unskilled. A large percentage of the crop has spoiled.*

per-cen-tile (pər-sĕn/ˈtīl) *n.* One of a set of points on a scale arrived at by dividing a group into parts in order of magnitude. For example, a score higher than 97 percent of those attained on an examination is said to be in the 97th percentile.

per cen-tum (pər sĕn/ˈtəm) *n.* See **percent** (*n.*, sense 1). [Latin. See **PERCENT.**]

per-cept (pûr/ˈsĕpt) *n.* **1.** The object of perception. **2.** A mental impression of something perceived by the senses, viewed as the basic component in the formation of concepts; a sense datum. [From Latin *perceptum*, neuter past participle of *percipere*, to perceive. See **PERCEIVE.**]

per-cep-ti-ble (pər-sĕp/ˈtə-bəl) *adj.* Capable of being perceived by the senses or the mind: *perceptible sounds in the night.* [Late Latin *perceptibilis*, from Latin *perceptus*, past participle of *percipere*, to perceive. See **PERCEIVE.**]

—**per-cep/ˈti-bil/ˈi-ty** *n.* —**per-cep/ˈti-bly** *adv.*

SYNONYMS: *perceptible, palpable, appreciable, noticeable, discernible.* These adjectives apply to what is capable of being apprehended with the mind or through the senses as being real. *Perceptible* is the least specific: *After quite a perceptible pause, during which he consulted his notes, the lecturer continued.* *Palpable* applies both to what is perceptible by means of the sense of touch and to what is readily perceived by the mind: *“I felt as if my soul were grappling with a palpable enemy”*

(Mary Wollstonecraft Shelley). “*The advantages Mr. Falkland possessed... are pal- pable*” (William Godwin). What is *appreciable* is capable of being estimated or measured: *Appreciable amounts of noxious waste are still being dumped into the harbor. Noticeable* means easily observed: *noticeable shadows under her eyes; a no- ticeable tremor in his voice. Discernible* means distinguishable, especially by the faculty of vision or the intellect: *The skyline is easily discernible even at a distance of several miles. The newspaper reports no discernible progress in the negotiations.*

- per-cep-tion** (pər-sĕpʹshən) *n.* **1.** The process, act, or faculty of perceiving. **2.** The effect or product of perceiving. **3. Psychology.** **a.** Recognition and inter- pretation of sensory stimuli based chiefly on memory. **b.** The neurological pro- cesses by which such recognition and interpretation are effected. **4. a.** Insight, intuition, or knowledge gained by perceiving. **b.** The capacity for such insight. [Middle English *percepcioun*, from Old French *percepcion*, from Latin *perceptiō*, *perceptiōn-*, from *perceptus*, past participle of *percipere*, to perceive. See PERCEIVE.]

SYNONYMS: *perfect, consummate, faultless, flawless, impeccable.* The central meaning shared by these adjectives is “being wholly without flaw”: *a perfect diamond; a consummate performer; faultless logic; a flawless instrumental technique; speaks impeccable French.*

ANTONYM: *imperfect*

USAGE NOTE: *Perfect* has often been described as an absolute term like *chief* and *prime*, hence not allowing modification by *more*, *quite*, *relatively*, and other qualifiers of degree. But the qualification of *perfect* has numerous reputable precedents (most notably in the preamble to the U.S. Constitution in the phrase “*in order to form a more perfect Union*”). What is more, the stricture is philosophically dubious. There can be no mathematically perfect forms in nature; therefore to say that any actual circle is “perfect” can mean only that it approximates the geometric ideal of circularity, a quality that it can obviously have to a greater or lesser degree. By the same token, *perfect* freely allows comparison in examples such as *There could be no more perfect spot for the picnic*, where it is used to mean “ideal for the purposes.” See Usage Note at **complete**. See Usage Note at **equal**. See Usage Note at **parallel**. See Usage Note at **unique**.

[Middle English *performen*, from Anglo-Norman *performer*, from Old French *parfornir* : *par-*, intensive pref. (from Latin *per-*, *per-*) + *fournir*, to furnish; see **FURNISH**.] — **per-form'a-ble** *adj.* — **per-form'er** *n.*

SYNONYMS: *perform, execute, accomplish, achieve, effect, fulfill, discharge.* These verbs signify to carry through to completion. To *perform* is to carry out an action, an undertaking, or a procedure; the word often connotes observance of due form or the exercise of skill or care: *The ship's captain performed the wedding*

ceremony. The orchestra and chorus performed an Easter oratorio. Sophisticated laser experiments are performed regularly in the laboratory. Execute implies performing a task or putting something into effect in accordance with a plan or design: “To execute laws is a royal office; to execute orders is not to be a king” (Edmund Burke). The violinist had the technical skill to execute the cadenza, with its double stops and harmonics, with brilliance. Accomplish connotes the successful completion of something, often of something that requires tenacity or talent: “Make one brave push and see what can be accomplished in a week” (Robert Louis Stevenson). He accomplished his purpose, the rapid acquisition of enormous profits, only by making risky investments. To achieve is to accomplish something especially by dint of effort or despite difficulty; the term often implies a significant result: “Some are born great... Some achieve greatness... And some have greatness thrust upon them” (Shakespeare). Greater benefits can be achieved through diplomatic channels than by acts of aggression. Effect suggests the power of an agent to bring about a desired result: Even the antibiotics the doctor prescribed didn’t effect a complete cure. To fulfill is to live up to expectations or satisfy demands, wishes, or requirements: It is unrealistic to hope that all one’s desires can be fulfilled. She fulfilled her obligations to her parents. To discharge an obligation or duty is to perform all the steps necessary for its fulfillment: “I have found it impossible to carry the heavy burden of responsibility and to discharge my duties as King as I would wish to do” (Edward VIII).

For example, $7 = 0.142857142857\dots$ has a six-digit period. **15. Chemistry.** A sequence of ele-

ments arranged in order of increasing atomic number and forming one of the horizontal rows in the periodic table. — *adj.* Of, belonging to, or representing a certain historical age or time: *a period piece; period furniture.* [Middle English *periode*, from Old French, from Medieval Latin *periodus*, from Latin *perihodos*, rhetorical period, from Greek *periodos*, circuit : *peri-*, *peri-* + *hodos*, way.]

SYNONYMS: *period, epoch, era, age, term.* These nouns refer to a portion or length of time. *Period* is the most general: *a short waiting period; one of the most difficult periods of her life; worked for a period of ten years; the Romantic period in music.* *Epoch* refers to a period regarded as being remarkable or memorable: “*We enter on an epoch of constitutional retrogression*” (John R. Green). An *era* is a period of time notable because of new or different aspects or events: “*How many a man has dated a new era in his life from the reading of a book*” (Henry David Thoreau). An *age* is usually a period marked by a particular distinctive characteristic: *the age of Newton; the Iron Age.* “*These principles form the bright constellation which has... guided our steps through an age of revolution and reformation*” (Thomas Jefferson). A *term* is a period of time to which limits have been set: *Senators are elected for a term of six years.*

WORD HISTORY: Perhaps more than once one may have wondered why the word *period* has the sense “punctuation mark (.)” as well as some of its other senses having to do with time. The answer to this question lies in the senses of the Greek word *periodos* from which our word is descended. *Periodos*, made up of *peri-*, “around,” and *hodos*, “way,” meant such things as “going round, way round, going round in a circle, circuit,” and with regard to time “cycle or period of time.” The word also meant “the period of menstruation.” In rhetoric it referred to “a group of words organically related in grammar and sense.” The Greek word was adopted into Latin as *perihodos* with only its rhetorical sense and one other sense, but in Medieval Latin it reacquired senses it had in Greek, such as “cycle,” and acquired a new sense, “a punctuation mark used at the end of a rhetorical period.” Although this sense is recorded in Medieval Latin, it is not recorded in English until 1609. But the word *period* had entered Middle English from Medieval Latin and Old French, first being recorded in a work written around 1425 in the sense “a cycle of recurrence of a disease.”

pe·ri·od·ic (pĭr'ē-ōd'ĭk) *adj.* **1.** Having or marked by repeated cycles. **2.** Happening or appearing at regular intervals. **3.** Recurring or reappearing from time to time; intermittent. **4.** Characterized by periodic sentences.
—**pe'ri-od'i-cal-ly** *adv.*

SYNONYMS: *periodic, sporadic, intermittent, occasional, fitful.* These adjectives all mean recurring or reappearing now and then. Something *periodic* occurs at

regular or at least generally predictable intervals: *periodic feelings of anxiety*. *Sporadic* implies appearance or occurrence in scattered, irregular, unpredictable, or isolated instances: *a city subjected to sporadic bombing raids*. *Intermittent* describes something that stops and starts at intervals: *intermittent rain showers*. What is *occasional* happens at random and irregularly: *occasional outbursts of temper*. Something *fitful* occurs in spells and often abruptly: *fitful bursts of energy*.

USAGE NOTE: *Periodic* has long been used loosely to mean “occasional, intermittent,” but this usage may be confusing for readers who are accustomed to using the word only in its narrower sense of “at regular or predictable intervals.” Thus the writer who said *Parker’s losses at the track were not covered by his periodic winners* invited the (most likely unintended) inference that Parker had a system that enabled him to pick winners at regular intervals. Substitution of *occasional* in this context would have resolved the ambiguity.

per-i·od·ic acid (pûr'î-öd'ik äs'ïd) *n.* A white, crystalline inorganic acid, $\text{HIO}_4 \cdot 2\text{H}_2\text{O}$, used as an oxidizer.

WORD HISTORY: In this world of impermanence it seems that we have tried to hold on to a few things at least by using the word *permanent*. Coming ultimately from the present participle *permanēns* of Latin *permanēre*, “to endure,” Middle English *permanent* (first recorded around 1425) also had to do with the enduring and the stable. When we consider some of the applications of this adjective, as in *permanent press, permanent tooth*, we are struck by the relative evanescence of the so-called permanent. But perhaps never more so than in the case of the permanent wave. When asked what this phenomenon was, one journalist wrote in 1932,

“(so far as my experience goes): a wave that is anything but permanent.”

permanent magnet (pûr'mə-nənt mǎg'nĭt) *n.* A piece of magnetic material that retains its magnetism after it is removed from a magnetic field.

permanent press (pûr'mə-nənt prĕs) *n.* **1.** A chemical process in which fabrics are permanently shaped and treated for wrinkle resistance. **2.** A fabric treated by permanent press. Also called *durable press* —**per'ma-nent-press'** (pûr'mə-nənt-prĕs') *adj.*

permanent tooth (pûr'mə-nənt tōoth) *n.* One of the second set of teeth in mammals that grow as the milk teeth are shed. Human beings have 32 permanent teeth.

See PERSON.]

USAGE NOTE: *Personality* is often used to mean “celebrity,” particularly in popular journalism, as in *The show features interviews with entertainment personalities.* A case can be made for the usage, since many of the persons so described are best known simply for who they are rather than what they have done. Thus *personality* may be an appropriate description of someone who is best known by virtue of his or her frequent appearances as a television host or an advertising spokesperson, but it is slighting when used of people whose renown is based on substantive achievements. Perhaps for this reason, the word was unacceptable to 57 percent of the Usage Panel in an earlier survey.

[New Latin *Petunia*, genus name, from obsolete French *pétun*, tobacco, from Portuguese *petum*, of Tupi-Guarani origin.]

WORD HISTORY: “Tobacco is a dirty weed,” as the song goes (it also perversely admits “I like it, I like it”), but tobacco has some nice relatives in the nightshade family, such as the tomato, red pepper, and eggplant. One of its more beautiful relatives, the petunia, is actually named for tobacco. This curious story begins when the Portuguese in South America picked up their word *petum*, meaning “tobacco,” from a Tupi-Guarani word, such as Tupi *petyn*. From Portuguese the word made its way into French (*pétun*), from which English borrowed the word (*petun* remains an archaic word for tobacco). The name of the genus *petunia* was formed in New Latin (1789) from French *pétun* because of the close relationship of the petunia genus to tobacco. English *petunia*, taken from Modern Latin, is first recorded around 1825.

pharm. or **Pharm.** *abbr.* **1.** Pharmaceutical. **2.** Pharmacist. **3.** Pharmacopoeia. **4.** Pharmacy.

Phar.M. *abbr. Latin.* Pharmaciae Magister (Master of Pharmacy).

phar·ma·ceu·ti·cal (fär'mə-sōō'tī-kəl) also **phar·ma·ceu·tic** (-tīk) *adj.*

Abbr. **phar., Phar., pharm., Pharm.** Of or relating to pharmacy or pharmacists.
— *n.* *Abbr.* **phar., Phar., pharm., Pharm.** A pharmaceutical product or preparation. [From Late Latin *pharmaceuticus*, from Greek *pharmakeutikos*, from *pharmakeutēs*, preparer of drugs, variant of *pharmakeus*, from *pharmakon*, drug.]
—**phar'ma·ceu'ti·cal·ly** *adv.*

phar·ma·ceu·tics (fär'mə-sōō'tīks) *n.* **1.** (*used with a sing. verb*). The science of preparing and dispensing drugs. **2.** (*used with a pl. verb*). Pharmaceutical preparations; medicinal drugs.

phar·ma·cist (fär'mə-sīst) *n.* *Abbr.* **phar., Phar., pharm., Pharm.** A person trained in pharmacy; a druggist.

pharmaco- *pref.* Drug; medicine: *pharmacognosy*. [Greek, from *pharmakon*, poison, drug.]

phar·ma·co·dy·nam·ics (fär'mə-kō'dī-nām'īks) *n.* (*used with a sing. verb*). The study of the action or effects of drugs on living organisms.

—**phar'ma·co'dy·nam'ic** *adj.* —**phar'ma·co'dy·nam'i·cal·ly** *adv.*

phar·ma·co·ge·net·ics (fär'mə-kō-jə-nēt'īks) *n.* (*used with a sing. verb*). The study of genetic factors that influence an organism's reaction to a drug.

—**phar'ma·co·ge·net'ic** *adj.*

phar·ma·cog·no·sy (fär'mə-kōg'nə-sē) *n.* The branch of pharmacology that deals with drugs in their crude or natural state. [PHARMACO- + Greek *gnōsis*, knowledge; see GNOISIS.] —**phar'ma·cog'no·sist** *n.* —**phar'ma·cog·nos'tic** (-kōg-nōs'tīk) *adj.*

phar·ma·co·ki·net·ics (fär'mə-kō-kī-nēt'īks, -kī-) *n.* (*used with a sing. verb*).

1. The process by which a drug is absorbed, distributed, metabolized and eliminated by the body. **2.** The study of this process. —**phar'ma·co·ki·net'ic** *adj.*

phar·ma·col·o·gy (fär'mə-kōl'ə-jē) *n.* **1.** The science of drugs, including their composition, uses, and effects. **2.** The characteristics or properties of a drug, especially those that make it medically effective. —**phar'ma·col'og'ic** (-kə-lōj'īk), **phar'ma·col'og'i·cal** (-ī-kəl) *adj.* —**phar'ma·col'og'i·cal·ly** *adv.*
—**phar'ma·col'o·gist** *n.*

phar·ma·co·poe·ia also **phar·ma·co·pe·ia** (fär'mə-kə-pē'ə) *n.* *Abbr.* **phar., Phar., pharm., Pharm.** **1.** A book containing an official list of medicinal drugs together with articles on their preparation and use. **2.** A collection or stock of drugs. [New Latin, from Greek *pharmakopoiia*, preparation of drugs, from *pharmakopoiios*, preparing drugs : *pharmako-*, pharmaco- + *-poiios*, preparing (from *poiein*, to make); see **k^wei-²** in Appendix.] —**phar'ma·co·poe'ial** (-pē'əl) *adj.*

—**phar'ma·co·poe'ist** (-pē'īst) *n.*

phar·ma·co·ther·a·py (fär'mə-kō-thēr'ə-pē) *n.* *pl.*

phar·ma·co·ther·a·pies. Treatment of disease through the use of drugs.

phar·ma·cy (fär'mə-sē) *n. pl. phar·ma·cies.* *Abbr. phar., Phar., pharm., Pharm.* **1.** The art of preparing and dispensing drugs. **2.** A place where drugs are sold; a drugstore. In this sense, also called *apothecary* [Middle English *farmacie*, a purgative, from Old French, from Medieval Latin *pharmacīa*, a medicine, from Greek *pharmakeia*, use of drugs, from *pharmakon*, drug. See PHARMACO-.]

pha·ros (fär'ös') *n.* A lighthouse. [Latin, from Greek, after Pharos, a peninsula, formerly an island, in the Mediterranean Sea at Alexandria, Egypt, and the site of an ancient lighthouse, one of the Seven Wonders of the World.]

Pharr (fär) A city of extreme southern Texas west-northwest of Brownsville. It is a processing and distribution center. Population, 32,921.

pharyng- *pref.* Variant of **pharyngo-**.

pha·ryn·ge·al (fə-rĭn'jē-əl, -jəl, făr'ĭn-jē'əl) also **pha·ryn·gal** (fə-rĭng'gəl) *adj.* Of, relating to, located in, or coming from the pharynx. — *n. Linguistics.* A speech sound produced in the pharynx. [From New Latin *pharyngeus*, from *pharynx*, *pharyng-*, *PHARYNX*. See PHARYNX.]

phar·yn·gec·to·my (făr'ən-jĕk'tə-mē) *n. pl. phar·yn·gec·to·mies.* Surgical removal of part or all of the pharynx.

pha·ryn·ges (fə-rĭn'jēz) *n.* A plural of **pharynx**.

phar·yn·gi·tis (făr'ĭn-jī'tis) *n.* Inflammation of the pharynx.

pharyngo- or **pharyng-** *pref.* Pharynx: *pharyngoscope*. [New Latin, from Greek *pharungo-*, from *pharunx*, *pharung-*. See PHARYNX.]

pha·ryn·go·cele (fə-rĭng'gə-sēl') *n.* Protrusion of mucous membrane through the wall of the pharynx; hernia of the pharynx.

phar·yn·gol·o·gy (făr'ĭn-göl'ə-jē, făr'ĭng-) *n.* The medical study of the pharynx and its diseases.

pha·ryn·go·scope (fə-rĭng'gə-skōp') *n.* An instrument used in examining the pharynx. — **phar'yn·gos'co·py** (făr'ĭn-gös'kə-pē, făr'ĭng-) *n.*

phar·ynx (făr'ĭngks) *n. pl. pha·ryn·ges* (fə-rĭn'jēz) or **phar·ynx·es**. The section of the alimentary canal that extends from the mouth and nasal cavities to the larynx, where it becomes continuous with the esophagus. [New Latin *pharynx*, *pharyng-*, from Greek *pharunx*.]

phase (fāz) *n. Abbr. ph.* **1.** A distinct stage of development: “*The American occupation of Japan fell into three successive phases*” (Edwin O. Reischauer). **2.** A temporary manner, attitude, or pattern of behavior: *just a passing phase*. **3.** An aspect; a part: *every phase of the operation*. **4. Astronomy.** One of the cyclically recurring apparent forms of the moon or a planet. **5. Physics.** **a.** A particular stage in a periodic process or phenomenon. **b.** The fraction of a complete cycle elapsed as measured from a specified reference point and often expressed as an angle. **6. Chemistry.** **a.** Any of the forms or states, solid, liquid, gas, or plasma, in

which matter can exist, depending on temperature and pressure. **b.** A discrete homogeneous part of a material system that is mechanically separable from the rest, as is ice from water. **7. Biology.** A characteristic form, appearance, or stage of development that occurs in a cycle or that distinguishes some individuals of a group: *the white color phase of a weasel; the swarming phase of locusts.* — *v. tr.* **phased, phas-ing, phas-es.** **1.** To plan or carry out systematically by phases. **2.** To set or regulate so as to be synchronized. — **phrasal verbs.** **phase in.** To introduce, one stage at a time. **phase out.** To bring or come to an end, one stage at a time. — **idioms.** **in phase.** In a correlated or synchronized way. **out of phase.** In an unsynchronized or uncorrelated way. [Back-formation from New Latin *phasēs*, phases of the moon, from Greek, pl. of *phasis*, appearance, from *phainein*, to show. See **bhā-¹** in Appendix.] — **pha'sic** (fā'zĭk) *adj.*

SYNONYMS: *phase, aspect, facet, angle, side.* These nouns refer to a particular or possible way of viewing something, such as an object, a situation, or a process. *Phase* may denote a change in an object itself rather than in the viewpoint of an observer (*an ermine in its winter color phase*), but the term also refers to a stage or period of change or development: “*A phase of my life was closing tonight, a new one opening tomorrow*” (Charlotte Brontë). *Aspect* is the way something appears to an observer at a specific vantage point: “*In our description of nature the purpose is... to track down... relations between the manifold aspects of our experience*” (Niels Bohr). A *facet* is one of numerous aspects, as of a problem: *studying the many facets of life in manufacturing towns after the Industrial Revolution.* *Angle* suggests a limitation of perspective, frequently with emphasis on the observer's own point of view: *an account of the causes of World War II from the angle of the Allies.* *Side* refers to something having two or more parts or aspects: “*Much might be said on both sides*” (Joseph Addison).

phase contrast microscope (fāz kən-trāst' mī'krə-skōp') *n.* A microscope that uses the differences in the phase of light transmitted or reflected by a specimen to form distinct, contrasting images of different parts of the specimen.

phased array (fāzd ə-rā') *n.* An arrangement of dipoles on a radar antenna, in which the phase of each dipole is controlled by a computer so that the beam can scan very rapidly.

phase-down (fāz'doun') *n.* A gradual reduction.

phase-in (fāz'in') *n.* A gradual introduction: *a phase-in of new personal policies.*

phase microscope (fāz mī'krə-skōp') *n.* A phase contrast microscope.

phase modulation (fāz mōj'ə-lā'shən) *n.* *Abbr.* **pm, p-m** A type of electronic modulation in which the phase of a carrier wave is varied in order to transmit the information contained in the signal.

phase-out (fāz'out') *n.* A gradual discontinuation.

phase rule (fāz rōol) *n.* *Physics.* A rule stating that the number of degrees of freedom in a material system at equilibrium is equal to the number of components minus the number of phases plus the constant 2. For example, the system of water vapor, liquid water, and solid ice has zero degrees of freedom because the three phases of vapor, liquid, and solid coexist in the one component, water.

-phasia *suff.* A speech disorder of a specified kind: *dysphasia*. [Greek, speech, from *phasis*, utterance, from *phanai*, to say, speak. See **bhā-²** in Appendix.]

phas-mid (fāz'mīd) *n.* Any of various insects of the order Phasmida, including the leaf insects and walking sticks, especially common in tropical areas and resembling foliage in color and form. [From New Latin *Phasmida*, order name, from *Phasma*, type genus, from Greek *phasma*, apparition, from *phainein*, to show. See PHASE.]

phat-ic (făt'ik) *adj.* Of, relating to, or being speech used to share feelings or to establish a mood of sociability rather than to communicate information or ideas. [From Greek *phatos*, spoken, from *phanai*, to speak. See -PHASIA.]

—**phat'i-cal-ly** *adv.*

Ph.B. *abbr.* Latin. Philosophiae Baccalaureus (Bachelor of Philosophy).

Ph.C. *abbr.* Pharmaceutical Chemist.

Ph.D. *abbr.* Latin. Philosophiae Doctor (Doctor of Philosophy).

pheasant (fēz'ənt) *n. pl.* **pheas-ants** or **pheasant. 1.** Any of various Old World birds of the family Phasianidae, especially the ring-necked pheasant introduced in North America, characteristically having long tails and, in the males of many species, brilliantly colored plumage. **2.** Any of several other birds that resemble the pheasant, such as the partridge. [Middle English *fesaunt*, from Old French *fesan*, from Latin *phāsiānus*, from Greek *phasianos* (*ornis*), (bird) of the Phasis River, pheasant, from Phasis, the Phasis River of western Georgia.]

phel-lem (fēl'əm, -əm') *n.* *Botany.* See **cork** (*n.*, sense 4). [German : Greek *phellos*, cork; see **bhel-²** in Appendix + *-em* (as in *Phloëm*, phloem); see PHLOEM.]

phel-lo-derm (fēl'ə-dŭrm') *n.* A tissue produced inwardly by the cork cambium. [Greek *phellos*, cork; see **bhel-²** in Appendix + *-DERM.*] —**phel'lo-der'-mal** *adj.*

phel-lo-gen (fēl'ə-jən) *n.* See **cork cambium**. [Greek *phellos*, cork; see **bhel-²** in Appendix + *-GEN.*] —**phel'lo-ge-net'ic** (-jə-nĕt'ik), **phel'lo-gen'ic** (-jĕn'ik) *adj.*

phen- *pref.* Variant of **pheno-**.

phe-na-caine (fē'nə-kān', fĕn'ə-) *n.* A white crystalline compound, C₁₈H₂₂N₂O₂, used in the form of its hydrochloride as a local anesthetic in ophthalmology. [PHEN(O)- + A(CETO-) + -CAINE.]

phe-nac-e-tin (fə-nās'ī-tĭn) *n.* See **acetophenetidin**. [Rearrangement of chemical name ACETOPHENETIDIN.]

phen-a-cite (fĕn'ə-sīt') or **phen-a-kite** (-kīt') *n.* A natural beryllium silicate, Be_2SiO_4 , occurring as vitreous crystals sometimes used as gems. [Greek *phenax*, *phenak-*, impostor + -ITE¹.]

phe-nan-threne (fə-năn'thrĕn') *n.* A colorless crystalline hydrocarbon, $\text{C}_{14}\text{H}_{10}$, obtained by fractional distillation of coal-tar oils and used in dyes, drugs, and explosives. [PHEN(O)- + ANTHR(AC)ENE.]

phen-ar-sa-zine chloride (fə-năr'sə-zĕn' klôr'īd') *n.* A highly poisonous yellow crystalline compound, $\text{C}_{12}\text{H}_9\text{AsClN}$, used as a poison gas and sometimes with tear gas. Also called *diphenylaminechloroarsine* [PHEN(O)- + ARS(ENIC) + AZINE.]

phen-a-zine (fĕn'ə-zĕn') also **phen-a-zin** (-zĭn) *n.* A yellow crystalline compound, $\text{C}_6\text{H}_4\text{N}_2\text{C}_6\text{H}_4$, used in the manufacture of dyes.

phen-cy-cli-dine (fĕn-sī'klĭ-dĕn', -dĭn, -sĭk'li-) *n.* A drug, $\text{C}_{17}\text{H}_{25}\text{N}$, used in veterinary medicine as an anesthetic and illegally as a hallucinogen; PCP.

[PHEN(O)- + CYCL(O)- + -ID(E) + -INE².]

phen-el-zine (fĕn'əl-zĕn') *n.* A monoamine oxidase inhibitor, $\text{C}_8\text{H}_{12}\text{N}_2$, used especially in the form of its sulfate as an antidepressant. [PHEN(O)- + E(THY)L + (HYDRA)ZINE.]

phe-net-ic (fĭ-nĕt'ĭk) *adj.* Of, relating to, or designating a system of classification of organisms based on overall or observable similarities rather than on phylogenetic or evolutionary relationships. [PHEN(OTYPE) + -ETIC.]

—**phe-net'i-cal-ly** *adv.*

phe-net-ics (fĭ-nĕt'ĭks) *n.* (used with a *sing. verb*). The phenetic system of taxonomic classification. —**phe-net'i-cist** (-ĭ-sĭst) *n.*

phe-nix (fĕ'nĭks) *n.* Variant of **phoenix**.

Phe-nix City (fĕ'nĭks sīt'ē) A city of eastern Alabama on the Chattahoochee River across from Columbus, Georgia. It is a processing center in a cotton-growing area. Population, 25,312.

pheno- or **phen-** *pref.* **1.** Showing; displaying: *phenotype*. **2. a.** Related to or derived from benzene: *phenol*. **b.** Containing phenyl: *phenothiazine*. [Greek *phaino-*, from *phainein*, to show. See **bhā-¹** in Appendix.]

phe-no-bar-bi-tal (fĕ'nō-băr'bĭ-tôl', -tăl') *n.* A crystalline barbiturate, $\text{C}_{12}\text{H}_{12}\text{N}_2\text{O}_3$, used medicinally as a sedative, a hypnotic, and an anticonvulsant.

phe-no-bar-bi-tone (fĕ'nō-băr'bĭ-tôn') *n.* Chiefly *British*. Phenobarbital.

phe-no-cop-y (fĕ'nə-köp'ē) *n. pl.* **phe-no-cop-ies.** An environmentally induced, nonhereditary variation in an organism, closely resembling a genetically determined trait. [PHENO(TYPE) + COPY.]

phe-no-cry-st (fĕ'nə-krist') *n.* A conspicuous, usually large, crystal embedded in porphyritic igneous rock. [PHENO- + CRYST(AL).] —**phe'no-cry-st'ic** *adj.*

phe-nol (fĕ'nôl', -nôl', -nôl') *n.* **1.** A caustic, poisonous, white crystalline compound, $\text{C}_6\text{H}_5\text{OH}$, derived from benzene and used in resins, plastics, and pharma-

ceuticals and in dilute form as a disinfectant and antiseptic. Also called *carbolic acid* **2**. Any of a class of aromatic organic compounds having at least one hydroxyl group attached directly to the benzene ring.

phe·no·late (fē'nə-lāt') *n.* A salt of phenol. Also called *phenoxide*

phe·no·lic (fī-nō'līk, -nōl'īk) *adj.* Of, relating to, containing, or derived from phenol. — *n.* Any of various synthetic thermosetting resins, obtained by the reaction of phenols with simple aldehydes and used to make molded products and as coatings and adhesives. Also called *phenolic resin*

phe·nol·o·gy (fī-nōl'ə-jē) *n.* **1.** The scientific study of periodic biological phenomena, such as flowering, breeding, and migration, in relation to climatic conditions. **2.** The relationship between a periodic biological phenomenon and climatic conditions. [PHENO(MENON) + -LOGY.] — **phe'no·log'i·cal** (fē'nə-lōj'ī-kəl) *adj.* — **phe'no·log'i·cal·ly** *adv.* — **phe·nol'o·gist** *n.*

phe·nol·phtal·ein (fē'nōl-thāl'ēn', -thāl'ē-īn, -thā'lēn', -thā'lē-īn) *n.* A white or pale yellow crystalline powder, $C_{20}H_{14}O_4$, used as an acid-base indicator, in making dyes, and in medicine as a laxative.

phenol red (fē'nōl' rēd) *n.* A red, water-soluble dye, $C_{19}H_{14}O_5S$, used as an acid-base indicator and in medicine to test kidney function and renal blood flow.

phe·nom (fī-nōm') *n.* *Slang.* A phenomenon, especially a remarkable or outstanding person.

phe·nom·e·na (fī-nōm'ə-nə) *n.* Plural of **phenomenon**.

phe·nom·e·nal (fī-nōm'ə-nəl) *adj.* **1.** Of, relating to, or constituting phenomena or a phenomenon. **2.** Extraordinary; outstanding: *a phenomenal feat of memory*. **3.** *Philosophy.* Known or derived through the senses rather than through the mind. — **phe·nom'e·nal·ly** *adv.*

phe·nom·e·nal·ism (fī-nōm'ə-nə-līz'əm) *n.* *Philosophy.* The doctrine, set forth by David Hume and his successors, that percepts and concepts actually present in the mind constitute the sole object of knowledge, with the objects of perception themselves, their origin outside the mind, or the nature of the mind itself remaining forever beyond inquiry. — **phe·nom'e·nal·ist** *n.*

— **phe·nom'e·nal·is'tic** *adj.* — **phe·nom'e·nal·is'ti·cal·ly** *adv.*

phe·nom·e·nol·o·gy (fī-nōm'ə-nōl'ə-jē) *n.* *Philosophy.* **1.** The study of all possible appearances in human experience, during which considerations of objective reality and of purely subjective response are left out of account. **2.** A movement based on this study, originated about 1905 by Edmund Husserl.

— **phe·nom'e·no·log'i·cal** (-nə-lōj'ī-kəl) *adj.* — **phe·nom'e·no·log'i·cal·ly** *adv.* — **phe·nom'e·nol'o·gist** *n.*

phe·nom·e·non (fī-nōm'ə-nōn', -nən) *n.* *pl.* **phe·nom·e·na** (-nə). **1.** An occurrence, a circumstance, or a fact that is perceptible by the senses. **2.** *pl.*

phe·nom·e·nons. **a.** An unusual, significant, or unaccountable fact or occurrence; a marvel. **b.** A remarkable or outstanding person; a paragon. See Syn-

onyms at **wonder**. **3. Philosophy. a.** That which appears real to the mind, regardless of whether its underlying existence is proved or its nature understood. **b.** In Kantian philosophy, the appearance of an object to the mind as opposed to its existence in and of itself, independent of the mind. **4. Physics.** An observable event. [Late Latin *phaenomenon*, from Greek *phainomenon*, from neuter present participle of *phainesthai*, to appear. See **bhā-¹** in Appendix.]

USAGE NOTE: *Phenomenon* is the only singular form of this noun; *phenomena* is the usual plural. *Phenomenons* may also be used as the plural in nonscientific writing when the meaning is “extraordinary things, occurrences, or persons”: *They were phenomenons in the history of music.*

phe·no·thi·a·zine (fē'nō-thī'ə-zēn', -nə-) *n.* **1.** A yellow organic compound, C₁₂H₉NS, used in insecticides, livestock anthelmintics, and dyes. **2.** Any of a group of drugs derived from this compound and used as major tranquilizers in the treatment of psychiatric disorders, such as schizophrenia.

phe·no·type (fē'nə-tīp') *n.* **1. a.** The observable physical or biochemical characteristics of an organism, as determined by both genetic makeup and environmental influences. **b.** The expression of a specific trait, such as stature or blood type, based on genetic and environmental influences. **2.** An individual or group of organisms exhibiting a particular phenotype. —**phe'no·typ'ic** (-tīp'ik), **phe'no·typ'i·cal** (-i-kəl) *adj.* —**phe'no·typ'i·cal·ly** *adv.*

phe·nox·ide (fī-nۆk'sīd') *n.* See **phenolate**.

phe·nox·y·ben·za·mine (fē-nۆk'sē-běn'zə-mēn') *n.* A long-acting alpha-adrenergic blocking agent, C₁₈H₂₂ClNO·HCl, used to treat high blood pressure, excessive sweating, and tachycardia caused by pheochromocytoma.

WORD HISTORY: It has never been good to be a Philistine. Samson, Saul, and David in the Bible helped bring the Philistines into prominence because they were such prominent opponents. Even though the Philistines have long since disappeared, their name has lived on in the Old Testament. The English name for them, *Philistines*, which goes back through Late Latin and Greek to Hebrew, is first found in Middle English, where *Philistiens*, the ancestor of our word, is recorded in a work composed before 1325. Beginning in the 17th century *philistine* was used as a common noun usually in the plural to refer to various groups considered the enemy, such as literary critics. In Germany in the same century it is said that in a memorial at Jena for a student who had been killed in a town-gown quarrel, the minister preached a sermon from the text “Philister über dir Simson! [The Philistines be upon thee, Samson!],” the words of Delilah to Samson after she attempted to render him powerless before his Philistine enemies. From this usage it is said that German students came to use *Philister*, the German equivalent of *Philistine*, to denote nonstudents and hence uncultured or materialistic people. Both usages were picked up in English in the early 19th century.

See **bhel-¹** in Appendix.] —**phleg·mat'·i·cal·ly** *adv.*

phlo·em (flō'ĕm') *n.* The food-conducting tissue of vascular plants, consisting of sieve tubes, fibers, parenchyma, and sclereids. [German, from Greek *phloios*, bark. See **bhleu-** in Appendix.]

phlo·gis·tic (flō-jĭs'tĭk) *adj.* **1.** Of or relating to phlogiston. **2. Medicine.** Of, relating to, or inducing inflammation or fever; inflammatory.

phlo·gis·ton (flō-jĭs'tŏn', -tən) *n.* A hypothetical substance formerly thought to be a volatile constituent of all combustible substances released as flame in combustion. [From Greek, neuter of *phlogistos*, inflammable, from *phlogizein*, to set on fire, from *phlox*, *phlog-*, flame. See **bhel-¹** in Appendix.]

phlog·o·pite (flŏg'ə-pīt') *n.* A yellow to dark brown mica, $K(Mg,Fe)_3AlSi_3O_{10}(OH)_2$, used in insulation. [Greek *phlogōpos*, fiery-looking (*phlox*, *phlog-*, flame; see **bhel-¹** in Appendix + *ōps*, eye, face); see **ok^w-** in Appendix + *-ite¹*.]

phlox (flŏks) *n. pl.* **phlox** or **phlox·es**. Any of various North American plants of the genus *Phlox*, having opposite leaves and flowers with a variously colored salverform corolla. [Latin *phlox*, a kind of flame-colored flower, from Greek, flame, wallflower. See **bhel-¹** in Appendix.]

phlyc·te·na also **phlyc·tae·na** (flĭk-tĕ'nə) *n. pl.* **phlyc·te·nae** (-nĕ). A small blister or vesicle, especially one of multiple blisters caused by a mild burn. [New Latin, from Greek *phlyktaina*, blister, from *phluzein*, to boil over. See **bhleu-** in Appendix.] —**phlyc'ten'ar** (flĭk'tĕn'ər) *adj.*

Phm *abbr.* Bible. Philemon.

Ph.M. *abbr.* Latin. Philosophiae Magister (Master of Philosophy).

Phnom Penh (pə-nŏm' pĕn', nŏm') The capital and largest city of Cambodia, in the southwest part of the country on the Mekong River. It was founded in the 14th century and became the capital of the Khmer after c. 1432 and the capital of Cambodia in 1867. The city suffered greatly during civil strife in the country beginning in 1970. Population, 400,000.

-phobe *suffix.* One that fears or is averse to a specified thing: *ailurophobe*.

[French, from Latin *-phobus*, from Greek *-phobos*, fearing, from *phobos*, fear. See **bheg^w-** in Appendix.]

pho·bi·a (fō'bĕ-ə) *n.* **1.** A persistent, abnormal, or irrational fear of a specific thing or situation that compels one to avoid the feared stimulus. **2.** A strong fear, dislike, or aversion. [From Late Latin *-phobia*, *-phobia*.]

-phobia *suff.* An intense, abnormal, or illogical fear of a specified thing: *xenophobia*. [Late Latin, from Greek, from *phobos*, fear. See **bheg^w**- in Appendix.]

pho·bic (fō'bīk) *adj.* Of, relating to, arising from, or having a phobia. — *n.* One who has a phobia.

-phobic or **-phobous** *suff.* **1.** Having a fear of or an aversion for: *xenophobic*. **2.** Lacking an affinity for: *lyophobic*. [Late Latin *-phobicus*, from Greek *-phobikos*, from *-phobia*, -phobia.]

Pho·bos (fō'bəs) *n.* The larger and inner of the two planetary satellites of Mars. [Greek, fear, deity who personifies fear, from *phobos*, fear. See -PHOBE.]

-phobous *suff.* See **-phobic**.

Pho·cae·a (fō-sē'ə) An ancient Ionian Greek city of western Asia Minor on the Aegean Sea in present-day Turkey. It was an important maritime state c. 1000 to 600 B.C. but declined after a Persian siege in 540.

pho·cine (fō'sīn) *adj.* *Zoology.* Of, relating to, or resembling seals. [From Latin *phōca*, seal, from Greek *phōkē*.]

Pho·cis (fō'sīs) A historical region of central Greece north of the Gulf of Corinth. In early times (before 590 B.C.) it controlled the oracle at Delphi. The region was ultimately conquered by Philip II of Macedon.

pho·co·me·li·a (fō'kō-mē'lē-ə, -mē'l'yə) *n.* A birth defect in which the upper portion of a limb is absent or poorly developed, so that the hand or foot attaches to the body by a short, flipperlike stump. [New Latin *phōcomelia* : Greek *phōkē*, seal + Greek *melos*, limb.]

phoe·be (fē'bē) *n.* Any of several medium-sized birds of the genus *Sayornis*, of North America, noted for the flicking motion of the tail. [Imitative of its song (influenced by the name *Phoebe*).]

Phoe·be (fē'bē) *n.* **1.** *Greek Mythology.* The goddess Artemis. **2.** The moon. **3.** The satellite of Saturn that is 17th in distance from the planet. [Middle English *phebe*, from Latin *Phoebē*, from Greek *Phoibē*, from feminine of *phoibos*, shining.]

Phoe·bus (fē'bəs) *n.* **1.** *Greek Mythology.* Apollo, the god of the sun. **2.** The sun. [Middle English *phebus*, from Latin *Phoebus*, from Greek *phoibos*, shining, Apollo.]

Phoe·ni·cia (fī-nīsh'ə, -nē'shə) An ancient maritime country of southwest Asia consisting of city-states along the eastern Mediterranean Sea in present-day Syria and Lebanon. Its people became the foremost navigators and traders of the Mediterranean by 1250 B.C. and established numerous colonies, including Carthage in northern Africa. The Phoenicians traveled to the edges of the known world at the time and introduced their alphabet, based on symbols for sounds rather than cuneiform or hieroglyphic representations, to the Greeks and other early peoples. Phoenicia's culture was gradually absorbed by Persian and later Hellenistic civilizations.

Phoe-ni-cian (fī-nīsh'ən, -nē'shən) *adj.* Of or relating to ancient Phoenicia or its people, language, or culture. — *n.* **1.** A native or inhabitant of ancient Phoenicia. **2.** The Semitic language of ancient Phoenicia. [Middle English *Phenicien*, from Latin *Phoenīcia*, feminine of *Phoenīcius*, from *Phoenīcē*, Phoenicia.]

phoe-nix also **phe-nix** (fē'nīks) *n.* **1.** *Mythology.* A bird in Egyptian mythology that lived in the desert for 500 years and then consumed itself by fire, later to rise renewed from its ashes. **2.** A person or thing of unsurpassed excellence or beauty; a paragon. **3. Phoenix.** A constellation in the Southern Hemisphere near Tucana and Sculptor. [Middle English *fenix*, from Old English, and Old French both from Medieval Latin *fēnix*, from Latin *phoenix*, from Greek *phoinix*.]

Phoenix The capital and largest city of Arizona, in the south-central part of the state northwest of Tucson. Settled c. 1868, it became territorial capital in 1889 and state capital in 1912. The city is noted as a winter and health resort. Population, 983,403.

Phoenix Islands (fē'nīks ī'ləndz) A group of eight small islands in the central Pacific Ocean north of Samoa. Discovered between 1823 and 1840 by British and American explorers, they were administered at various times by one or both of the countries and are now part of Kiribati.

phon (fŏn) *n.* A unit of apparent loudness, equal in number to the intensity in decibels of a 1,000-hertz tone judged to be as loud as the sound being measured. [German, from Greek *phōnē*, sound. See PHONE¹.]

phon. *abbr.* **1.** Phonetic; phonetics. **2.** Phonology.

phon- *pref.* Variant of **phono-**.

pho·nate (fō'nāt') *v. intr.* **pho·nat·ed, pho·nat·ing, pho·nates.** To utter speech sounds; vocalize. — **pho·na'tion** *n.*

phone¹ (fŏn) *Informal. n.* **1.** A telephone. **2.** An earphone. — *v.* **phoned, phon·ing, phones.** — *v. intr.* To telephone. — *v. tr.* **1.** To get in touch with by telephone. **2.** To impart (information or news, for example) by telephone.

[Short for TELEPHONE.]

phone² (fŏn) *n. Linguistics.* A speech sound considered without reference to its status as a phoneme or an allophone in a language. [Greek *phōnē*, sound, voice. See **bhā**⁻² in Appendix.]

-phone *suff.* **1.** Sound: *homophone*. **2.** Device that receives or emits sound: *geophone*. **3.** Speaker of a language: *Anglophone*. [From Greek *phōnē*, sound, voice. See **bhā**⁻² in Appendix.]

phone book (fŏn bŏok) *n. Informal.* A telephone book.

phone booth (fŏn bŏoth) *n. Informal.* A telephone booth.

pho·ne·mat·ic (fō'nī-măt'īk) *adj. Linguistics.* Phonemic.

pho·neme (fō'nēm') *n. Linguistics.* The smallest phonetic unit in a language that is capable of conveying a distinction in meaning, as the *m* of *mat* and the *b* of

bat in English. [French *phonème*, from Greek *phōnēma*, *phōnēmat-*, utterance, sound produced, from *phōnein*, to produce a sound, from *phōnē*, sound, voice. See **bhā-²** in Appendix.]

pho·ne·mic (fə-nē'mīk, fō-) *adj.* *Linguistics.* **1.** Of or relating to phonemes.

2. Of or relating to phonemics. **3.** Serving to distinguish phonemes or distinctive features. —**pho·ne'mi·cal·ly** *adv.*

pho·ne·mics (fə-nē'mīks, fō-) *n.* (*used with a sing. verb*). *Linguistics.* The study and establishment of the phonemes of a language. —**pho·ne'mi·cist** (-mī-sīst) *n.*

pho·net·ic (fə-nět'īk) *adj.* *Abbr. phon.* *Linguistics.* **1.** Of or relating to phonetics. **2.** Representing the sounds of speech with a set of distinct symbols, each designating a single sound: *phonetic spelling*. **3.** Of, relating to, or being features of pronunciation that are not phonemically distinctive in a language, as aspiration of consonants or vowel length in English. [New Latin *phōnēticus*, representing speech sounds, from Greek *phōnētikos*, vocal, from *phōnētos*, to be spoken, from *phōnein*, to produce a sound, from *phōnē*, sound, voice. See **bhā-²** in Appendix.] —**pho·net'i·cal** *adj.* —**pho·net'i·cal·ly** *adv.*

phonetic alphabet (fə-nět'īk əl'fə-bět') *n.* **1.** *Linguistics.* A standardized set of symbols used in phonetic transcription. **2.** Any of various systems of code words for identifying letters in voice communication.

pho·ne·ti·cian (fō'nī-tīsh'ən) also **pho·net·i·cist** (fə-nět'ī-sīst) *n.* *Linguistics.* An expert in phonetics.

pho·net·ics (fə-nět'īks) *n.* (*used with a sing. verb*). *Abbr. phon.* *Linguistics.*

1. The branch of linguistics that deals with the sounds of speech and their production, combination, description, and representation by written symbols.

2. The system of sounds of a particular language.

pho·ney (fō'nē) *adj.* & *n.* Variant of **phony**.

phon·ic (fōn'īk) *adj.* *Linguistics.* Of, relating to, or having the nature of sound, especially speech sounds. —**phon'i·cal·ly** *adv.*

phon·ics (fōn'īks) *n.* (*used with a sing. verb*). **1.** A method of teaching elementary reading and spelling based on the phonetic interpretation of ordinary spelling. **2.** Phonetics.

pho·no (fō'nō) *n.* *pl. pho·nos.* *Informal.* A phonograph.

phono- or **phon-** *pref.* Sound; voice; speech: *phonology*. [Greek *phōno-*, from *phōnē*, sound, voice. See **bhā-²** in Appendix.]

pho·no·car·di·o·gram (fō'nə-kär'dē-ə-grām') *n.* A graphic record of heart sounds and murmurs that is produced by a phonocardiograph.

pho·no·car·di·o·graph (fō'nə-kär'dē-ə-gräf') *n.* An instrument consisting of microphones and recording equipment used to monitor and record heart sounds and murmurs. —**pho'no·car'di·o·graph'ic** *adj.*

—**pho'no·car'di·og'ra·phy** (-ög'rə-fē) *n.*

pho·no·gram (fō'nə-grām') *n.* *Linguistics.* A character or symbol, as in a phonetic alphabet, representing a word or phoneme in speech. —**pho'no·gram'ic**, **pho'no·gram'mic** *adj.* —**pho'no·gram'i·cal·ly**, **pho'no·gram'mi·cal·ly** *adv.*

pho·no·graph (fō'nə-gräf') *n.* A machine that reproduces sound by means of a stylus in contact with a grooved rotating disk. —**pho'no·graph'ic** *adj.*
—**pho'no·graph'i·cal·ly** *adv.*

WORD HISTORY: In considering the makeup of the word *phonograph* or the related word *gramophone*, one has no difficulty understanding why they contain *phono-* or *-phone*, both going back to Greek *phōnē*, “sound, voice.” Why, however, do these words contain *-graph* and *gram-*, which have to do with writing, going back to Greek *graphein*, “to write,” and Greek *gramma*, “something written, letter of the alphabet,” respectively? *Gramophone* is in fact simply an inversion of the earlier *phonogram*, the more important word to explain therefore. Both *phonogram* and *phonograph* were first used to denote characters that represented speech sounds, *phonograph* being found in such a use earlier (1835-1840) than *phonogram* (1860). But in the second half of the 19th century sounds were reproduced in ways other than writing. The earliest device to be called a *phonograph* was a machine that picked up sound vibrations by means of a membrane and recorded them with a point that traced them on a cylinder. Thomas Edison’s famous device was also known as the *phonograph* (first reference found in 1877, the year of its invention); it too used the principle of tracing sound on a cylinder. After this the word *phonogram*, probably under the influence of the word *telegram*, was used to refer to a sound recording made by a phonograph (first such use found in 1879), and in 1884 the *gramophone*, whose name was formed by inverting the term *phonogram*, was patented by Emile Berliner.

pho·nog·ra·phy (fə-nŏg'rə-fē, fō-) *n.* **1.** *Linguistics.* The science or practice of transcribing speech by means of symbols representing elements of sound; phonetic transcription. **2.** A system of shorthand based on phonetic transcription.
—**pho·nog'ra·pher**, **pho·nog'ra·phist** *n.*

pho·no·lite (fō'nə-līt') *n.* A light-colored volcanic rock composed largely of feldspars. —**pho'no·lit'ic** (-līt'ik) *adj.*

pho·nol·o·gy (fə-nŏl'ə-jē, fō-) *n.* **pl.** **pho·nol·o·gies.** *Abbr.* **phon.** *Linguistics.* **1.** The study of speech sounds in language or a language with reference to their distribution and patterning and to tacit rules governing pronunciation. **2.** The sound system of a language: *the phonology of English.* —**pho·no·log'ic** (fō'nə-lŏj'ik), **pho'no·log'i·cal** (-i-kəl) *adj.* —**pho'no·log'i·cal·ly** *adv.*
—**pho·nol'o·gist** *n.*

pho·non (fō'nŏn') *n.* *Physics.* The quantum of acoustic or vibrational energy, considered a discrete particle and used especially in mathematical models to calculate thermal and vibrational properties of solids.

pho·no·re·cep·tion (fō'nō-rĭ-sĕp'shən) *n.* Perception of or response to sound waves. —**pho'no·re·cep'tor** (-tər) *n.*

pho·no·scope (fō'nə-skōp') *n.* A device that produces a visible display of the mechanical properties of a sounding body, especially of musical instruments.

pho·no·type (fō'nə-tĭp') *n.* **1.** A phonetic symbol used in printing. **2.** Text printed in phonetic symbols. —**pho'no·typ'ic** (fō'nə-tĭp'ĭk),

pho'no·typ'i·cal (-ĭ-kəl) *adj.* —**pho'no·typ'i·cal·ly** *adv.*

pho·no·typ·y (fō'nə-tĭ'pĕ) *n.* *Linguistics.* The practice of transcribing speech sounds by means of phonetic symbols. —**pho'no·typ'ist** *n.*

pho·ny also **pho·ney** (fō'nĕ) *adj.* **pho·ni·er, pho·ni·est.** **1. a.** Not genuine or real; counterfeit: *a phony credit card.* **b.** False; spurious: *a phony name.* **2.** Not honest or truthful; deceptive: *a phony excuse.* **3. a.** Insincere or hypocritical. **b.** Giving a false impression of truth or authenticity; specious. — *n. pl.*

pho·nies also **pho·neys.** **1.** Something not genuine; a fake. **2. a.** One who is insincere or pretentious. **b.** An impostor; a hypocrite. [Alteration of *fawney*, gilt brass ring used by swindlers, from Irish Gaelic *fáinne*, ring, from Old Irish.]

—**pho'ni·ly** *adv.* —**pho'ni·ness** *n.*

-phony *suff.* Sound: *telephony.* [Greek *-phōnia*, from *phōnē*, sound, voice. See **bhā**⁻² in Appendix.]

phoo·ey (fōō'ē) *interj.* Used to express disgust, disbelief, or contempt.

pho·rate (fōr'āt', fōr'-) *n.* A toxic liquid, C₇H₁₇O₂PS₃, used as an insecticide especially in soil treatment. [From chemical name (*phos*)*phor(odithio)ate* : PHOSPHORUS + *dithioate* (DI⁻¹ + THIO- + -ATE²).]

-phore *suff.* Bearer; carrier: *chromatophore.* [From Greek *-phoros*, bearing, from *pherein*, to carry. See **bher**⁻¹ in Appendix.]

-phoresis *suff.* Transmission: *electrophoresis.* [From Greek *phorēsis*, a carrying, from *pherein*, frequentative of *pherein*, to bear. See **bher**⁻¹ in Appendix.]

phor·e·sy (fōr'ĭ-sē) *n.* A symbiotic relationship, especially among arthropods and some fishes, in which one organism transports another organism of a different species. [New Latin *phorēsia*, from Greek *phorēsis*, a carrying. See -PHORESIS.]

pho·ro·nid (fə-rō'nĭd) *n.* Any of the small, wormlike marine animals of the phylum Phoronida, inhabiting a chitinous tube and having a U-shaped digestive tract. — *adj.* Of or belonging to the phylum Phoronida. [From New Latin *Phoronida*, phylum name, from *Phorōnis*, type genus, probably from Latin, Phoronean, Argive (name of Io, priestess of Argos), from *Phorōneus*, son of Inachus, king of Argos, from Greek.]

-phorous *suff.* Bearing: *gonophorous.* [From Greek *-phoros*, from *pherein*, to carry. See **bher**⁻¹ in Appendix.]

phos- *pref.* Light: *phosgene*. [From Greek *phōs*, light. See **bhā**¹ in Appendix.]

phos·gene (fōs/'jēn', fōz/'-) *n.* A colorless volatile liquid or gas, COCl₂, used as a poison gas and in making glass, dyes, resins, and plastics.

phosph- *pref.* Variant of **phospho-**.

phos·pham·i·don (fōs-fām/'i-dōn') *n.* A colorless insecticide, C₁₀H₁₉ClNO₅P, used to control mites, beetles, aphids, and other plant pests. [PHOSPH(ATE) + AMID(E) + -ON³.]

phos·pha·tase (fōs/'fā-tās', -tāz') *n.* Any of numerous enzymes that catalyze the hydrolysis of esters of phosphoric acid and are important in the absorption and metabolism of carbohydrates, nucleotides, and phospholipids and in the calcification of bone. [PHOSPHAT(E) + -ASE.]

phos·phate (fōs/'fāt') *n.* **1.** A salt or an ester of phosphoric acid. **2.** A fertilizer containing phosphorus compounds. **3.** *Chicago.* A soda fountain drink made by blending carbonated water with flavored syrup. [PHOSPH(O)- + -ATE².]

—**phos·phat'ic** (fōs-fāt'ik) *adj.*

phosphate rock (fōs/'fāt' rōk) *n.* Any of various rocks composed largely of phosphate minerals, especially apatite, used as fertilizer and as a source of phosphorous compounds.

phos·pha·tide (fōs/'fā-tīd') *n.* See **phospholipid**. [PHOSPHAT(E) + -IDE.]

—**phos'pha·tid'ic** (-tīd'ik) *adj.*

phos·pha·tize (fōs/'fā-tīz') *v. tr.* **phos·pha·tized, phos·pha·tiz·ing, phos·pha·tiz·es.** **1.** To change into phosphates or a phosphate. **2.** To treat with phosphate or phosphoric acid. —**phos'pha·ti·za'tion** (-tī-zā'shən) *n.*

phos·pha·tu·ri·a (fōs/'fā-tōōr/'ē-ə, -tyōōr'-) *n.* An excess of phosphates in the urine. [PHOSPHAT(E) + -URIA.] —**phos'pha·tu'ric** *adj.*

phos·phene (fōs/'fēn') *n.* A sensation of light caused by excitation of the retina by mechanical or electrical means rather than by light, as when the eyeballs are pressed through closed lids. [French *phosphène*: Greek *phōs*, light; see PHOS- + Greek *phainein*, to cause to appear, to show; see **bhā**¹ in Appendix.]

phos·phide (fōs/'fid') also **phos·phid** (-fid) *n.* A compound of phosphorus and a more electropositive element or radical.

phos·phine (fōs/'fēn') also **phos·phin** (-fīn) *n.* **1.** A colorless, spontaneously flammable poisonous gas, PH₃, having a fishy odor and used as a doping agent for solid-state components. **2.** Any of several organic compounds having the structure of an amine but with phosphorus in place of nitrogen.

phos·phite (fōs/'fīt') *n.* A salt or an ester of phosphorous acid.

phospho- or **phosph-** *pref.* **1.** Phosphorus: *phosphine*. **2.** Phosphate: *phospholipid*. [From PHOSPHORUS.]

phos·pho·cre·a·tine (fōs/'fō-krē'ə-tēn') also **phos·pho·cre·a·tin** (-tīn) *n.* An organic compound, C₄H₁₀N₃O₅P, found in muscle tissue and capable of stor-

ing and providing energy for muscular contraction. Also called *creatine phosphate*

phos·pho·fruc·to·ki·nase (fös'fō-frūk'tō-kī'nās, -frōök'-) *n.* A glycolytic enzyme that catalyzes the phosphorylation of fructose phosphate. [PHOSPHO- + Latin *fructus*, fruit; see FRUIT + KINASE.]

phos·pho·lip·id (fös'fō-līp'īd) *n.* Any of various phosphorous-containing lipids, such as lecithin and cephalin, that are composed mainly of fatty acids, a phosphate group, and a simple organic molecule. Also called *phosphatide*

phos·pho·ni·um (fös-fō'nē-əm) *n.* A univalent radical, PH_4 , derived from phosphine. [PHOSPH(O)- + (AMM)ONIUM.]

phos·pho·pro·tein (fös'fō-prō'tēn', -tē-īn) *n.* Any of a group of proteins, such as casein, containing chemically bound phosphoric acid.

phos·phor (fös'fər, -fōr') *n.* **1.** A substance that exhibits phosphorescence.

2. The phosphorescent coating on the inside of the screen of a cathode-ray tube.

[Latin *Phosphorus*, the morning star. See PHOSPHORUS.]

phosphor bronze (fös'fər brōnz) *n.* A hard, strong, corrosion-resistant bronze containing tin and a small amount of phosphorus, used in machine parts, springs, and fine tubing.

phos·pho·resce (fös'fə-rēs') *v. intr.* **phos·pho·resced,**

phos·pho·resc·ing, phos·pho·resc·es. To persist in emitting light, unaccompanied by sensible heat or combustion, after exposure to and removal of a source of radiation. [Probably back-formation from PHOSPHORESCENT.]

phos·pho·res·cence (fös'fə-rēs'əns) *n.* **1.** Persistent emission of light following exposure to and removal of incident radiation. **2.** Emission of light without burning or by very slow burning without appreciable heat, as from the slow oxidation of phosphorous: "He saw the phosphorescence of the Gulf weed in the water" (Ernest Hemingway). —**phos'pho-res'cent** *adj.* —**phos'pho-res'cent·ly** *adv.*

phos·phor·ic (fös-fōr'īk, -fōr'-) *adj.* Of, relating to, or containing phosphorus, especially with a valence of 5 or a valence higher than that of a comparable phosphorous compound.

phosphoric acid (fös-fōr'īk əs'īd) *n.* A clear colorless liquid, H_3PO_4 , used in fertilizers, detergents, food flavoring, and pharmaceuticals.

phos·pho·rism (fös'fə-rīz'əm) *n.* Chronic phosphorus poisoning.

phos·pho·rite (fös'fə-rīt') *n.* A sedimentary rock consisting predominantly of apatite and other phosphates. [PHOSPHOR(US) + -ITE¹.]

phos·pho·rous (fös'fər-əs, fös-fōr'əs, -fōr'-) *adj.* Of, relating to, or containing phosphorus, especially with a valence of 3 or a valence lower than that of a comparable phosphoric compound.

phosphorous acid (fös'fər-əs əs'īd) *n.* A white or yellowish hygroscopic crystalline solid, H_3PO_3 , used as a reducing agent and to produce phosphite salts.

phos·pho·rus (fös'fär-əs) *n.* **1.** *Symbol P* A highly reactive, poisonous, non-metallic element occurring naturally in phosphates, especially apatite, and existing in three allotropic forms, white (or sometimes yellow), red, and black. An essential constituent of protoplasm, it is used in safety matches, pyrotechnics, incendiary shells, and fertilizers and to protect metal surfaces from corrosion. Atomic number 15; atomic weight 30.9738; melting point (white) 44.1°C; boiling point 280°C; specific gravity (white) 1.82; valence 3, 5. **2.** A phosphorescent substance. [Latin *Phōsphorus*, morning star, from Greek, bringing light, morning star : *phōs*, light; see **bhā**⁻¹ in Appendix + *-phoros*, *-phorous*.]

phos·pho·ryl·ase (fös'fär-ə-lās', -lāz') *n.* An enzyme that catalyzes the production of glucose phosphate from glycogen and inorganic phosphate.

phos·pho·ryl·ate (fös'fär-ə-lāt') *v. tr.* **phos·pho·ryl·at·ed**,

phos·pho·ryl·at·ing, **phos·pho·ryl·ates**. To add a phosphate group to (an organic molecule). —**phos'pho·ryl·a'tion** *n.* —**phos'pho·ryl·a'tive** *adj.*

phot (fōt) *n.* *Physics.* A unit of illumination equal to one lumen per square centimeter. [Greek *phōs*, *phōt-*, light. See **bhā**⁻¹ in Appendix.]

phot- *pref.* Variant of **photo-**.

pho·tic (fō'tik) *adj.* **1.** Of or relating to light. **2.** Penetrated by or receiving light. **3.** Designating or relating to the layer of a body of water that is penetrated by sufficient sunlight for photosynthesis: *the photic zone of the ocean.*

pho·to (fō'tō) *Informal. n. pl. pho·tos.* A photograph. — *v. tr. intr.*

pho·toed, **pho·to·ing**, **pho·tos**. To photograph or take photographs.

photo- or **phot-** *pref.* **1.** Light; radiant energy: *photosynthesis.*

2. Photographic: *photomontage.* **3.** Photoelectric: *photoemission.* [Greek *phōto-*, from *phōs*, *phōt-*. See **bhā**⁻¹ in Appendix.]

pho·to·ac·tive (fō'tō-āk'tiv) *adj.* **1.** Capable of responding to light photoelectrically. **2.** Capable of responding to sunlight or ultraviolet radiation by chemical reaction. —**pho'to·ac·tiv'i·ty** *n.*

pho·to·au·to·troph (fō'tō-ō'tə-trōf', -trōf') *n.* An organism capable of synthesizing its own food from inorganic substances using light as an energy source. Green plants and photosynthetic bacteria are photoautotrophs.

—**pho'to·au'to·troph'ic** *adj.* —**pho'to·au'to·troph'i·cal·ly** *adv.*

pho·to·bi·ol·o·gy (fō'tō-bī-ōl'ə-jē) *n.* The study of the effects of light on living organisms and biological processes. —**pho'to·bi'o·log'ic** (-bī'ə-lōj'ik), **pho'to·bi'o·log'i·cal** (-i-kəl) *adj.*

pho·to·bi·ot·ic (fō'tō-bī-ōt'ik) *adj.* *Biology.* Depending on light for life and growth.

pho·to·cell (fō'tō-sěl') *n.* A photoelectric cell.

photochemical smog (fō'tō-kēm'i-kəl smög) *n.* Air pollution produced by the action of sunlight on hydrocarbons, nitrogen oxides, and other pollutants.

pho-to-chem-is-try (fō'tō-kēm'ī-strē) *n.* The chemistry of the effects of light on chemical systems. —**pho'to-chem'i-cal** (-ī-kəl) *adj.*

—**pho'to-chem'i-cal-ly** *adv.*

pho-to-co-ag-u-la-tion (fō'tō-kō-äg'yə-lā'shən) *n.* Surgical coagulation of tissue by means of intense light energy, such as a laser beam, performed to destroy abnormal tissues or to form adhesive scars, especially in ophthalmology.

—**pho'to-co-ag'u-late** *v.*

pho-to-com-pose (fō'tō-kəm-pōz') *v. tr.* **pho-to-com-posed,**

pho-to-com-pos-ing, pho-to-com-pos-es. *Printing.* To prepare (written matter) for printing by photocomposition. —**pho'to-com-pos'er** *n.*

pho-to-com-po-si-tion (fō'tō-kōm'pə-zīsh'ən) *n.* *Printing.* The preparation of manuscript for printing by the projection of images of type characters on photographic film, which is then used to make printing plates. Also called *phototype-setting*

pho-to-con-duc-tiv-i-ty (fō'tō-kōn'dük-tiv'ī-tē) *n. pl.*

pho-to-con-duc-tiv-i-ties. Electrical conductivity affected by exposure to light.

—**pho'to-con-duc'tion** *n.* —**pho'to-con-duc'tive** *adj.*

pho-to-cop-i-er (fō'tə-köp'ē-ər) *n.* A machine for photographically reproducing written, printed, or graphic material, especially by xerography.

pho-to-cop-y (fō'tə-köp'ē) *v. tr.* **pho-to-cop-ied, pho-to-cop-y-ing,**

pho-to-cop-ies. To make a photographic reproduction of (printed or graphic material), especially by xerography. — *n. pl.* **pho-to-cop-ies.** A photographic or xerographic reproduction.

pho-to-cur-rent (fō'tō-kūr'ənt, -kūr'-) *n.* An electric current produced by illumination of a photoelectric material.

pho-to-de-com-po-si-tion (fō'tō-dē-kōm'pə-zīsh'ən) *n.* Chemical breakdown caused by radiant energy.

pho-to-de-grad-a-ble (fō'tō-dī-grā'də-bəl) *adj.* Capable of being chemically broken down by light: *photodegradable plastic.*

pho-to-dis-in-te-gra-tion (fō'tō-dīs-īn'tī-grā'shən) *n.* Nuclear disintegration or transformation caused by absorption of high-energy radiation, as of gamma rays.

pho-to-dra-ma (fō'tə-drä'mə, -dräm'ə) *n.* See **photoplay.**

pho-to-du-pli-cate (fō'tō-dōō'plī-kāt', -dyōō'-) *v. tr.*

pho-to-du-pli-cat-ed, pho-to-du-pli-cat-ing, pho-to-du-pli-cates. To photocopy. — *n.* (-kīt) A photocopy. —**pho'to-du'pli-ca'tion** *n.*

pho-to-dy-nam-ic (fō'tō-dī-nām'ik) *adj.* **1.** Of or relating to the energy of light. **2.** Enhancing the effects of or inducing a toxic reaction to light, especially to ultraviolet light. —**pho'to-dy-nam'i-cal-ly** *adv.*

pho-to-dy-nam-ics (fō'tō-dī-nām'iks) *n.* (*used with a sing. verb*). The science that deals with the activating effects of light on living organisms.

pho-to-e-lec-tric (fō'tō-ī-lĕk'trĭk) also **pho-to-e-lec-tri-cal** (-trĭ-kəl) *adj.* Of or relating to the electric effects, especially increased conductivity, caused by light. —**pho'to-e-lec'tri-cal-ly** *adv.*

photoelectric cell (fō'tō-ī-lĕk'trĭk sĕl) *n.* An electronic device having an electrical output that varies in response to incident radiation, especially to visible light. Also called *electric eye*

photoelectric effect (fō'tō-ī-lĕk'trĭk ĭ-fĕkt') *n.* Ejection of electrons from a substance by incident electromagnetic radiation, especially by visible light.

pho-to-e-lec-tron (fō'tō-ī-lĕk'trŏn') *n.* An electron released or ejected from a substance by photoelectric effect.

pho-to-e-mis-sion (fō'tō-ī-mĭsh'ən) *n.* Emission of photoelectrons, especially from metallic surfaces.

pho-to-en-grave (fō'tō-ĕn-grāv') *v. tr.* **pho-to-en-graved**, **pho-to-en-grav-ing**, **pho-to-en-graves.** To reproduce by photoengraving; make a photoengraving of. —**pho'to-en-grav'er** *n.*

pho-to-en-grav-ing (fō'tō-ĕn-grāv'vĭng) *n.* **1.** The process of reproducing graphic material by transferring the image photographically to a plate or another surface, which is then etched for printing. **2.** A plate prepared by this process.

3. A reproduction made by this process.

pho-to-es-say also **pho-to es-say** (fō'tō-ĕs'ā') *n.* A story told chiefly through photographs usually supplemented by a written commentary.

—**pho'to-es'say-ist** *n.*

photo finish (fō'tō fĭn'ĭsh) *n.* **1.** *Sports.* A race in which the leading contestants cross the finish line so close together that the winner must be determined by a photograph taken at the moment of crossing. **2.** *Informal.* An extremely close competition.

pho-to-fin-ish-ing (fō'tō-fĭn'ĭ-shĭng) *n.* The act or business of developing camera films and printing photographs for customers. —**pho'to-fin'ish-er** *n.*

pho-to-flash (fō'tō-flāsh') *n.* See **flashbulb**.

pho-to-flood (fō'tō-flŭd') *n.* A reusable electric lamp that produces a bright continuous light for photographic illumination. Also called *photoflood lamp*

pho-to-fluor-o-gram (fō'tə-flŏŏr'ə-grām', -flŏr'-, -flŏr'-) *n.* A photograph made by photofluorography.

pho-to-fluor-og-ra-phy (fō'tō-flŏŏ-rŏg'rə-fĕ-, -flŏ-, -flŏ-) *n.* The photographic record of x-ray images produced by a fluoroscope. Also called *fluorography* —**pho'to-fluor-o-graph'ic** (-flŏŏr'ə-grāf'ĭk, -flŏr'-, -flŏr'-) *adj.*

pho-tog (fə-tŏg') *n.* *Informal.* A person who takes photographs, especially as a profession; a photographer.

photog. *abbr.* Photograph; photographic; photography.

pho-to-gel-a-tin process (fō'tō-jĕl'ə-tĭn prŏs'ĕs') *n.* See **collotype** (*n.*, sense 1).

pho-to-gene (fō'tə-jēn') *n.* See **afterimage**.

pho-to-gen-ic (fō'tə-jēn'ik) *adj.* **1.** Attractive as a subject for photography.

2. *Biology.* Producing or emitting light; phosphorescent: *photogenic bacteria*.

3. Caused or produced by light: *photogenic seizures*. —**pho'to-gen'i-cal-ly** *adv.*

pho-to-gram (fō'tə-grām') *n.* **1.** An image produced without a camera by placing an object in contact with film or photosensitive paper and exposing it to light. **2.** A photograph.

pho-to-gram-me-try (fō'tə-grām'ī-trē) *n.* **1.** The process of making maps or scale drawings from photographs, especially aerial photographs. **2.** The process of making precise measurements by means of photography.

—**pho'to-gram-met'ric** (-grə-mēt'rik) *adj.* —**pho'to-gram'me-trist** *n.*

pho-to-graph (fō'tə-grāf') *n.* *Abbr.* **photog.** An image, especially a positive print, recorded by a camera and reproduced on a photosensitive surface. — *v.*

pho-to-graphed, pho-to-graph-ing, pho-to-graphs. — *v. tr.* To take a photograph of. — *v. intr.* **1.** To practice photography. **2.** To be the subject for photographs: *She photographs well*. —**pho'to-graph'a-ble** *adj.*

—**pho-tog'ra-pher** (fə-tōg'rə-fər) *n.*

pho-to-graph-ic (fō'tə-grāf'ik) also **pho-to-graph-i-cal** (-ikəl) *adj.* *Abbr.*

photog. **1.** Of, relating to, or consisting of photography or a photograph.

2. Used in photography: *a photographic lens*. **3.** Resembling a photograph, especially representing or simulating something with great accuracy and fidelity of detail. **4.** Capable of forming accurate and lasting impressions: *a photographic memory*. —**pho'to-graph'i-cal-ly** *adv.*

pho-tog-ra-phy (fə-tōg'rə-fē) *n.* *Abbr.* **photog.** **1.** The art or process of producing images of objects on photosensitive surfaces. **2.** The art, practice, or occupation of taking and printing photographs. **3.** A body of photographs.

pho-to-gra-vure (fō'tə-grə-vyūr') *n.* The process of printing from an intaglio plate, etched according to a photographic image.

pho-to-he-li-o-graph (fō'tō-hē'lē-ə-grāf') *n.* A telescope equipped to photograph the sun.

pho-to-jour-nal-ism (fō'tō-jûr'nə-līz'əm) *n.* Journalism in which a news story is presented primarily through photographs with supplementary written copy. —**pho'to-jour'nal-ist** *n.* —**pho'to-jour'nal-is'tic** *adj.*

pho-to-ki-ne-sis (fō'tō-kī-nē'sīs, -kī-) *n.* Movement as a response to light. —**pho'to-ki-net'ic** (-nēt'ik) *adj.*

pho-to-lith-o-graph (fō'tō-līth'ə-grāf') *n.* A picture made by photolithography. — *v. tr.* **pho-to-lith-o-graphed, pho-to-lith-o-graph-ing,**

pho-to-lith-o-graphs. To reproduce by means of photolithography; make a photolithograph of. —**pho'to-li-thog'ra-pher** (-lī-thōg'rə-fər) *n.*

pho-to-li-thog-ra-phy (fō'tō-lī-thōg'rə-fē) *n.* A planographic printing process using plates made according to a photographic image.

—**pho'to-lith'o-graph'ic** (-līth'ə-grăf'īk) *adj.*

—**pho'to-lith'o-graph'i-cal-ly** *adv.*

pho-tol-y-sis (fō-tōl'ī-sīs) *n.* Chemical decomposition induced by light or other radiant energy. —**pho'to-lyt'ic** (fō'tə-līt'īk) *adj.* —**pho'to-lyt'i-cal-ly** *adv.*

photom. *abbr. Physics.* Photometry.

pho-to-map (fō'tə-măp') *n.* A map made by superimposing orienting data and markings on an aerial photograph. — *v.* **pho-to-mapped,**

pho-to-map-ping, pho-to-maps. — *v. tr.* To make a photomap of. — *v. intr.* To make a photomap.

pho-to-me-chan-i-cal (fō'tō-mī-kăn'ī-kəl) *adj.* Of, relating to, or involving any of various methods by which plates are prepared for printing by means of photography. —**pho'to-me-chan'i-cal-ly** *adv.*

pho-tom-e-ter (fō-tōm'ī-tər) *n.* An instrument for measuring a property of light, especially luminous intensity or flux.

pho-tom-e-try (fō-tōm'ī-trē) *n.* *Abbr. photom. Physics.* Measurement of the properties of light, especially luminous intensity. —**pho'to-met'ric** (fō'tə-mēt'rik), **pho'to-met'ri-cal** (-rī-kəl) *adj.* —**pho'to-met'ri-cal-ly** *adv.*

—**pho-tom'e-trist** *n.*

pho-to-mi-cro-graph (fō'tō-mī'krə-grăf') *n.* A photograph made through a microscope. Also called *microphotograph* — *v. tr.* **pho-to-mi-cro-graphed,** **pho-to-mi-cro-graph-ing, pho-to-mi-cro-graphs.** To photograph (an object) through a microscope. —**pho'to-mi-crog'ra-pher** (-mī-krōg'rə-fər) *n.*

—**pho'to-mi'cro-graph'ic** *adj.* —**pho'to-mi-crog'ra-phy** *n.*

pho-to-mi-cro-scope (fō'tō-mī'krə-skōp') *n.* An instrument consisting of a microscope, camera apparatus, and light source used for making photomicrographs. —**pho'to-mi'cro-scop'ic** (-skōp'īk) *adj.*

pho-to-mon-tage (fō'tō-mōn-tăzh', -môn-) *n.* **1.** The technique of making a picture by assembling pieces of photographs, often in combination with other types of graphic material. **2.** The composite picture produced by this technique.

pho-to-mu-ral (fō'tō-myōōr'əl) *n.* A greatly enlarged photograph or series of photographs placed on a wall especially as decoration. —**pho'to-mu'ral-ist** *n.*

pho-ton (fō'tōn') *n.* **1.** The quantum of electromagnetic energy, generally regarded as a discrete particle having zero mass, no electric charge, and an indefinitely long lifetime. **2.** A unit of retinal illumination, equal to the amount of light that reaches the retina through 1 square millimeter of pupil area from a surface having a brightness of 1 candela per square meter. —**pho-ton'ic** *adj.*

pho-to-neg-a-tive (fō'tō-nēg'ə-tīv) *adj. Biology.* Repelled by light; exhibiting a negative phototactic or phototropic response.

pho-to-nu-cle-ar (fō'tō-nōō'klē-ər, -nyōō'-) *adj.* Of or relating to a nuclear reaction induced by photons.

pho-to-off-set (fō'tō-ōf'sēt', -ōf'-) *n.* A method of offset printing using photomechanical plates.

photo opportunity (fō'tō ōp'ər-tōō'nī-tē) *n.* A brief period reserved for the press to photograph the participants in a newsworthy event.

pho-to-pe-ri-od (fō'tō-pīr'ē-əd) *n.* The duration of an organism's daily exposure to light, considered especially with regard to the effect of the exposure on growth and development. —**pho'to-pe'ri-od'ic** (-ōd'īk),

pho'to-pe'ri-od'i-cal (-ī-kəl) *adj.*

pho-to-pe-ri-od-ism (fō'tō-pīr'ē-ə-dīz'əm) also **pho-to-pe-ri-o-dic-i-ty** (-dīs'ī-tē) *n. pl.* **pho-to-pe-ri-od-isms** also **pho-to-pe-ri-o-dic-i-ties**. The response of an organism to changes in its photoperiod, especially as indicated by vital processes.

pho-to-phil-ic (fō'tə-fīl'īk) also **pho-toph-i-lous** (fō-tōf'ə-ləs) *adj. Biology.* Growing or functioning best in strong light.

pho-to-pho-bi-a (fō'tə-fō'bē-ə) *n.* **1.** An abnormal sensitivity to or intolerance of light, especially by the eyes, as may be caused by eye inflammation, lack of pigmentation in the iris, or various diseases. **2.** An abnormal or irrational fear of light.

pho-to-pho-bic (fō'tə-fō'bīk) *adj.* **1.** Exhibiting photophobia. **2.** Avoiding light. **3.** Growing best in the absence of light; photonegative.

pho-to-phore (fō'tə-fōr', -fōr') *n.* A light-producing organ found especially in marine fishes that emits light from specialized structures or derives light from symbiotic luminescent bacteria.

pho-to-phos-phor-y-la-tion (fō'tō-fōs'fōr-ə-lā'shən, -fər-) *n.* Phosphorylation induced by radiant energy in photosynthesis.

pho-to-pi-a (fō-tō'pē-ə) *n.* Vision in bright light, mediated by cone cells of the retina; daylight vision. —**pho-to'pic** (-tō'pīk, -tōp'īk) *adj.*

pho-to-play (fō'tə-plā') *n.* A play filmed or arranged for filming as a movie. Also called *photodrama*

pho-to-pos-i-tive (fō'tō-pōz'ī-tīv) *adj. Biology.* Drawn to light; exhibiting a positive phototactic or phototropic response.

pho-to-prod-uct (fō'tō-prōd'əkt) *n.* The product of a photochemical reaction.

pho-to-re-ac-tion (fō'tō-rē-āk'shən) *n.* A photochemical reaction.

pho-to-re-al-ism (fō'tō-rē'ə-līz'əm) *n.* A style of painting that resembles photography in its meticulous attention to realistic detail. —**pho'to-re'al-ist** *adj., n.* —**pho'to-re'al-is'tic** *adj.*

pho·to·re·cep·tion (fō'tō-rī-sĕp'shən) *n.* The detection, absorption, and use of light, as for vision in animals or phototropism and photosynthesis in plants.

—**pho'to·re·cep'tive** *adj.*

pho·to·re·cep·tor (fō'tō-rī-sĕp'tər) *n.* A nerve ending, cell, or group of cells specialized to sense or receive light.

pho·to·re·con·nais·sance (fō'tō-rī-kŏn'ə-səns, -zəns) *n.* Photographic aerial reconnaissance especially of military targets.

pho·to·res·pi·ra·tion (fō'tō-rĕs'pə-rā'shən) *n.* Oxidation of carbohydrates in plants with the release of carbon dioxide during photosynthesis.

pho·to·sen·si·tive (fō'tō-sĕn'sī-tĭv) *adj.* **1.** Sensitive or responsive to light or other radiant energy. **2. Medicine.** Abnormally sensitive or reactive to light.

pho·to·sen·si·tiv·i·ty (fō'tō-sĕn'sī-tĭv'ī-tē) *n.* *pl.* **pho·to·sen·si·tiv·i·ties.**

1. Sensitivity or responsiveness to light. **2. Medicine.** An abnormally heightened response, especially of the skin, to sunlight or ultraviolet radiation, caused by certain disorders or chemicals and characterized by a toxic or allergic reaction.

pho·to·sen·si·ti·za·tion (fō'tō-sĕn'sī-tĭ-zā'shən) *n.* The act or process of inducing photosensitivity.

pho·to·sen·si·tize (fō'tō-sĕn'sī-tĭz') *v. tr.* **pho·to·sen·si·tized,**

pho·to·sen·si·tiz·ing, pho·to·sen·si·tiz·es. To make (an organism, a cell, or a substance) photosensitive.

pho·to·set (fō'tō-sĕt') *v. tr.* **pho·to·set, pho·to·set·ting, pho·to·sets.**

Printing. To photocompose. —**pho'to·set'ter** *n.*

pho·to·sphere (fō'tə-sfĭr') *n.* The visible outer layer of a star, especially of the sun. —**pho'to·spher'ic** (-sfĭr'ĭk, -sfĕr'ĭk) *adj.*

Pho·to·stat (fō'tə-stăt') A trademark used for a photographic device for making positive or negative copies of graphic matter. This trademark often occurs in lowercase in print: “*denying into evidence photostats produced of insurance claims filed for stolen property*” (United States Law Week). “*a framed photostat of the 1901 school-system payroll*” (U.S. News & World Report). “*displayed a photostat copy of a certified letter*” (Los Angeles Times).

pho·to·syn·thate (fō'tō-sĭn'thāt) *n.* A chemical product of photosynthesis.

pho·to·syn·the·sis (fō'tō-sĭn'thĭ-sĭs) *n.* The process in green plants and certain other organisms by which carbohydrates are synthesized from carbon dioxide and water using light as an energy source. Most forms of photosynthesis release oxygen as a byproduct. —**pho'to·syn·thet'ic** (-sĭn-thĕt'ĭk) *adj.*

—**pho'to·syn·thet'i·cal·ly** *adv.*

pho·to·syn·the·size (fō'tō-sĭn'thĭ-sĭz') *v.* **pho·to·syn·the·sized,**

pho·to·syn·the·siz·ing, pho·to·syn·the·siz·es. — *v. tr.* To synthesize by the process of photosynthesis. — *v. intr.* To perform the process of photosynthesis.

pho-to-tax-is (fō'tō-tāk'sis) *n.* *Biology.* The movement of an organism or a cell toward or away from a source of light. —**pho'to-tac'tic** (-tāk'tik) *adj.*
—**pho'to-tac'ti-cal-ly** *adv.*

pho-to-ther-a-py (fō'tō-thēr'ə-pē) *n. pl. pho-to-ther-a-pies.* The treatment of a disorder, especially of the skin, by exposure to light, including ultraviolet and infrared radiation. —**pho'to-ther'a-peu'tic** (-thēr'ə-pyōō'tik) *adj.*

pho-tot-o-nus (fō-tōt'n-əs) *n. Biology.* The state of being sensitive to or irritated by light. —**pho'to-ton'ic** (fō'tə-tōn'ik) *adj.*

pho-to-tox-ic (fō'tō-tōk'sik) *adj.* Rendering the skin susceptible to damage by light. Used of certain medications and cosmetics. —**pho'to-tox-ic'i-ty** (-tōk-sis'i-tē) *n.*

pho-to-tran-sis-tor (fō'tō-trän-zis'tər) *n.* A transistor having highly photosensitive electrical characteristics.

pho-to-troph (fō'tə-trōf', -trōf') *n.* A photoautotroph. [PHOTO- + Greek *tro-phē*, nourishment.] —**pho'to-troph'ic** *adj.* —**pho'to-troph'i-cal-ly** *adv.*

pho-tot-ro-pism (fō-tōt'rə-piz'əm) *n.* Growth or movement of a sessile organism toward or away from a source of light. —**pho'to-tro'pic** (fō'tə-trō'pik, -trōp'ik) *adj.* —**pho'to-tro'pi-cal-ly** *adv.*

pho-to-tube (fō'tō-tōōb', -tyōōb') *n.* An electron tube with a photosensitive cathode.

pho-to-type-set-ter (fō'tō-tīp'sēt'ər) *n. Printing.* **1.** Any of various machines used in photocomposition. **2.** The operator of one of these machines.

pho-to-type-set-ting (fō'tō-tīp'sēt'ing) *n. Printing.* See **photocomposition.**

pho-to-ty-pog-ra-phy (fō'tō-tī-pōg'rə-fē) *n. Printing.* Photomechanical printing that resembles metal typography. —**pho'to-ty'po-graph'ic** (-tī'pə-grāf'ik), **pho'to-ty'po-graph'i-cal** (-i-kəl) *adj.*

—**pho'to-ty'po-graph'i-cal-ly** *adv.*

pho-to-vol-ta-ic (fō'tō-vōl-tā'ik, -vōl-) *adj.* Capable of producing a voltage when exposed to radiant energy, especially light. —**pho'to-vol-ta'ic** *n.*

photovoltaic cell (fō'tō-vōl-tā'ik sēl) *n.* See **solar cell.**

phr. *abbr.* Phrase.

phrag-mi-tes (frāg-mī'tēz) *n.* Any of several perennial reeds of the genus *Phragmites* in the grass family, found worldwide in marshes and wetlands and having stems up to nearly 6 meters (20 feet) long. [Latin *phragmitēs*, kind of reed growing in hedges, from Greek *phragmitēs*, fencing in, from *phragma*, fence, from *phrassein*, to fence in.]

phrasal verb (frā'zəl vûrb) *n.* An English verb complex consisting of a verb and one or more following particles and acting as a complete syntactic and semantic unit, as *look up* in *She looked up the word in the dictionary* or *She looked the word up in the dictionary.*

phrase (frāz) *n.* *Abbr. phr.* **1.** A sequence of words intended to have meaning. **2. a.** A characteristic way or mode of expression. **b.** A brief, apt, and cogent expression. **3.** A word or group of words read or spoken as a unit and separated by pauses or other junctures. **4. Grammar.** Two or more words in sequence that form a syntactic unit that is less than a complete sentence. **5. Music.** A segment of a composition, usually consisting of four or eight measures. **6.** A series of dance movements forming a unit in a choreographic pattern. — *v.* **phrased, phras-ing, phras-es.** — *v. tr.* **1.** To express orally or in writing: *The speaker phrased several opinions.* **2.** To pace or mark off (something read aloud or spoken) by pauses. **3. Music. a.** To divide (a passage) into phrases. **b.** To combine (notes) in a phrase. — *v. intr.* **1.** To make or render phrases, as in reading aloud. **2. Music.** To perform a passage with the correct phrasing. [Latin *phrasis*, diction, from Greek, speech, diction, phrase, from *phrazein*, to point out, show. See **g^whren-** in Appendix.] — **phras'al** *adj.* — **phras'al-ly** *adv.*

phrase book (frāz böök) *n.* A book of idiomatic foreign language expressions and their translations.

phrase·mak·er (frāz'mā'kər) *n.* **1.** One, such as a speechwriter, who composes memorable or effective phrases. **2.** One who makes attractive but often meaningless phrases. In this sense, also called *phrasemonger* — **phrase'mak'ing** *n.*

phrase marker (frāz mār'kər) *n.* *Grammar.* In generative grammar, a representation in the form of a tree diagram or labeled brackets of the constituent structure of a sentence.

phrase·mon·ger (frāz'müŋg'gər, -mōŋg'-) *n.* See **phrasemaker** (*n.*, sense 2). — **phrase'mon'ger-ing** *n.*

phra·se·o·gram (frā'zē-ə-grām') *n.* A symbol, such as one used in shorthand, that designates a particular phrase.

phra·se·o·graph (frā'zē-ə-grāf') *n.* A phrase represented by a phraseogram. — **phra'se·o·graph'ic** *adj.*

phra·se·ol·o·gy (frā'zē-öl'ə-jē) *n. pl.* **phra·se·ol·o·gies.** **1.** The way in which words and phrases are used in speech or writing; style. **2.** A set of expressions used by a particular person or group: *nautical phraseology.* See **Synonyms** at **diction.** — **phra'se·o·log'i·cal** (-ə-lōj'ī-kəl) *adj.* — **phra'se·ol'o·gist** *n.*

phras-ing (frā'zīŋ) *n.* **1.** The act of making phrases. **2.** The manner in which an expression is phrased. See **Synonyms** at **diction.** **3. Music.** The manner in which a phrase is rendered or interpreted.

phra·try (frā'trē) *n. pl.* **phra·tries.** **1.** A kinship group constituting an intermediate division in the primitive structure of the Hellenic tribe or phyle, consisting of several patrilinear clans, and surviving in classical times as a territorial subdivision in the political and military organization of the Athenian state.

2. Anthropology. An exogamous subdivision of the tribe, constituting two or

more related clans. [Greek *phratria*, from *phratēr*, *phratr-*, fellow member of a clan. See **bhrāter-** in Appendix.] —**phra'tric** *adj.*

phre-at-ic (frē-ăt'īk) *adj.* Of or relating to ground water. [From Greek *phrear*, *phreat-*, well, spring. See **bhreu-** in Appendix.]

phre-at-o-phyte (frē-ăt'ə-fīt') *n.* A deep-rooted plant that obtains water from a permanent ground supply or from the water table. —**phre-at'o-phyt'ic** (-fīt'īk) *adj.*

phren. *abbr.* Phrenology.

phren- *pref.* Variant of **phreno-**.

phre-net-ic (frə-nět'īk) or **phre-net-i-cal** (-ĭ-kəl) *adj.* Variants of **frenetic**.

-phrenia *suff.* Mental disorder: *schizophrenia*. [From Greek *phrēn*, mind. See **g^whren-** in Appendix.]

phren-ic (frēn'īk, frē'nīk) *adj.* **1.** Of or relating to the mind. **2.** *Anatomy.* Of or relating to the diaphragm: *the phrenic nerve*.

phre-ni-tis (frī-nī'tīs) *n.* **1.** Inflammation of the diaphragm. **2.** Encephalitis. No longer in scientific use. —**phre-nit'ic** (-nīt'īk) *adj.*

phreno- or **phren-** *pref.* **1.** Mind: *phrenology*. **2.** Diaphragm: *phrenic*.

[Greek, from *phrēn*, *phren-*, diaphragm, midriff, heart, mind. See **g^whren-** in Appendix.]

phre-nol-o-gy (frī-nōl'ə-jē) *n.* *Abbr.* **phren.** The study of the shape and protuberances of the skull, based on the now discredited belief that they reveal character and mental capacity. —**phren'o-log'ic** (frēn'ə-lōj'īk, frē'nə-),

phren'o-log'i-cal (-ĭ-kəl) *adj.* —**phre-nol'o-gist** *n.*

phren-sy (frēn'zē) *n.* & *v.* *Archaic.* Variant of **frenzy**.

Phryg-i-a (frīj'ē-ə) An ancient region of central Asia Minor in modern-day central Turkey. It was settled c. 1200 B.C. and flourished from the eighth to the sixth century, after which it came under the influence of Lydia, Persia, Greece, Rome, and Byzantium.

Phrygian cap (frīj'ē-ən kăp) *n.* See **liberty cap**.

PHS *abbr.* Public Health Service.

phthal-ein also **phthal-eine** (thăl'ēn', thăl'ē-ĭn, thā'lēn', thā'lē-ĭn, -fthăl'-) *n.* Any of a group of chemical compounds formed by a reaction of phthalic anhydride with a phenol, from which certain synthetic dyes are derived. [PHTHAL(IC) + -EIN.]

phthal-ic (thăl'īk, fthăl'-) *adj.* **1.** Of, relating to, or derived from naphthalene. **2.** Relating to phthalic acid. [Short for *naphthalic acid*: NAPHTHAL(ENE) + -IC.]

phthalic acid (thăl'ík äs'íd) *n.* A colorless crystalline organic acid, $C_6H_4(COOH)_2$, prepared from naphthalene and used in the synthesis of dyes, perfumes, and other organic compounds.

phthalic anhydride (thăl'ík äñ-hī'dríd') *n.* A white crystalline compound, $C_6H_4(CO)_2O$, prepared by oxidizing naphthalene and used in the manufacture of phthaleins and other dyes, resins, plasticizers, and insecticides.

phthal-in (thăl'ín, fthäl'-) *n.* Any of various colorless compounds derived from the reduction of phthaleins.

phthal-o-cy-a-nine (thäl'ō-sī'ə-nēn', fthäl'-) *n.* Any of several stable, light-fast, blue or green organic pigments derived from the basic compound $(C_6H_4C_2N)_4N_4$ and used in enamels, printing inks, linoleum, and plastics.

[PHTHAL(IC) + CYANINE.]

phthi-ri-a-sis (thī-rī'ə-sīs, thī-) *n.* Infestation with lice, especially crab lice; pediculosis. [Latin *phthiriāsis*, from Greek *phtheiriasis*, from *phtheirian*, to be lousy, from *phtheir*, louse.]

phthis-ic (tiz'ík, thiz'-) *n.* **1.** Variant of **phthisis**. **2.** *Archaic.* Any illness of the lungs or throat, such as asthma or a cough. [Middle English *ptisike*, from Old French *ptisique*, from *phthisicus*, consumptive, from Greek *phthisikos*, from *phthisis*, wasting away, consumption. See PHTHISIS.] —**phthis'ic, phthis'i-cal** *adj.*

phthi-sis (thī'sīs, tī'-) also **phthis-ic** (tiz'ík, thiz'-) *n.* **1.** A disease characterized by the wasting away or atrophy of the body or a part of the body.

2. Tuberculosis of the lungs. No longer in scientific use. [Latin, from Greek, from *phthinein*, to waste away.]

phyco- *pref.* Seaweed; algae: *phycology*. [Greek *phuko-*, from *phukos*, seaweed.]

phy-co-bi-lin (fī'kō-bī'lín) *n.* Any of a group of water-soluble proteinaceous pigments that occur in red algae and cyanobacteria. [PHYCO- + Latin *bīlis*, bile + -IN.]

phy-co-cy-a-nin (fī'kō-sī'ə-nín) *n.* A blue phycobilin occurring especially in the cells of cyanobacteria.

phy-co-er-y-thrin (fī'kō-ēr'ī-thrín) *n.* A red phycobilin occurring especially in the cells of red algae.

phy-col-o-gy (fī-kōl'ə-jē) *n.* The branch of botany that deals with algae. Also called *algology* —**phy'co-log'i-cal** (fī'kə-lŏj'ī-kəl) *adj.* —**phy-col/o-gist** *n.*

phy-co-my-cete (fī'kō-mī'sēt', -mī-sēt') *n.* Any of various fungi that resemble algae, including certain molds and mildews. [From New Latin *Phycomycetes*, class name : PHYCO- + -MYCETE.] —**phy'co-my-ce'tous** *adj.*

Phyfe (fif), **Duncan**. 1768?-1854. Scottish-born American cabinetmaker. His shop was one of the first to use factory methods of furniture construction.

phy-la (fī'lə) *n.* Plural of **phylum**.

phy-lac-ter-y (fī-lāk'tə-rē) *n.* *pl.* **phy-lac-ter-ies**. **1.** *Judaism.* Either of two small leather boxes, each containing strips of parchment inscribed with quotations from the Hebrew Scriptures, one of which is strapped to the forehead and the other to the left arm by Orthodox and Conservative Jewish men during morning worship, except on the Sabbath and holidays. **2. a.** An amulet. **b.** A reminder. [Middle English *filaterie*, *philacterie*, from Old French *filatiere*, from Late Latin *phylactērium*, from Greek *phulaktērion*, guard's post, safeguard, phylactery, from *phulaktēr*, guard, from *phulax*, *phulak-*.]

phy-le (fī'lē) *n.* *pl.* **phy-lae** (-lē). A large citizens' organization based on kinship, constituting the largest political subdivision of an ancient Greek city-state. [Greek *phulē*, tribe, phyle. See **bheuə-** in Appendix.] —**phy/lic** *adj.*

phy-let-ic (fī-lēt'ik) *adj.* Of or relating to the evolutionary descent and development of a species or group of organisms; phylogenetic. [From Greek *phuletikos*, of or for a tribesman, from *phuletēs*, tribesman, from *phulē*, tribe. See **bheuə-** in Appendix.] —**phy-let/i-cal-ly** *adv.*

phyll- *pref.* Variant of **phyllo-**.

-phyll *suff.* Leaf: *sporophyll*. [From Greek *phullon*, leaf. See PHYLLO-.]

phyl-lite (fīl'it') *n.* A green, gray, or red metamorphic rock, similar to slate but often having a wavy surface and a distinctive micaceous luster. —**phyl-lit'ic** (fī-lit'ik) *adj.*

phyl-lo (fē'lō) *n.* Very thin sheets of pastry dough that make a flaky pastry used especially in Greek dishes. [Modern Greek *phullon*, from Greek, leaf. See PHYLLO-.]

phyllo- or **phyll-** *pref.* Leaf: *phylloid*. [Greek, from *phullon*, leaf. See **bhel-**³ in Appendix.]

phyl-lo-clade (fīl'ə-klād') also **phyl-lo-clad** (-klād') *n.* A flattened branch or stem that performs the function of or resembles a leaf, as in the Christmas cactus. [New Latin *phyllocladium* : PHYLLO- + Greek *kladōs*, branch.]

phyl-lode (fīl'ōd) also **phyl-lo-di-um** (fī-lō'dē-əm) *n.* *pl.* **phyl-lodes** also **phyl-lo-di-a** (-lō'dē-ə). A flattened leafstalk that functions as a leaf, as in an acacia. [New Latin *phyllōdium*, from Greek *phullōdēs*, leaflike : *phullon*, leaf; see PHYLLO- + *-ōdēs* variant of *-oeidēs*, -oid (probably related to *ozein*, *od-*, to smell).] —**phyl-lo'di-al** *adj.*

phyl-loid (fīl'oid') *adj.* Resembling a leaf; leaflike.

phyl-lome (fīl'ōm') *n.* A leaf or a plant part that evolved from a leaf. —**phyl-lo'mic** (fī-lō'mīk, -lōm'ik) *adj.*

phyl-loph-a-gous (fī-lōf'ə-gəs) *adj.* Feeding on leaves.

phyl-lo-pod (fīl'ə-pōd') *n.* Any of various branchiopod crustaceans having swimming and respiratory appendages that resemble leaves. — *adj.* also

phyl-lop-o-dous (fī-lōp'ə-dəs) Of or relating to the phyllopods.

—**phyl-lop'o-dan** (fī-lōp'ə-dən) *adj.* & *n.*

phyl·lo·tax·y (fīl'ə-tāk'sē) also **phyl·lo·tax·is** (fīl'ə-tāk'sīs) *n. pl.*

phyl·lo·tax·ies also **phyl·lo·tax·es**. **1.** The arrangement of leaves on a stem.

2. The principles governing leaf arrangement. —**phyl'lo·tac'tic** (-tāk'tik),

phyl'lo·tac'ti·cal *adj.*

-phyllous *suff.* Having a specified kind or number of leaves: *gamophyllous*.

[From New Latin *-phyllus*, from Greek *-phullos*, from *phullon*, leaf. See **bhel**³ in Appendix.]

phyl·lox·e·ra (fīl'ök-sîr'ə, fī-lök'sär-ə) *n. pl.* **phyl·lox·e·rae** (-rē). Any of several small insects of the genus *Phylloxera* that are related to aphids, especially *P. vitifoliae*, a widely distributed species very destructive to grape crops. [New Latin *Phylloxera*, genus name : Greek *phullo-*, *phyllo-* + Greek *xēros*, dry.]

—**phyl'lox·e'ran** *adj. & n.*

phy·lo·gen·e·sis (fī'lō-jĕn'i-sīs) *n.* See **phylogeny** (*n.*, sense 1).

phy·lo·ge·net·ic (fī'lō-jə-nĕt'ik) *adj.* **1.** Of or relating to phylogeny or phylogenetics. **2.** Relating to or based on evolutionary development or history: *a phylogenetic classification of species*. —**phy'lo·ge·net'i·cal·ly** *adv.*

phy·lo·ge·net·ics (fī'lō-jə-nĕt'iks) *n.* (*used with a sing. verb*). The study of phylogeny.

phy·log·e·ny (fī-lōj'ə-nē) *n. pl.* **phy·log·e·nies**. **1.** The evolutionary development and history of a species or higher taxonomic grouping of organisms.

Also called *phylogenesis* **2.** The evolutionary development of an organ or other

part of an organism: *the phylogeny of the amphibian intestinal tract*. **3.** The historical development of a tribe or racial group. [Greek *phulon*, race, class; see

bheuə- in Appendix + **-GENY**.] —**phy'lo·gen'ic** (-jĕn'ik) *adj.*

phy·lum (fī'ləm) *n. pl.* **phy·la** (-lə). **1. Biology.** A primary division of a kingdom, as of the animal kingdom, ranking next above a class in size. See Table at **taxonomy**. **2. Linguistics.** A large division of possibly genetically related families of languages or linguistic stocks. [New Latin, from Greek *phulon*, class. See **bheuə-** in Appendix.]

phys. *abbr.* **1.** Physical. **2.** Physician. **3.** Physicist; physics. **4.** Physiological; physiology.

phys- *pref.* Variant of **physio-**.

phys. ed. or **phys ed** *abbr.* Physical education.

physi- *pref.* Variant of **physio-**.

phys·i·at·rics (fīz'ē-ăt'rīks) *n.* (*used with a sing. verb*). **1.** See **physical medicine**. **2.** Physical therapy.

phys·i·at·rist (fīz'ē-ăt'rīst, fī-zī'ə-trīst) *n.* **1.** A physician who specializes in physical medicine. **2.** A health care professional who administers physical therapy; a physical therapist.

phys·i·at·ry (fīz'ē-ăt'rē, fī-zī'ə-trē) *n.* **1.** See **physical medicine**.

2. Physical therapy.

phys-ic (fĭz'ĭk) *n.* **1.** A medicine or drug, especially a cathartic. **2.** *Archaic.* The art or profession of medicine. — *v. tr.* **phys-icked, phys-ick-ing, phys-ics.** **1.** To act on as a cathartic. **2.** To cure or heal. **3.** To treat with or as if with medicine. [Middle English *phisik*, from Old French *fisque*, medical science, natural science, from Latin, natural science, from Greek *phusikē*, feminine of *phusikos*, of nature, from *phusis*, nature. See **bheu-** in Appendix.]

phys-i-cal (fĭz'ĭ-kəl) *adj.* *Abbr. phys.* **1. a.** Of or relating to the body as distinguished from the mind or spirit. See Synonyms at **bodily**. **b.** Involving or characterized by vigorous bodily activity: *a physical dance performance*. **c.** *Slang.* Involving or characterized by violence: “*A real cop would get physical*” (TV Guide). **2.** Of or relating to material things: *our physical environment*. **3.** Of or relating to matter and energy or the sciences dealing with them, especially physics. — *n.* A physical examination. [Middle English *physical*, medical, from Medieval Latin *physicālis*, from Latin *physica*, physics. See PHYSICS.] —**phys'i-cal'i-ty** (-kəl'ĭ-tē) *n.* —**phys'i-cal-ly** *adv.*

physical anthropology (fĭz'ĭ-kəl ăn'thrə-pŏl'ə-jē) *n.* The branch of anthropology that deals with human evolutionary biology, racial variation, and classification. Also called *somatology* —**physical anthropologist** *n.*

physical chemistry (fĭz'ĭ-kəl kēm'ĭ-strē) *n.* Scientific analysis of the properties and behavior of chemical systems primarily by physical theory and technique as, for example, the thermodynamic analysis of macroscopic chemical phenomena.

physical education (fĭz'ĭ-kəl ɛj'ə-kā'shən) *n.* *Abbr. P.E., phys. ed., phys ed* Education in the care and development of the human body, stressing athletics and including hygiene.

physical examination (fĭz'ĭ-kəl ĭg-zăm'ə-nā'shən) *n.* A medical examination to determine the condition of a person's health or physical fitness, especially for a specified activity or service.

physical geography (fĭz'ĭ-kəl jē-ŏg'rə-fē) *n.* The study of the natural features of the earth's surface, especially in its current aspects, including land formation, climate, currents, and distribution of flora and fauna. Also called *physiography*

phys-i-cal-ism (fĭz'ĭ-kə-lĭz'əm) *n.* *Philosophy.* The doctrine that all phenomena can be described in spatiotemporal terms and consequently that any descriptive scientific statement can in principle be reduced to an empirically verifiable physical statement. —**phys'i-cal-ist** *n.* —**phys'i-cal-is'tic** *adj.*

phys-i-cal-ize (fĭz'ĭ-kə-lĭz') *v. tr.* **phys-i-cal-ized, phys-i-cal-iz-ing, phys-i-cal-iz-es.** **1.** To express with the body: *physicalize one's emotions*. **2.** To describe or interpret in physical terms: “*a writer who physicalizes everything he feels*” (James Wolcott). —**phys'i-cal-i-za'tion** (-kə-lĭ-zā'shən) *n.*

physical medicine (fiz'ī-kəl mēd'ī-sīn) *n.* The branch of medicine that deals with the treatment, prevention, and diagnosis of disease by essentially physical means, including manipulation, massage, and exercise, often with mechanical devices, and the application of heat, cold, electricity, radiation, and water. Also called *physiatrics*, *physiatry*.

physical science (fiz'ī-kəl sī'əns) *n.* Any of the sciences, such as physics, chemistry, astronomy, and geology, that analyze the nature and properties of energy and nonliving matter.

physical therapy (fiz'ī-kəl thēr'ə-pē) *n.* *Abbr.* **P.T.** The treatment of physical dysfunction or injury by the use of therapeutic exercise and the application of modalities, intended to restore or facilitate normal function or development. Also called *physiotherapy* —**physical therapist** *n.*

phy-si-cian (fī-zīsh'ən) *n.* **1.** *Abbr.* **phys.** A person licensed to practice medicine; a medical doctor. **2.** A person who practices general medicine as distinct from surgery. **3.** A person who heals or exerts a healing influence. [Middle English *fisicien*, from Old French, from *fisique*, medical science. See **PHYSIC.**]

phy-si-cian's assistant (fī-zīsh'ənz ə-sīs'tənt) *n. pl.* **physicians' assistants.** *Abbr.* **P.A.** A person trained to provide basic medical services, usually under the supervision of a physician.

phys-i-cist (fiz'ī-sīst) *n.* *Abbr.* **phys.** A scientist who specializes in physics.

phys-i-co-chem-i-cal (fiz'ī-kō-kēm'ī-kəl) *adj.* **1.** Relating to both physical and chemical properties. **2.** Relating to physical chemistry.

phys-ics (fiz'īks) *n.* **1.** (*used with a sing. verb*). *Abbr.* **phys.** The science of matter and energy and of interactions between the two, grouped in traditional fields such as acoustics, optics, mechanics, thermodynamics, and electromagnetism, as well as in modern extensions including atomic and nuclear physics, cryogenics, solid-state physics, particle physics, and plasma physics. **2.** (*used with a pl. verb*). Physical properties, interactions, processes, or laws: *the physics of supersonic flight*. **3.** (*used with a sing. verb*). *Archaic.* The study of the natural or material world and phenomena; natural philosophy. [From Latin *physica*, from Greek (*ta phusika*, from neuter pl. of *phusikos*, of nature, from *phusis*, nature. See **bheuə-** in Appendix.]

physio- or **physi-** or **phys-** *pref.* **1.** Nature; natural: *physiography*.

2. Physical: *physiotherapy*. [Greek *phusio-*, from *phusis*, nature. See **bheuə-** in Appendix.]

phys-i-og-no-my (fiz'ē-ōg'nə-mē, -ōn'ə-mē) *n. pl.* **phys-i-og-no-mies.**

1. a. The art of judging human character from facial features. **b.** Divination based on facial features. **2. a.** Facial features, especially when regarded as revealing character. See Synonyms at **face**. **b.** Aspect and character of an inanimate or abstract entity: *the physiognomy of New England*. [Middle English *phisionomie*, from Old French *phisionomie*, from Late Latin *physiognōmia*, from Greek *phusi-*

ognōmia, variant of *phusioognōmonia*: *phusio-*, physio- + *gnōmōn*, *gnōmon-*, interpreter; see **gnō-** in Appendix.] —**phys'i-og-nom'ic** (-ōg-nōm'ik, -ə-nōm'ik), **phys'i-og-nom'i-cal** (-i-kəl) *adj.* —**phys'i-og-nom'i-cal-ly** *adv.*
—**phys'i-og'no-mist** *n.*

phys-i-og-ra-phy (fiz'ē-ōg'rə-fē) *n.* See **physical geography**.

—**phys'i-og'ra-pher** *n.* —**phys'i-o-graph'ic** (-ə-gräf'ik), **phys'i-o-graph'i-cal** (-i-kəl) *adj.* —**phys'i-o-graph'i-cal-ly** *adv.*

physiol. *abbr.* Physiological; physiology.

phys-i-o-log-i-cal (fiz'ē-ə-lōj'i-kəl) also **phys-i-o-log-ic** (-ik) *adj.* *Abbr.*

phys., **physiol.** **1.** Of or relating to physiology. **2.** Being in accord with or characteristic of the normal functioning of a living organism. **3.** *Color.* Of or being an additive primary color. —**phys'i-o-log'i-cal-ly** *adv.*

physiological psychology (fiz'ē-ə-lōj'i-kəl sī-kōl'ə-jē) *n.* See **psychophysiology**. —**physiological psychologist** *n.*

physiological saline (fiz'ē-ə-lōj'i-kəl sā'lēn') *n.* A sterile solution of sodium chloride that is isotonic to body fluids, used to maintain living tissue temporarily and as a solvent for parenterally administered drugs.

phys-i-ol-o-gy (fiz'ē-ōl'ə-jē) *n.* *Abbr.* **phys.**, **physiol.** **1.** The biological study of the functions of living organisms and their parts. **2.** All the functions of a living organism or any of its parts. —**phys'i-ol'o-gist** *n.*

phys-i-o-pa-thol-o-gy (fiz'ē-ō-pə-thōl'ə-jē) *n.* See **pathophysiology**.
—**phys'i-o-path'o-log'ic** (-pāth'ə-lōj'ik), **phys'i-o-path'o-log'i-cal** (-i-kəl) *adj.* —**phys'i-o-pa-thol'o-gist** *n.*

phys-i-o-ther-a-py (fiz'ē-ō-thēr'ə-pē) *n.* See **physical therapy**.

—**phys'i-o-ther'a-peu'tic** (-thēr'ə-pyō'tik) *adj.* —**phys'i-o-ther'a-pist** *n.*

phy-sique (fī-zēk') *n.* The body considered with reference to its proportions, muscular development, and appearance: “*a short man with... the physique of a swimmer*” (John le Carré). [French, physical, physique, from Latin *physicus*, of nature, from Greek *phusikos*, from *phusis*, nature. See **bheuə-** in Appendix.]

—**phy-siqued'** *adj.*

SYNONYMS: *physique, build, constitution.* The central meaning shared by these nouns is “bodily structure or development”: *a child of delicate physique; a stocky build; a robust constitution.*

phy-so-stig-mine (fī'sō-stīg'mēn') also **phy-so-stig-min** (-mīn) *n.* A crystalline alkaloid, C₁₅H₂₁N₃O₂, extracted from the Calabar bean, used in medicine as a miotic and cholinergic agent and to enhance memory in patients with Alzheimer's disease. Also called *eserine* [New Latin *Physostigma*, genus name of the Calabar bean (Greek *phusa*, bellows + STIGMA) + -INE².]

phy-sos-to-mous (fī-sōs'tə-məs) *adj.* Having a connecting tube between the air bladder and a part of the alimentary canal, as in certain fishes. [From Greek *phusa*, bladder + Greek *stoma*, mouth.]

phyt- *pref.* Variant of **phyto-**.

-phyte *suff.* **1.** A plant with a specified character or habitat: *halophyte*. **2.** A pathological growth: *osteophyte*. [From Greek *phuton*, plant, from *phuein*, to make grow. See **bheuə-** in Appendix.]

phyto- or **phyt-** *pref.* Plant: *phytogenesis*. [New Latin, from Greek *phuto-*, from *phuton*, plant, from *phuein*, to make grow. See **bheuə-** in Appendix.]

phy-to-chem-is-try (fī'tō-kēm'ī-strē) *n.* The chemistry of plants.

—**phy'to-chem'i-cal** (-ī-kəl) *adj.* —**phy'to-chem'i-cal-ly** *adv.*

—**phy'to-chem'ist** *n.*

phy-to-chrome (fī'tə-krōm') *n.* A cytoplasmic pigment of green plants that absorbs light and regulates dormancy, seed germination, and flowering.

phy-to-gen-e-sis (fī'tō-jěn'ī-sīs) also **phy-tog-e-ny** (fī-tōj'ə-nē) *n.* The origin and evolutionary development of plants. —**phy'to-ge-net'ic** (-jə-nēt'ik),

phy'to-ge-net'i-cal (-ī-kəl) *adj.* —**phy'to-ge-net'i-cal-ly** *adv.*

phy-to-gen-ic (fī'tō-jěn'ik) also **phy-tog-e-nous** (fī-tōj'ə-nəs) *adj.* Having a plant origin, as coal.

phy-tog-e-ny (fī-tōj'ə-nē) *n.* Variant of **phytogenesis**.

phy-to-ge-og-ra-phy (fī'tō-jē-ōg'rə-fē) *n.* The study of the geographic distribution of plants. Also called *geobotany* —**phy'to-ge-og'ra-pher** *n.*

—**phy'to-ge'o-graph'i-cal** (-jē'ə-gräf'ī-kəl), **phy'to-ge'o-graph'ic** (-gräf'ik) *adj.*

phy-tog-ra-phy (fī-tōg'rə-fē) *n.* The science of plant description; descriptive botany.

phy-to-he-mag-glu-ti-nin (fī'tō-hē'mə-glōōt'n-īn) *n.* A hemagglutinin extracted from a plant.

phy-to-hor-mone (fī'tō-hôr'mōn') *n.* See **plant hormone**.

phy-tol (fī'tōl', -tōl') *n.* A liquid alcohol, C₂₀H₄₀O, used in the synthesis of vitamins E and K.

phy-tol-o-gy (fī-tōl'ə-jē) *n.* The study of plants; botany. —**phy'to-log'ic** (fī'tə-lōj'ik), **phy'to-log'i-cal** (-ī-kəl) *adj.*

phy-ton (fī'tōn') *n.* The smallest unit of plant structure. [New Latin, from Greek *phuton*, plant. See **PHYTO-**.] —**phy-ton'ic** *adj.*

phy-to-path-o-gen (fī'tō-pāth'ə-jən) *n.* An organism that is pathogenic to a plant. —**phy'to-path'o-gen'ic** (-jěn'ik) *adj.*

[Middle English *pikle*, highly-seasoned sauce, probably from Middle Dutch *pekel*, pickle, brine.]

WORD HISTORY: Trade with the Low Countries across the North Sea was important to England in the later Middle Ages, and it is perhaps because of this trade that we have the word *pickle*. Middle English *pikel*, the ancestor of our word, is first recorded around 1400 with the meaning “a spicy sauce or gravy served with meat or fowl.” This is a different sense from the one the word brings to mind now, but it is related somewhat in sense to its possible Middle Dutch source *pekel*, a solution, such as spiced brine, for preserving and flavoring food. After coming into English the word *pickle* expanded its sense range in several ways. It was applied, as it had been in Middle Dutch, to a pickling solution. Later *pickle* was used to refer to something so treated, such as a cucumber. The word also took on a figurative sense, “a troublesome situation,” perhaps under the influence of a similar Dutch usage in the phrase *in de pekel zitten*, “sit in the pickle,” and *iemand in de pekel laten zitten*, “let someone sit in the pickle.”

WORD HISTORY: The etymology of the word *pie* turns etymologists into Simple Simons, that is, we do not know what it is for certain. It may come from Medieval Latin *pica* or *pia*, "pie, pasty," but we do not know the origins of these words

and the earliest use of the Middle English word *pie* is earlier (1199) than the first use of Medieval Latin *pica* (c. 1310) or *pia* (1230). It has been suggested that Medieval Latin *pica* may be from Latin *pīca*, “magpie.” The connection could have been made because the miscellaneous nature of pie ingredients might have brought to mind either the magpie’s piebald coloration or its habit of collecting miscellaneous items. In any case, the first pies contained fowl, fish, or meat; the first certain recorded mention of a fruit pie is in Robert Greene’s *Arcadia*, published in 1590: “Thy breath is like the steame of apple-pyes.”

WORD HISTORY: The pilot of an aircraft flying through the air has a foot on the ground not literally but etymologically. If we poke around in the etymological soil for the roots of the word *pilot*, we find that it goes back to the Indo-European root *ped-*, meaning “foot.” From the lengthened-grade suffixed form *pēdo-* came the Greek word *pēdon*, “blade of an oar,” and in the plural, “rudder.” In Medieval Greek there is assumed to have existed the derivative *pēdōtēs*, “steersman,” which passed into Old Italian and acquired several forms, including *pedota*, and *pilota*,

the form that was borrowed into Old French as *pilot*. English borrowed the word from French, and as *pilot* it has moved from the water to the air, first being recorded in 1848 with reference to an airborne pilot—a balloonist.
